***** ALI BABA AND HIS FORTY THIEVES *****

1919 [1st-2nd January] The Russian Civil War [LXXXII - Food, High Finance, and Espionage Fronts (The Men Behind Hoover)]: [Continued from 31st December 1918] On 1st January 1919 the American occupation's food tsar, Herbert Hoover [see 7th November 1918], now based in Paris [he is close to, but not part of the Versailles negotiating team - Ed.], is beginning to get his team together. And most impressive it is, too, as biographer Walter W. Liggett will later explain ...
... Hoover had powerful aides. Lord Reading (Sir Rufus Isaacs) [check him out], English food controller and member of the [Supreme Economic Council], had been Hoover's lawyer for many years. Emile Francqui [check him out] was perhaps the most influential man in Belgium. A large Paris bank also was interested in Hoover's Russian holdings." ...  

ASIDE: We shall be returning to this den of thieves when profiling said Supreme Economic Council [see 24th February below]. Burner (1979) identifies the Russian holdings as "Kyshtym [map] and Orsk [map] in Siberia" (p54), and suggests that he acted through the "Inter-Russian Company" [nothing known]. He was also involved in some unsuccessful oil prospecting projects in the Maykop region [map] of the western Kuban. Another biographer, Kellogg (1920/2009) [Amazon], reviews Hoover's banking network, as also do Wentling and Medoff (2002) [Amazon].

... "The Romanoff family had been his partners." ...

ASIDE: Burner covers Hoover's Russian investments in some detail, if interested. Hoover visited Russia "several times", adding up to a total 72 weeks. The Tsar did indeed commission his services in 1912.

... 'Clemenceau and Lord Curzon of England [check him out] were perfectly fanatical in their anti-Bolshevism. It is probable that Woodrow Wilson - willing to sacrifice any principle to put over the League of Nations - didn't know what it was all about [...] and it is quite possible that he had never heard of Hoover's interests in Russia. In any event, Wilson left our Russia policy almost entirely in Hoover's hands. [...] The Russians are to starve because four men in Paris do not like their politics; on the day when they surrender to the ideas and armies of the Big Four, then they may have bread" (Liggett, 1932, p261).

Hoover sets the tone for his intervention by letting it be known from the outset that he intends being particularly strict on the Germans given the "wanton destructiveness" he had seen from them in Belgium, and that the Allied naval blockade of Germany is going to remain in force until they sign up to the Versailles Treaty [see 12th July below]. The Germans, too, are to starve, etc. On the intelligence front, Allen Dulles arrives in Paris 2nd January to work with one of the American delegation's co-opted academics, Yale historian Charles Seymour [Wikipedia biography] [sub-thread continues at next entry]. 1919 [2nd January] The Russian Civil War [LXXXIII - South Russian Front (The Svechnikov Offensive)]: [Continued from preceding entry] On 2nd January 1919 General Mikhail Svechnikov's [Wikipedia biography] 11th and 12th Armies advance westward out of their base at Astrakhan [map] toward Armavir [map] and Tikhoretsk [map], threatening [Y]Ekaterinodar [see 15th August 1918] and Denikin's hold over the western Kuban, and southward down the Caspian coast toward Baku [see 30th October 1918], threatening the oilfields there. Denikin gives as good as he gets, however, and Svechnikov soon has to fall back on his North Caspian heartland [sub-thread continues at next entry]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = WW1 MAJOR BATTLES AND CAMPAIGNS] [THREAD = THE NEVER-ENDED RUSSIAN CIVIL WAR, 1917-ONGOING] [THREAD = THE COLD WAR IN THE MAKING]

1919 [3rd January-2nd February] The Russian Civil War [LXXXIV - South Russian Front (The Ukraine Goes Red)]: [Continued from preceding entry] On 3rd January 1919 the Allied masterplan for the south [see preceding entry] is thrown into confusion by a snap Bolshevik push into the Ukraine from the north which captures Kharkov [map] and pushes the Whites back a hundred miles to Poltava [map]. On 6th January the Ukrainian Socialist Soviet Republic (UkSSR) [Wikipedia briefing] is established to administer the territory acquired ...

ASIDE: This, from a paper by economic historian Peter Gatrell in Broadberry and Harrison's (2005) "The Economics of World War I" [Amazon MASTERLY], sets the broader scene ...

"Brest-Litovsk's terms forced the Bolsheviks to accept 'a vast amputation of territory ... unprecedented in Great Power relations'. Russia ceded Poland, Lithuania, and Western Latvia; essentially recognised Ukraine as independent; and pulled troops out of Estonia, Finland, and the Southern Caucasus” (p218, n61).

Foreign Commissar Georgy Chicherin [see 4th April 1918] carefully points out to foreign journalists that this advance was not Moscow's work, but rather regional Reds fighting regional Whites. The UkSSR will endure, in some form or other, until the break-up of the Soviet Union in 1991.
Further attacks on 20th January take Poltava and push the Whites back another 100 miles to Kremenchuk [map]. Then, on 2nd February, the jewel in the regional crown - Kiev [map] - also falls to the Reds. To add insult to injury, for much of the summer the White Armies in the south and west suffer severe non-combat losses due to the ravages of typhus [sub-thread continues at next entry]. ***** NEW BATTLE FRONT IN EASTERN EUROPE *****

QUICKIE - ESTONIA AND LATVIA BETWEEN THE ARMISTICE AND VERSAILLES: Stewart (1932/2009) devotes an entire chapter to the history of these two East Baltic states. The White Estonians were centred on Pskov [map] under the command of Stanislav Bulak-Balakhovich [Wikipedia biography] (in fact, a Lithuanian). The White Latvians were centred at Riga. The Armistice had included a clause requiring Germany to maintain order in the territories they had overrun, but in many places she lacked the physical resources so to do. Stewart continues ...

"The chief actor in the drama of German occupation at this time was the famous General von der Goltz [see 10th December 1918], who attempted to combine anti-Bolsheviks [into] a force of some twenty thousand men in Latvia and Lithuania not only with the intention of fighting the Soviets but also of providing a refuge for such Germans as wished to flee the consequences of their own revolution. [...] As the Germans retired the Reds followed them" (op. cit., k3238-3255).

The stage is now set for a summer of strife in which a "Freikorps" [Wikipedia briefing] of like-minded Germans and Latvians get together - with Allied blessing - to operate in the Baltic States with a view to clearing them of different-minded Latvian and Russian Bolsheviks, thus turning Latvia into what we know nowadays [= March 2021] as a "Proxy War". In London, meanwhile, the Foreign Office diplomat [Sir] Harold Nicolson [Wikipedia biography] entrains at Charing Cross for Paris, where he will be working with the Foreign Secretary Arthur Balfour [check him out]. His particular - and in many regions impossible - task will be to tweak the maps of Europe (indeed much of the planet) to suit the war victors, and many of the lines he is persuaded to draw may never see peace again [sub-thread continues at 4th January 1919]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = WW1 MAJOR BATTLES AND CAMPAIGNS] [THREAD = THE NEVER-ENDED RUSSIAN CIVIL WAR, 1917-ONGOING] [THREAD = THE COLD WAR IN THE MAKING]

Readers unfamiliar with the Balfour Declaration should brief themselves from the ten entries in the <Zionism During WW1> sub-thread between 2nd February and 2nd November 1917, inclusive

Crucially, Faisal agrees that an independent Jewish state in Palestine could co-exist alongside an independent Arabian kingdom in other, and much larger, liberated Ottoman provinces such as Modern Syria, Iraq, and Saudi Arabia [sub-thread continues at 18th January 1919]. 1919 [4th January] The German Revolution [III - From Kaiser To Weimar Constitution (The January Uprising)]: [Continued from 29th December 1918] On 4th January 1919 a new and hard line Chief of Police is appointed in Berlin. A Spartacist protest the following day attracts hundreds of thousands of supporters, but also its fair share of counter-revolutionaries, and there are many violent confrontations. A general strike is then called for 7th January but Chancellor Ebert [see 7th November 1918] increasingly deploys the Freikorps [see 3rd January above] to disperse the demonstrations, and several

1919 [4th January] The Russian Civil War [LXXXVI - Food, High Finance, and Espionage Fronts (The Relief Offensive)]: [Continued from 3rd January 1919] On 4th January 1919 America's Relief Tsar (and hog market fixer) Herbert Hoover gets the first of his American Relief Administration (ARA) [Wikipedia briefing] field missions in place in Warsaw, Poland ...

LEST IT BE OVERLOOKED: Hoover brings twenty years of ruthless insider dealing to relief duties in Europe [check him out now; note especially items (a) through (g) ESSENTIAL BACKGROUND]. Having been personally selected for post-Armistice relief by President Wilson [see 7th November 1918], the ARA field network now gives him "virtual control of the world's food supply" (Burner, op. cit. inf., p115). The relief agency was also a cover for American intelligence operatives [see inset 11th January below].

The Warsaw ARA station is quickly followed by others "extending from Helsingfors and Copenhagen in the north to Trieste and Salonika in the south and to Tiflis in the east" (ibid., p117). One Anson C. Goodyear [Wikipedia biography] played an important part in overcoming local difficulties. Not all observers were impressed, however ...

"The Europeans resented his reminders that the United States was supplying the bulk of Europe's relief and the way in which he promoted American economic interests, including, for example, stockpiled American pork products and severely undercutting their own producers" (MacMillan, 2001, p97).

1919 [10th January] On 10th January 1919 Winston Churchill [see 14th December 1918] replaces Lord Milner [see 11th April 1918] as Britain's Secretary of State for War.

1919 [11th January or hereabouts] The Russian Civil War [LXXXVII - Food, High Finance, and Espionage Fronts (The ASCSR Starts Work)]: [Continued from 4th January 1919] On or about 11th January 1919 Herbert Hoover's field relief missions manage to get the first consignments of food and fuel moving into Eastern Europe ...

LEST IT BE OVERLOOKED - EMBEDDED AGENTS: The historian Peter Grose explains in his (1994) "Gentleman Spy: The Life of Allen Dulles" [Amazon] that Colonel House [see 25th October 1918] had suggested to President Wilson months previously that intelligence operatives should be embedded into the relief teams on the ground. The histories record that Secretary Lansing [see 6th July 1918] and Hoover insisted that if this really had to be done it should be done discretely, so as not to endanger innocent aid workers. It therefore fell to Allen Dulles [see 1st January above], who had been seconded to the Versailles delegation as resident expert in political intelligence gathering and analysis, working alongside General Ralph Van Deman [see 7th November 1918], head of Washington's Military Intelligence Division and presently head of security for the delegation, to provide and administer the necessary embedded agents. Van Deman duly provided Dulles with a list of 250 officers who knew the languages of Eastern Europe, and Army propagandist Walter Lippmann [see 25th October 1918] helped select and brief the best candidates.

LEST THIS, TOO, BE OVERLOOKED: The main category of experts in Eastern European languages would have been first or second generation immigrants into the United States from those very same countries! And a sub-set of these would have been political or religious refugees rather than just economic immigrants, complete with a political or religious score to settle in their ancestral homelands.

Andelman (2008) notes that "sixty years later, U.S. intelligence agents in communist nations like Yugoslavia were still using such transparent cover as 'labor attachés' to conceal their identities" (p33). So the agents went where the aid trains went and back came the intel - see list of types.
Dulles quietly takes it all in, and will live and breathe political intelligence for the rest of his life - not stopping even when a later President sacks him as Director of the Central Intelligence Agency in 1961, following that agency’s gross mismanagement of the Bay of Pigs Incident [see 17th April 1961 below] [sub-thread continues at 13th January 1919]. 1919 [13th January] The Russian Civil War [LXXXVIII - West Russian Front (Latvia Goes Red)]: [Continued from 11th January 1919] On 13th January 1919 the Red Latvian offensive now extends its control over Latvia (albeit it will only be briefly) by capturing the towns of Jelgava/Mitau [map], Liepaja/Libau [map], and Ventspils/Windau [map] to the west of Riga [sub-thread continues at 16th January 1919]. 1919 [15th January] The German Revolution [IV - From Kaiser To Weimar Constitution (Luxemburg and Liebknecht Terminated)]: [Continued from 4th January 1919] On 15th January 1919 a Spartacist demonstration in Berlin is ambushed by a Freikorps snatch squad, and both Rosa Luxemburg and fellow revolutionary Karl Liebknecht are taken away, interrogated, and promptly state-executed. After this clampdown, the revolution moves temporarily out of Berlin to other cities, not least Bremen and Munich [sub-thread continues at 19th January 1919]. "Paris cannot be understood without Moscow" 1

1919 [16th January] The Russian Civil War [LXXXIX - Political and International Front (First Top Table Talks At Versailles)]: [Continued from 13th January 1919] On 16th January 1919 the Supreme Council [a.k.a. Council of Ten], consisting of the premier and foreign minister of each of the six most influential conquering nations (less Russia, which was purposely not invited), proceed to discuss the situation in Russia in the Russians' absence. Here, from a copy later presented to the U.S. Senate, is an indicative excerpt from the Minutes ...

"The British proposal was to invite all of the different governments now at war within what used to be the Russian Empire [...] to send men here [but] not to be delegates. [...] Conditions in Russia are very bad; there is general mis-government and starvation. It is not known who is obtaining the upper hand, but the hope that the Bolshevik Government would collapse had not been realised. In fact, there is one report that the Bolsheviks are stronger than ever, that their internal position is strong, and that their hold on the people is stronger. [...] It is also reported that the peasants are becoming Bolshevik" (Bullitt, 1919/2019, p9).

LEST THE WORD BE MISUNDERSTOOD - "BOLSHEVISM": We are going to be hearing a lot about Bolshevism over the next few months, and so here - from the Wikipedia briefing - is a quick pen picture of what Bolsheviks are and believe in (one core definition, followed by three supporting definitions) ...

"Bolshevism (from Bolshevik) is a revolutionary Marxist current of political thought and political regime associated with the formation of a rigidly centralized, cohesive and disciplined party of social revolution, focused on overthrowing the existing capitalist state system, seizing power and establishing the ‘dictatorship of the proletariat’”

"Marxism" is the political and economic theory of the German economic philosopher Karl Marx [Wikipedia biography and briefing]. There is an excellent four-minute introduction to this theory in this YouTube Tutorial RECOMMENDED VIEWING, to which we have little to add at this juncture. "Capitalism" is harder to define than Marxism, being (1) just the wholly undeniable observation that some cultures vest their economic surplus in fewer hands than do other cultures, with perhaps beneficial effects, perhaps detrimental; as well as (2) a pejorative accusation by those who have little or no capital that (1) is the root of all the evils in the world (which has yet to be proven). The "Dictatorship Of The Proletariat" [Wikipedia briefing] is even harder to define. This term came originally from one Joseph Wedemeyer [no convenient biography but see Wedemeyer (1852)] in 1852, and went on to become one of the major conceptual elements of Marxist theory. It is generally seen as an inevitable transitional stage when moving from a Capitalist to a Communist economic system, appearing once a revolution has begun to attract Capitalist-funded counter-revolutionary forces to Capitalism’s defence.

The present author is not, and never has been, a Marxist, a Bolshevik, or a Communist. He does not favour rigidly centralised, cohesive, and disciplined political parties, for these are core markers of Fascist thinking.
He does not accept the inevitability of the Marxist transitional stages, nor does he accept (provided there are suitable checks and balances) that capital is per se a bad thing.

**Lloyd George** then goes on to explain three possible policies, namely (1) greater military intervention, (2) a "cordon", or (3) negotiations as above. He dismissed the first possibility out of hand on the grounds that between 1914 and 1918 a million Germans had tried to do just that, and failed. Moreover, things were not looking particularly promising with either of the existing North Russian or Siberian expeditions. As to a blockade, he pointed to the 150 million Bolsheviks already (or soon to be) starving. A cordon, he said, would be "a death cordon". And who would replace the Bolsheviks if they were ousted, when his advice was that the likes of Denikin and Kolchak were "quick-sand". He therefore took the third view, namely that the Bolsheviks should be invited to Paris to appear before the Supreme Council (but not to sit as delegates on that Council), and there to "render an account of their actions". **OUR VERDICT:** In true diplomatic fashion, Lloyd George was probably just playing for time here. The existing interventions were all planning Spring offensives, and there were hopes of a decisive link-up north of Moscow between the Archangelsk force pushing southward and Kolchak's Siberians heading westward. What Lloyd George failed to foresee was that if Trotsky's Red Army could see off the three interventions simultaneously (which they did), and survive the propaganda offensive, the banking embargo, and the incessant assassinations and intelligence operations, then there would no longer be a whole lot of point coming to any negotiating table. Hardly surprising, therefore, that historians have queued up ever since to pass harsh judgements on the statesmen of 1919. Here is one of the most recent: "...there can be little doubt [...] that Versailles was one of the supreme failures of modern diplomacy" (Hulsman, 2009, p116) [sub-thread continues at 21st January 1919]. ***** VERSAILLES PEACE CONFERENCE CONVENES *****
***** VERSAILLES PEACE CONFERENCE CONVENES *****

1919 [18th January] The Versailles Peace Conference [II - Formal Proceedings (Opening Ceremony)]:

[Continued from 3rd January 1919] On 18th January 1919 ["Tiger" Clemenceau has carefully made sure it is the 18th, wishing to rub the Kaiser's nose in the fact that this is the anniversary of his Coronation back in 1871 - see Timeline 18th January 1871] the peace conference which in the end comes nowhere near ending the war to end all wars gets under way in Paris. There are plenty of top hats and cravats, but many of the assembled bigwigs have more than peace and reconciliation on their mind. **Secretary Lansing** [see 11th January above], for example, has grown "downright rabid" about Bolshevism of late, describing it as "the most hideous and monstrous thing that the human mind has ever conceived" (Grose, 1994, p48), and Hoover's relief network is destined to play a large part in the proceedings by making food aid contingent upon political orientation. Indeed Bolshevism and starvation are never far from centre stage, thus ...

"[The advance of Bolshevism] was the first significant, tangible challenge to international capitalism. When the peace conference opened, Bolsheviks were extending their power into eastern Europe and Germany. And the Allies, including the United States, were confronting Bolshevism in Siberia and Archangel in 1918 and early 1919. **Thorstein Veblen** [Wikipedia biography] called containment of Bolshevism 'the parchment on which [the Treaty of Versailles] was written', [...] Hoover did use food to establish order and allow peacemaking on a Western style to proceed; he was under great pressure to use food as a political weapon, given the Big Four's lack of any other anti-Bolshevik strategy" (Burner, pp118-119).

There are also delicate problems of relative diplomatic status ...

"Observers noticed some absences: the Greek prime minister, Venizelos, annoyed that Serbia had more delegates than his own country; Borden, the Canadian prime minister, offended that the prime minister of little Newfoundland had been given precedence; and the Japanese, who had not yet arrived" (MacMillan, 2001, p99).
The conference will now break up into sub-committees and working parties - almost 60 of them altogether (MacMillan, 2001) - with occasional plenary sessions, but little progress will be forthcoming because there are as many hidden or implicit agendas as there are official ones, for example ... "The French, seeking security in Germany's weakness, wanted to detach the left bank of the Rhine and set up puppet states. The Poles, citing boundaries of long-forgotten kingdoms, demanded territories inhabited mostly by Germans, including East Prussia. The Italians [...] made claim to the German-speaking South Tyrol, the coast of Dalmatia, and the Slavic city of Fiume [map]. Wilson, it was rumoured, was caving in to Clemenceau and Lloyd George. No one knew what he was giving away from pressure, or weariness, or failure to understand" (Steel, 1980, p155).

As we shall shortly be seeing, many of these diplomatic impasses will be resolved by direct military action and then re-presented to conference by the victor as a fait accompli. The main commissions will be (in the order we cover them) ...

E. Lawrence ["of Arabia"] [see 30th September 1918], and Gertrude Bell [check her out IMPORTANT CONTEXT] arrive in Paris. The sad news is that Sir Mark Sykes [check him out IMPORTANT CONTEXT] succumbed to Spanish Flu three days previously, and that they have thereby lost their star witness in any argument with the French involving the Sykes-Picot Formula [see the Sykes entry above ESSENTIAL CONTEXT]. Here is Bullitt again, testifying [see 12th September below] under Congressional oath from the official Minutes of the meeting ...

"Lloyd George had introduced the proposition that representatives of the Soviet Government should be brought to Paris along with the representatives of the other Russian governments (reading): [...]"
In the end, therefore, it is agreed to send out emissaries to the various warring factions in Russia (some of whom have rather inconveniently already received diplomatic recognition by Supreme Council members), while at the same time making a start on other issues on the agenda, such as (top of the list) the League of Nations [see next entry], followed closely by German Reparations [see 23rd January
1919 [21st January] The Versailles Peace Conference [V - Supreme Council Proceedings (Secret Session, Agenda Item #2)]: [Continued from preceding entry ESSENTIAL CONTEXT] Having decided how to approach the Bolshevik question, the 21st January in camera meeting of the extended Supreme Council now turns its attention to the XIVth of President Wilson’s Fourteen Points [see 7th January 1918], that concerning - in that historic speech's own words - the "New Order of Things" via a "general association of nations". The proposed association already usually goes by the name "League of Nations" [Wikipedia briefing], a name resurrected from political musings from earlier in and before the war. Here is Bullitt again, still testifying [see 12th September below] under Congressional oath from the official Minutes of the meeting ...

"President Wilson observed that he had himself drawn up a constitution of a League of Nations. He could not claim that it was wholly his own creation. Its generation was as follows: He had received the Phillimore Report [Wikipedia briefing], which had been amended by Colonel House and re-written by himself. He had again revised it after having received General Smuts’ and Lord Robert [Gascoyne-Cecil]’s reports [check them both out]. It was therefore a compound of these various suggestions. [...] Mr. Balfour suggested that President Wilson’s draft should be submitted to the Committee as a basis for discussion. President Wilson further suggested that the question should be referred as far as possible to the men who had been studying it” (p27).

League of Nations developments will accordingly now be in the hands of a dedicated sub-committee, and we shall be returning regularly to their deliberations in the coming months [next visit 3rd February below] [sub-thread continues at next entry]. 1919 [21st January] The Versailles Peace Conference [VI - Supreme Council Proceedings (Secret Session, Agenda Items #3 and #4)]: [Continued from preceding TWO entries ESSENTIAL CONTEXT] The final two items on the agenda of the 21st January in camera meeting of the extended Supreme Council concern (Item #3) Poland and (Item #4) Disarmament. Time is running short, however, and both items are duly rolled over to the next meeting. The suggested venue is Büyükdâa/Prinkipos [map], an island in the Sea of Marmara close by Istanbul. Here is Bullitt again, still testifying [see 12th September below] under Congressional oath ...

"It was agreed that President Wilson should draft a proclamation for consideration at the next meeting, inviting all organised parties in Russia to attend a meeting to be held at some selected place such as Salonika or Lemnos, in order to discuss [...] means of restoring order and peace in Russia. Participation in the meeting to be conditional on a cessation of hostilities” (op. cit., p28).

***** FRANCE BLOCKS ITS OWN PROPOSAL *****

Bullitt also explains how well the offer will be received over the coming few days ...
"After the Prinkipos proposal was made, the replies began to come in from various factions, that they would refuse to accept it for various reasons. The Soviet Government replied in a slightly evasive way [...] saying 'we are ready to talk about stopping fighting'. [...] The French - and particularly the French foreign office, even more than Mr. Clemenceau - [...] from that minute were opposed to the idea, and [...] had communicated to the Ukrainian Government and various other antisoviet governments that if they were to refuse the proposal, they would support them [...] and not allow the Allies, if they could prevent it, or the allied Governments, to make peace with the Russian Soviet Government. [The Prinkipos proposal] therefore fell to the ground" (pp28-30).

1919 [21st-22nd January] American Purity of Essence [II - The Overman Committee Hearings (Stevenson Invents "Doggiling" ¹)]: [Continued from 19th September 1918] On 21st-22nd January 1919 the Senate takes evidence from NYC lawyer (and U. S. Justice Department snitch) Archibald Stevenson [check him out], which offers a lurid picture of Bolshevik activity in both Europe and at home. Russian Bolshevism, Stevenson insists, has recently become Germany's main weapon in their propaganda war against the United States. This is troublesome for Senator Overman because his present terms of reference require him to investigate only German contacts, not Russian as well, and so he duly asks Congressional permission to broaden his remit [sub-thread continues at 4th February 1919]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = THE PSYCHOLOGY OF BANKER-CONTROLLED PATRIOTISM]

¹ “Doggiling” in modern social media is coordinated and precisely focused public criticism and/or abuse of a party, directed from a politically “owned” and necessarily well-resourced propaganda office somewhere in the e-shadows. It is accordingly expensive and very far from accidental. It is targeted online bullying, and - unsurprisingly - one of the major weapons of 21st Century Cyberwarfare [Wikipedia briefing]. (And when it fails, of course, there will always be the wet team.)

RESEARCH ISSUE: This precipitous fall from grace bears all the hallmarks of a nod-and-a-wink request secretly granted, for less than a fortnight previously [see 11th January above] Lippmann and the intelligence men Van Deman and Dulles seemed to have been getting along famously while organising the deployment of undercover intelligence officers in Herbert Hoover's humanitarian aid field force. Civilian reporting was controlled solely by George Creel's [see 7th May 1918] Committee on Public Information (CPI) [see 21st June 1918]. Creel himself is presently directing matters from Paris, and the CPI will not be dismantled until Congress withdraws its funding 30th June 1919. Van Deman's military intelligence people shared the complex demands of effective intelligence gathering with Dulles' political intelligence network.

During his three months in U.S. Army uniform Lippmann had taken America's charm offensive right into the German trenches, directly eroding the individual enemy's will to fight and thereby saving lives on both sides of no-man's-land. However, the civilian propagandists who have replaced him are now addressing a different audience, speaking to the folks back home, selling them war bonds and drumming up party political support. So for Lippmann, "what had begun as a crusade had ended in confusion and disillusion" (Steel, 1980, p154) [sub-thread continues at 18th March 1919]. "A carefully falsified history was created to conceal the fact that Britain, not Germany, was responsible for the war" (Docherty and Macgregor, op. cit.inf.; k56)

SPOILER ALERT: There is a lot to say about reparations, for it is often held up as having been the single greatest cause of WW2. So to keep readers on track, here is a quick flavour of the issues which will shortly be emerging, seen from ten years further down the line by the British diplomat Edgar Vincent, Lord d'Abernon in his (1929/Borodino e-edition 2018) "Diary of an Ambassador (Vol. I)" [Amazon] ...

"The main defects of the Treaty of Versailles, considered as a permanent basis for the relationship between European nations, were of a threefold character: In the first place, the Treaty was imposed upon Germany; the engagements taken under duress by Germany were not considered binding by German public opinion. In the second place, Germany's responsibility for reparations was founded on the assertion that she was responsible for the war. This was denied, rightly or wrongly, by all German authorities and was not susceptible of impartial determination or of convincing proof. It was therefore a dangerous foundation for a contractual obligation." ...

Readers unfamiliar with the descent into war during July 1914 should browse the 26 entries in the <July Crisis> sub-thread, beginning at 28th June 1914.

Note that it was the Tsarist Russians - presently fighting on as the White Russians - who mobilised first.

Note also that Britain's Foreign Secretary Sir Edward Grey may, indeed, have deliberately sabotaged last-minute diplomatic attempts to defuse the situation. The most accessible source on this alleged "unspeakable evil" is Gerry Docherty and Jim Macgregor's (2013) "Hidden History: The Secret Origins of the First World War" [Amazon].

..."The third defect was that the Treaty of Versailles broke up the larger units of Central Europe into a considerable number of small States. This subdivision, based on racial differentiation, had two main political effects: a vast increase of the customs frontiers, constituting a grave impediment to international trade, and a multiplication of the centres of diplomatic activity" (k476-485).

And here is Richard M. Watt's (1969) "The Kings Depart" [Amazon], giving a welcome American perspective ...

"The British people had been allowed to imagine that Germany would be made to compensate Britain for the immense expenditures which had impoverished the world's wealthiest nation. The French had been encouraged to believe that so much would be extracted from Germany that she would be enfeebled and impotent for several generations. Neither government had seen fit to advise its constituents that there was a limit to the amount which could be got from Germany. Nobody wanted to hear that" (pp486-487).

The committee will include the following delegates ...

USA: Wall Street bankers Thomas W. Lamont [we have already introduced Lamont as J. P. Morgan and Company's man on President Wilson's advisory "Inquiry" - see 1st September 1917] and (master of the short-trading raid) Bernard Baruch [check him out], publisher (and Wilson's 1916 election campaign manager) Vance McCormick [Wikipedia biography], financier Norman Davis [Wikipedia biography], and lawyer John Foster Dulles [check him out IMPORTANT CONTEXT].

Britain: Economist John Maynard Keynes [already introduced 5th November 1918], King's Counsel and High Court Judge John Hamilton, Lord Sumner [Wikipedia biography], lately Governor of the Bank of England Lord Cunliffe [Wikipedia biography], and Cabinet Minister and Secretary of State for India Edwin Montagu [Wikipedia biography].

QUICKIE - LORDS SUMNER AND CUNLIFFE: According to MacMillan (2001), Sumner and Cunliffe seem to have been the compensation hawks in the British delegation, and were referred to disparagingly by Lloyd George as the "Heavenly Twins". Keynes reportedly loathed them, and Lloyd George "later claimed that he was appalled by their lack of judgement (p255). Cunliffe has been disparagingly by Lloyd George as the "Heavenly Twins". Keynes reportedly loathed them, and LloydGeorge seemed to have been the compensation hawks in the British delegation, and were referred to disparagingly by Lloyd George as the "Heavenly Twins". Keynes reportedly loathed them, and Lloyd George "later claimed that he was appalled by their lack of judgement (p255). Cunliffe has been
described as "arrogant and abrasive", although not entirely without a sense of humour, once quipping that "it is a fortunate thing for England that, at the time of the Great War crisis, two people were in charge of English finances who knew nothing about finance - i.e., Lloyd George and myself" (d'Abernon, op. cit., k1917).

QUICKIE - MONTAGU: In his (1988) "A Peace to End All Peace" [Amazon], David Fromkin picks up Edwin's Montagu's part in the story in mid-1917, when he was one of the leaders of the Conjoint Committee [Wikipedia briefing], a pressure group of British Jews who argued against the Zionist homeland being planned in Palestine [see 2nd February 1917, then as threaded]. It bothered him, Fromkin explains, that ...
escape from the Ghetto'. The evidence suggested that in his non-Zionism, Montagu was speaking for a majority of Jews. As of 1913, the last date for which there were figures, only about one percent of the world's Jews had signified their adherence to Zionism. British intelligence reports indicated a surge of Zionist feeling during the war in [White] Russia [...]. In Britain, the Conjoint Committee, which represented British Jewry in all matters affecting Jews abroad, had been against Zionism from the start and remained so" (p294).

France: Lawyer-politician / Finance Minister Louis-Lucien Klotz [Wikipedia biography] (described by Clemenceau as "the only Jew I knew who knew nothing about finance" (MacMillan, 2001, p257) and industrialist / special advisor Louis Loucheur [Wikipedia biography].

QUICKIE - KLOTZ AND LOUCHEUR: Klotz was an extreme Revanchiste [Wikipedia briefing] and had strongly supported the Franco-Russian rapprochement during the 1890s/1900s [see 17th August 1892]. On the question of reparations he followed Britain's Tories [see 5th November 1918] in insisting that *le Boche payera tout*. Lloyd George complained that "his mind and heart were so stuffed with bonds that he had no room left for the humanities", and President Wilson reportedly joked about Klotz on the brain (MacMillan, 2001, p258). Klotz was less of a joke to starving Germans when he repeatedly refused to approve the lifting of the naval blockade of German ports until she handed over her remaining treasury gold as a down-payment on the reparations (Macgregor and Docherty, 2017). Loucheur, on the other hand, was less eager to weaponise civilian suffering and generally more of a dove on reparations, doing much of the advisor-advisor consultation behind the scenes, not least with the Americans. Harold Nicolson rated him as "reasonable and intelligent" and "not a politician".

Italy: Absent in a huff much of the time - see 19th April below.

Japan: TBA.

Germany: As go-between, when invited, the Max Warburg and Company (Hamburg) banker Carl Melchior [Wikipedia biography], who cannily put his finger on the central flaw in the Allied plan...

"Melchior rather surprised me by saying: 'We can get through the first two or three years, with the aid of foreign loans, or possibly of further bank note issues. By the end of that time, foreign nations will have realised that these large international payments can only be made by huge German exports, and these German exports will ruin trade in England and America, so that the creditors will come to us to request a modification'" (d'Abernon, *op. cit.*, k2867)

Within hours, the sub-committee will have bogged itself down on clashes of prior commitment, vagueness of precedent and principle in international law, and diametrically conflicting imperial agendas. Keynes will later ruefully recall as follows...

"This wise and magnanimous program for the world had passed on November 5, 1918, beyond the region of idealism and aspiration, and had become part of a solemn contract to which all the Great Powers of the world had put their signature. But it was lost, nevertheless, in the morass of Paris - the spirit of it altogether, the letter in parts ignored and in other parts distorted. The German observations on the draft Treaty of Peace were largely a comparison between the terms of this understanding, on the basis of which the German nation had agreed to lay down its arms, and the actual provisions of the document offered them for signature thereafter. The German commentators had little difficulty in showing that the draft Treaty constituted a breach of engagements and of international morality comparable with their own offense in the invasion of Belgium" (Keynes, 1919, p27).

As the French hawks keep reminding the doves, France had compensated Prussia in both 1815 and 1871 and so, this time, "Let the Germans pay what was owed, no matter how long it took and no matter how Germany was impoverished" (Watt, *op. cit.*, p488). We shall be picking up on the reparations story again on 17th February below. In the meantime, the last word in this entry goes to Margaret MacMillan, who, in her (2001) "Paris, 1919" [Amazon], notes the many forces dragging Lloyd George this way and that...

"His vacillation damaged his reputation and caused much trouble with his colleagues in Paris. 'I wish,' said Lamont, 'Mr. Lloyd George could tell us just what he really wants, so that we could determine whether his ideas, and the President's as we understand them to be, are in reality far apart or close together.' By exasperating the Americans, from Wilson down, Lloyd George was also putting at risk a relationship he considered of supreme importance. *The problem was that he was not sure himself what he, or the British public, wanted*" (pp255-256).

ELEPHANT IN THE ROOM - THE LIMITS OF "SELF-DETERMINATION": We have already drawn attention elsewhere to fundamental difficulties with the high-sounding notion of "self-determination" in previously vassal states suddenly cast loose in the world. Cliques - a.k.a. oligarchies - control states, and cliques can be bought and sold; the people - the demos part of democracy - are never honestly consulted. A vassal state's self-determination therefore becomes the self-determination of those who can afford to buy the strongest of the available cliques ...

Readers who are unfamiliar with this problem in the states of formerly Tsarist Russia should see what Leon Trotsky had to say on the matter during the Brest-Litovsk negotiations see 9th January 1918, thence as directed ESSENTIAL CONTEXT.

At Versailles, Wilson's lip-service principle was that local populations would decide their own future, UNLESS they were a native people in a far-flung corner of empire. These benighted souls would be saved from their own ignorance by being governed by a "mandated" power until such times as they grew able to govern themselves. We shall be returning to the issue of mandates in detail as the weeks progress [see 7th May below].

As for the Shantung Concession on the mainland, the Chinese are predictably infuriated to learn that the West sees them as incapable of self-determination, and fully incandescent at the suggestion that Japan be given a mandate over the 30 million not-particularly-backward Chinese who live there. If anything, indeed, they would actually prefer a continuing German presence to a Western mandate!

QUICKIE: As we saw at the time of the Boxer Rebellion two decades earlier [see 14th June 1900, thence as directed], the ailing Confucian Empire has been on the back foot to Western economic rapine since the Opium Wars [Wikipedia briefing].

That evening, China's Wellington Koo [see 15th November 1918 IMPORTANT CONTEXT] dines with President Wilson, and takes the opportunity to make an impassioned plea for a self-determining - Chinese - China, like it had been of old. After all, Koo's ancestors had been running a Civil Service Government for a thousand years at the time Wilson's ancestors were still painting their faces blue! Wilson is duly persuaded, and on 28th January Koo confronts the Japanese delegation with a spirited rebuttal of their petition in Shantung. Andelman (2008) records the incident as follows ...

"The Inquiry's view was that the North Pacific islands demanded by Japan be awarded it under a mandate with strict limits on their fortification. [...] The U.S. Navy, by contrast, wanted the islands returned to Germany [and thence to] the United States as possible payment for reparations. [...] As for Shantung and Kiaochau, the Inquiry wanted all pre-existing treaties [...] nullified, and the territories in Shantung returned to China. But [...] no time frame was suggested for this return. An interim mandate might just fit the bill. [...] A formal debate loomed over all of these fraught issues. China put up its ace debater - Wellington Koo. [...] The

**QUICKIE - ADMIRAL BRISTOL'S "BIG IDEA"**: With the benefits of hindsight, we offer the following extract from specialist historian **Giles Milton's** (2008) "Paradise Lost: Smyrna, 1922" [Amazon] as setting the tone of Bristol's actions on Washington's behalf. It is late Summer 1922, the Turkish port of **Izmir/Smyrna** has been gifted the Greeks as war booty but a Turkish column has arrived threatening to take the city back by force ...

"There was a general assumption that the American and other Allied powers would intervene if and when the Turkish cavalry decided to enter the city. People might have thought differently had they known more about the personality of the man who was directing American policy towards Smyrna. Admiral Mark Bristol [...] was a patriotic American who had always believed in placing his country's interests above any other consideration. 'I am,' he said, for the U.S., first, last, and always'. [...] He had been implacably opposed to his country taking a mandate over Armenia [...]or did he wish American investors to join forces with European and Levantine businessmen already working in Turkey. 'It is a task worthy of America to stand up for the big idea of clearing up the whole of the Ottoman Empire by once and forever destroying all European influences and concessions.' Admiral Bristol believed that the Greek occupation of Smyrna had been nothing more than a British plot to extend her sphere of influence into the richest area of Turkey. In one of his more controversial statements, he declared: 'We fought to destroy the Prussian power; we may still have to fight to destroy the British power'. [...] Admiral Bristol felt that American business interests would be best served by pursuing a resolutely pro-Turkish policy in this troubled land, caring little for the fact that the Greeks were being massacred in their thousands in and around the Black Sea port of **Trebizond** [see 2nd March 1916], Indeed, he scandalised many in Constantinople by dismissing the reports of European eyewitnesses as 'propaganda from unreliable sources' [...] and by refusing press passes was able to censor reports before they were even written" (pp234-236).

1919 [29th January] The Versailles Peace Conference [X - Reparations (Nicolson and Maps)]: [Continued from 27th January 1919] At the end of his diary entry for 29th January 1919 Foreign Office delegate Harold Nicolson [see 3rd January above] notes that the French press is beginning "to sneer" at Wilson and the Americans ...

***** DO NOT UNDERESTIMATE PRESS SNEERING *****

Wilson, in short, has been speaking out too strongly against France's mercilessly hard position on German reparations [see insets 23rd January above], and is now being systematically re-cast as villain rather than war-winning hero. In fact, both the Americans and the French have been underestimating the effects of the boundaries and borders issue on the reparations issue, as Andelman (2008) now reminds us ...

"The biggest problem faced by these specialists redrawing the maps of Poland, Czechoslovakia, and Hungary, was the presence of vast numbers of minorities within the frontiers of each of these nations - but especially the numbers of Germans who inhabited the border areas [whose rights] were scarcely a top priority for the peace delegates. But many of the Peace Conference's experts - especially Britain's Nicolson and America's Charles Seymour [see 1st January above] and Gordon Auchincloss [check him out IMPORTANT CONTEXT] believed that German minorities were a present reality that needed to be dealt with if they were not to become major forces of instability in the future" (p159).

Nicolson was indeed seriously concerned that some highly productive Germans and Austrians were being transferred - along with their lands and industries - out of Germany and Austria, and, by being turned instead into unwilling Poles, or Czechoslovaks, etc., would no longer be contributing to the German economy. The Allies would accordingly be trying to get blood out of a stone, after they had thrown the stone away [sub-thread continues at 30th January 1919]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = WW2 IN THE MAKING]

1919 [30th January] The Russian Civil War [XCI - North Russian Front (Bullitt Recommends Withdrawal)]: [Continued from 28th January 1919] On 30th January 1919 the increasingly well-informed American delegate William C. Bullitt [see 21st January above] writes Colonel House, to recommend that the Archangelsk Front be abandoned. Here is an indicative clip from the memorandum in question ...

"Withdrawal of American troops from Archangel. DEAR COL. HOUSE: The 12,000 American, British, and French troops at Archangel are no longer serving any useful purpose. Only 3000 Russians have rallied around this force. It is the attacked, not the attacker, and serves merely [...] to stimulate recruiting for the Red Army. Furthermore, the 4000 Americans, 6000 British, 2000 French, and 3000 Russian troops in this region are in considerable danger of destruction by the Bolsheviki. [...] Instead of transferring troops from Murmansk to Archangel, it seems to me that we should at once transfer to Murmansk and bring home the troops which are now at Archangel. Aside from the needless suffering which those men are enduring, aside from the demands of the public in the United States and England for the return of those men, it seems to me that the withdrawal of these troops would be of great value as a proof that we have made the Prinkipos Proposal [see 22nd January above] in full good faith. [...] It is at present possible with the aid of six ice breakers which are now at Archangel to move these troops by water to Kem [much easier across the White Sea than by land - see map] on the Murmansk Railroad, whence they may be carried by train to Murmansk" (Bullitt, op. cit., pp15-16).
Part of Bullitt's rationale here is the local White Russian government's refusal (a few hours earlier) to comply with the Prinkipos Proposal, thereby rendering them as great an obstacle to peace in his eyes as were the Bolsheviks [sub-thread continues at 1st February 1919]. The initial feeling in Paris is that the Ottomans "had behaved appallingly" toward the Armenians, and that clearly an Armenian nation should be created, "probably as a mandate of an outside power" (MacMillan, *op. cit. inf.*, p485). Just such a mandate is suggested 30th January 1919 by Lloyd George, but he did not see Britain as the natural candidate because a cost-conscious Westminster would baulk at the expenses involved (*ibid.*). America, on the other hand, might care to consider taking on the responsibility, given that she had led the earlier outcry against the above-mentioned genocide. Unfortunately, President Wilson's wish-list Fourteen Points [see 8th January 1918] lack sufficiently specific proposals for any of the Ottoman minorities wishing to secede. The matter is now deferred for a month to allow initial reports to be compiled [see 26th February below]. **FURTHER READING:** For more of the detail see Margaret MacMillan's (2001) "Paris, 1919" [Amazon] [sub-thread continues at 3rd February 1919]. Bullitt, Jr. [see 13th December 1918], takes a trip to Bern, Switzerland ...

**ASIDE:** Remember that the U.S. Embassy in Bern acted as the political intelligence hub for the whole of Europe, and was Allen Dulles's home base [see 8th April 1917 ESSENTIAL PRIOR KNOWLEDGE]. When giving his 12th September 1919 testimony to the Senate Foreign Affairs Committee [see below], Bullitt was not asked to explain the purpose of this visit, nor to state the identity of those he was visiting. We therefore presume (1) that it was either with Dulles personally or at least at his instruction, and also (2) that it was to get him teamed up with intelligence officer and aide-minder Captain Walter William Pettit. Gunsmiths immediately advise the managerial classes to ammo up, and the media rain insults down on the strike organisers, bewailing their "delirium-born rebellion". 1919 [3rd February] The Versailles Peace Conference [XII - Boundaries and Borders (Greece)]: [Continued from 30th January 1919] On 3rd February 1919 the Greek claims on the collapsed Bulgarian Kingdom and Ottoman Empire are heard. On their northern border with Bulgaria - the wartime Salonika Front (see 5th August 1915, then as threaded) - the Greeks regarded the Bulgars as little more than cattle rustlers with a charismatic peasant - Aleksandar Stamboliyski [Wikipedia biography] - for a prime minister, and demanded the provinces of Macedonia [Wikipedia briefing and map], Thrace [ditto], and Dobruja [ditto].

CAMEO - THE MEGALI IDEA "Greek = "great idea"; The Greeks were here resurrecting the Megali Idea [Wikipedia briefing] from their over-romanticised War of Independence in the early 19th Century [see 17th March 1821, thence as directed], when - like many other uppity minorities across the planet - they were persuaded by poets (Lord Byron in this case) and opportunistic politicians (1) that they had former glories (most were exaggerated bardic folk-recollections), (2) that some "other" was preventing you getting them back again, and (3) that war, death, and destruction was a fair price to pay in order to right these imagined wrongs.

KEY VOCABULARY - IRREDENTISM: Le mot juste in such matters is "irredentist", "a political and popular movement in which its members claim, reclaim (usually on behalf of their nation), and seek to occupy territory which they consider "lost" (or "unredeemed"), based on history or legend" (Wikipedia). The standard reading on nationalistically romanticised human aggression is Vamik Volkan's (2006) monograph "Killing in the Name of Identity" [Amazon ESSENTIAL READING].

For their part, the Bulgarians regarded themselves as "the spoiled child of the Balkans", who, although they had been one of the Central Powers for a while, had not been all that villainous during the war; plus, as Slavs, they hated the Turks quite as much as did the Greeks (MacMillan, 2001). On Greece's eastern frontier with Turkey - including the wartime Gallipoli Front [see 1st January 1915, then as threaded] - the disputed territories were the Dodecanese Islands [Wikipedia briefing and map], the Smyrna Strip [ditto], and perhaps - wink, wink - even Constantinople itself. Certainly, the Greeks had friends in high places at the Quai d'Orsay, thus ...

"Meanwhile, the possibility that Turkey would be thrown into the arms of the Soviets reinforced the views of Allied military officials, who believed that Lloyd George would be making a mistake in forcing the Sultan's government to sign a harsh treaty. [...] A close friend asked Lloyd George whether he still thought it wise to give Smyrna to the Greeks. 'I have no doubt about it,' replied the Prime Minister. 'You must decide whom you are going to back. The Turks nearly brought about our defeat in the war. It was a near thing. You cannot trust them and they are a decadent race. The Greeks, on the other hand, are our friends'" (Fromkin, 1989, p430).

MacMillan (2001) puts her finger on Lloyd George's thinking here ...

"The British, who for so long had propped up Ottoman Turkey now needed an alternative partner to keep the eastern end of the Mediterranean safe for their shipping. Clearly they did not want an extensive French empire there and they did not want to spend their own money if they could help it. That made Greece, a strengthened Greece, so appealing" (p458).

And so the hard-pressed cartographers duly head back to their side offices to try to agree a formula fractionally more likely to end the past war than start another (SPOILER ALERT: They fail) [sub-thread continues at next entry]. 1919 [3rd-14th February] The Versailles Peace Conference [XIII - The League of Nations Commission (First Draft)]: [Continued from preceding entry] The Commission appointed by the Supreme Council to move forward with a post-war League of Nations holds its first meeting 3rd February and just manages to cobble together a first draft document by 14th February, when President Wilson is due to return to Washington for a month. Here, from MacMillan (2001), is a summary of what was being discussed ...
“The commission's nineteen members met almost daily, in House's rooms at the Crillon, seated around a large table covered with a red cloth. Behind them sat their interpreters murmuring quietly in their ears. The British and the Americans were beside each other, consulting each other continually. The French were separated from them by the Italians. The Portuguese and the Belgians were inexhaustible; the Japanese rarely uttered. Wilson, in the chair, was brisk, discouraging speeches and discussions of details and pushing the League in the direction he wanted. [...] House, the other American representative, was always there at the president's elbow, although he rarely spoke. [...] Neither Lloyd George nor Clemenceau put himself on the commission. [...] Lloyd George, as he had done throughout his political career, chose men he trusted - in this case Smuts [see 21st January above] and Cecil [ditto] - gave them full authority and generally left them to it” (p135).

And so was set the scene for world-diplomatic toothlessness by design, thus ...

“...The main outlines of the league were in place: a general assembly for all members, a secretariat and an executive council where the Big Five would have a bare majority [...]. There would be no League army and no compulsory arbitration or disarmament. On the other hand, all League members pledged themselves to respect each other's independence and territorial boundaries. Because the Great Powers worried that the smaller powers might get together and outvote them, there was also a provision that most League decisions had to be unanimous. This was later blamed for the League's ineffectiveness. Germany was not allowed to join right away. The French were adamant on this and their allies were prepared to give way. Indeed Wilson was all for treating Germany like a convict in need of rehabilitation: "The world had a moral right to disarm Germany and to subject her to a generation of thoughtfulness"” (p139).

Little will now be achieved until Wilson returns from Washington, whereupon a further month's horse-trading is destined to take place to deliver an improved draft [see 11th April 1919 below]. And, even then, nothing can actually be dictated by the peace conference anyway, merely suggested, for everything will eventually need to be taken away for ratification by individual parliaments. No surprise, therefore, that the Swiss media had decided by as early as the second day of the proceedings that the "so-called World War" was not going to be the great peacemaker Wilson wanted it to be (Mock and Larsen, 1939) [sub-thread continues at 7th February 1919]. 1919 [Tuesday 4th February-Monday 10th March] American Purity of Essence [III - The Overman Committee Hearings (Terms of Reference Extended)]: [Continued from 21st January 1919] On 4th February 1919, sensitive to the fact that the proposed strikes in Seattle are on all the front pages, the U. S. Senate extends the remit of the Overman Committee to look into "any efforts being made to propagate in this country the principles of any party exercising or claiming to exercise any authority in Russia [or] any effort to incite the overthrow of the Government of this country".

CAMEO - HOW OUR PAPERS REPORTED IT: The problem with politicians being influenced by headlines is that in effect they have already likely dictated those headlines. They will be marking their own homework, so to speak, for newspaper editors can be prevailed upon to spin - both by commission and omission - stories favourable to the prevailing Establishment. In short, when they are not openly lying they will have been deliberately looking the wrong way. The crucial commission in Seattle's case was to frame legitimate American grievances as Bolshevik conspiracy, and the convenient omission was the fact that the guilty mill owners (and a complicit city mayor) had enlisted "thousands" of armed thugs to act as union-busters. 1. This is the title of Vamik Volkan's (2006) monograph [Amazon ESSENTIAL READING] on the nature of nationally romanticised human aggression. The point being, of course, that after four years of hell on earth in the trenches we now have Germans happily killing other Germans for not being good enough Germans!!

1919 [5th-12th February] Hugo Koehler, Secret Agent [III - The German Navy (Tour Of Inspection)]: [Continued from 18th December 1918] On 5th February 1919, having been assigned to the U.S. Navy team on the Allied Naval Armistice Commission [Wikipedia briefing], Hugo W. Koehler attends a briefing at Britain's northern anchorage at Scapa Flow and then sets sail on a fact-finding tour of German ports. Here is an extract from his 12th February report on the conditions he found at Wilhelmshaven ...

"Went ashore [at Wilhelmshaven] with the armistice commission inspection party [and] found the German ships all in a frightful state, both as regards cleanliness and preservation. They had evidently been hastily put out of commission, for there was no one whatever on board [...] and guns were already beginning to rust inside and out. [...] We also inspected the destroyers, submarines, and the aircraft station. Conditions were everywhere alike: everything unspeakably filthy, no work being done, everything going to rack and ruin" (Capelotti, op. cit. inf., p41).

And again in Hamburg 24th February ...

"Extreme bitterness toward the English seems to be lost in their greater hatred of France. They say France has only one idea of peace - to ruin Germany utterly - and the only thing that can keep France from doing this is the British sense of fair play and this latent friendship of America ... A restaurant manager asked the same question that greeted us on all sides: how soon American tourists might be expected" (p49).

We shall be returning to Koehler's tour of inspection in June (when the Imperial German Navy decides to go out with a bang) [sub-thread continues at 16th June 1919]. [THREAD = HISTORICAL CAMEOS]

***** YUGOSLAVIA SET UP FOR A CENTURY OF DISASTER *****

1919 [Friday 7th-Tuesday 18th February] The Versailles Peace Conference [XIV - Boundaries and Borders (The Serbs, Croats, and Slovenians)]: [Continued from 3rd February 1919] On 7th February 1919 Washington formally recognises the Kingdom of the Serbs, Croats, and Slovenes [see 1st December 1918 QUITE IMPORTANT], colloquially "Yugoslavia", subject to conference resolving a number of border issues, not least those between the constantly bickering component ethnicities (who cannot even agree what alphabet to use) ...

**QUICKIE:** As shown on this Wikipedia map, the major states of Yugoslavia were (from the northwest to the southeast): Slovenia, Croatia-Slavonia, and Banat (all lately Austro-Hungarian Roman Catholic), Bosnia and Herzegovina (both lately Ottoman Muslim), and Serbia and Montenegro (both Slavic, Orthodox Christian, with Cyrillic alphabet). The royal house, however, is Serbia's Karadjordjevic Dynasty [Wikipedia briefing], the ruling elite remains Serbia's ruling elite (the same people who almost certainly paid for the hit on a certain Austrian Archduke not that long previously [see 28th June 1914, and the ensuing million words]), and the capital is Serbia's Belgrade. The kingdom's head delegate in Paris is the Serbian premier Nikola Pašić [Wikipedia biography] (fondly recalled by some as "a deviant, dangerous old man who loved two things: power and Serbia" (MacMillan, op. 

Italy, however, is decidedly unimpressed at the prospect of replacing Austria-Hungary on the other side of the Adriatic with a large new kingdom, and it will not be long before they pre-empt the Peace Conference by landing troops (and a protofascist Duce to go with them) in the Croatian coastal province of Fiume/Rijeka [map]. We shall be returning to this particular flashpoint shortly [see 12th September below]. On 18th February the new kingdom's delegation is called to the conference; and even this causes friction, in that only the two delegates noted above are to speak, neither of whom are particularly fond of their Bosnian compatriots. Britain and France will await the final Versailles Treaty before recognising Yugoslavia; indeed, Washington's haste in doing so has never been explained. 1919 [9th February] The Versailles Peace Conference [XV - Formal Proceedings (The Arab Session)]: [Continued from 7th February 1919] Having been in Paris since 19th January, Prince Faisal bin Hussein finally gets the chance to put the case for an Arab Kingdom to conference on 9th February 1919. Here is Andelman (2008), updating us on the latest news from the Middle East ...

"[While waiting], the Zionists and the Arabs were far from idle. There was much lobbying to be done on multiple agendas. The Zionists were concerned with widespread reports of pogroms against Jewish communities in Poland and hostility by British forces in the Middle East to the thousands of Jews arriving in Palestine in fulfilment of the promises of the Balfour Declaration. [...] The Zionist agenda now evolving was far more ambitious than any envisioned by Balfour - including the transformation of all Palestine into a self-governing Jewish commonwealth under a British mandate, with Hebrew as the official language" (p99).

For the present, Prince Faisal simply re-confirms his earlier undertaking that Palestine would not be included in his proposed Arab Kingdom [see 3rd January above], and discussions go back behind closed doors, awaiting Chaim Weizmann's turn in the limelight on 27th February [sub-thread continues at 14th February 1919]. ***** WINSTON CHURCHILL, CAT AMONGST PIGEONS!! *****

1919 [14th-16th February] The Versailles Peace Conference [XVII - Formal Proceedings ("Churchill's Russian Suggestion")]: [Continued from preceding entry] On 14th February 1919 Britain's Secretary of State for War Winston Churchill [see 10th January above], newly arrived in Paris from London, addresses the Supreme Council. Here is Watt (1968) on what happens next ...
“The moment was surely unpropitious. Lloyd George had returned to London six days before, Orlando had gone back to Italy temporarily, and Woodrow Wilson was to leave that very evening for his hurried trip to the United States. The meeting began just before seven in the evening. No one had dined, and Wilson’s train was scheduled to leave at eight-thirty. [...] Arthur Balfour, the senior British delegate in the absence of Lloyd George, at once introduced [Churchill, who duly] announced that he wished to inform the Council of the thinking of the British Cabinet regarding Russia. The Cabinet, he said, had met only the day before and was at a loss to understand what its Russian policy should be. There were British forces in Russia, and by one means or another they had contracted obligations towards the White Russian armies [...]. The Allies had all been put into an absurd position by the Prinkipo fiasco [see 22nd January above], and he trusted that there would be no more invitations of that type. He went on to suggest that the time had come for the Council to reconsider its policy toward Russia. [...] Yet his presence in Paris was suspicious. Perhaps he had come with the permission of the British Cabinet, but had he come with Lloyd George’s full knowledge and blessings? What did he really want? There was no time for speculation. President Wilson glanced at his watch and announced that he must be off. Clemenceau observed that ‘a matter of such importance could not be settled at a short and unexpected meeting’. Wilson rose to his feet and leaned against the back of his chair. If a new Russian policy must be created, he said, he was in favour of resolving this ‘cruel dilemma’ by withdrawing all Allied forces from Russia and letting events there take their course. [...] But, Churchill asked, what about the White armies? This would be condemning them to destruction [...]. The President said that he could not help this. Everyone agreed that the only way Bolshevism in Russia could be beaten was to launch a huge invasion stiffened by Allied armies - and even this offered no guarantee of success. Anyway, not a single one of the Allies was prepared to contribute men to such an invasion. On this inconclusive note, Wilson rushed off and the Council of Ten adjourned” (pp99-92).

The meeting duly reconvenes 15th February, and this time only one of the five premiers - Clemenceau - is present, and he is happy to do some sabre-rattling ...

“The French Army’s Chief of Staff, General Henri Alby [Wikipedia biography], presented a very optimistic picture of possibilities in Russia. Allied regular forces, he claimed, could easily defeat the Reds, and it would not take too many divisions to do so. Churchill then took over and began to castigate the whole conception of the Prinkipo Conference. [...] Clemenceau said that he had always ‘been completely opposed’. Balfour allowed that he had ‘never been in favour’ [and] Sonnino announced that he had been ‘opposed to it from the commencement’. Having gone this far, the Council now found itself presented with a Churchill proposal calling for the immediate establishment of an ‘Allied Council for Russian Affairs’, whose principal task would be to draw up a plan for ‘concerted action against the Bolsheviks’. This plan, as Churchill sketched it out, was to be ‘a definite war scheme’. Everyone seemed to think this a good idea, and the Council adjourned” (p92).

But when the absent Wilson and Lloyd George are telegraphically briefed concerning these latest events, they both put their foot down very firmly ...

“Lloyd George and Wilson learned of the scheme and sent categorical instructions to their delegations that no plan for Allied military intervention was even to be considered. Wilson cabled House to make it plain that the United States was ‘not at war with Russia’ and would in no foreseeable circumstances ‘take part in military operations there against the Russians’. Lloyd George fired off a blistering telegram to Churchill charging with grossly exceeding his authority in the whole affair. Simultaneously, Balfour was instructed to withdraw all support for an armed invasion. [...] The whole interventionary scheme thus collapsed. Churchill returned to London, the French Army retired to lick its wounds, and the Russian Civil War continued” (pp92-93).

And so it came to pass that - working to the time-honoured principle that if you cannot beat someone you have to consider joining them instead - the Versailles scenery is now rapidly re-set for some hurried bridge-building with the Soviets, and an urgent call duly goes out to the already partly briefed (and personally raring to go) William C. Bullitt [last heard of on 1st February above, and back on 20th] [sub-thread continues at 17th February 1919] [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = THE NEVER-ENDED RUSSIAN CIVIL WAR, 1917-ONGOING] [THREAD = WW2 IN THE MAKING] [THREAD = THE COLD WAR IN THE MAKING]

1919 [14th February or hereabouts] The Russian Civil War [XCIII - Political and International Front (Henry Cabot Lodge Speaks Out): [Continued from 1st February 1919] On or about 14th February 1919 the Republican Party’s hawkish Chairman of the influential Senate Foreign Relations Committee, Henry Cabot Lodge [Wikipedia biography] (a man much hated by the incumbent Democrat President) makes the point in
a newspaper piece that things are going seriously wrong with the administration's strategy in North Russia. Here is how the story will be being re-told just over a decade later ...

"With the end of the war on November 11, 1918, Allied statesmen found difficulty in persuading voters at home that fighting in Russia was still necessary. Both in England and in the United States there was an outcry for the withdrawal of troops from Russia. As early as February, 1919, Senator Lodge, speaking before the United States Senate on the subject of the American forces in Northern Russia, declared that 'it is the duty of the United States to take those troops out. They are too many to be sacrificed wantonly and uselessly, and they are too few to be effective'" (Stewart, 1932, k2963-2971).

This rather pointed politicking duly gets Lodge a dinner invitation to the White House once Wilson arrives back from Paris [see 26th February below] (Watt, 1968) [sub-thread continues at 18th February 1919]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = THE NEVER-ENDED RUSSIAN CIVIL WAR, 1917-ONGOING] [THREAD = THE COLD WAR IN THE MAKING]

"The commission on [Poland's] borders had more meetings than any other" (MacMillan, 2001, p277)

1919 [14th February or hereabouts] The Versailles Peace Conference [XVIII - Political and International Front (Poland)]; [Continued from entry before last] On 14th February 1919 conference turns its attention to Point XIII of President Wilson's Fourteen Points [see 7th January 1918] (the one promising an independent Poland in order to bring together "indisputably Polish populations") ...

QUICKIE: Poland, lest it be overlooked, is one of General Tasker H. Bliss's [Wikipedia biography] "submerged nations" [see 28th June below], and, like his metaphoric mosquitoes [ditto], has been "vicious from the moment of [its] birth". For a long time, she had existed as one half of the geographically very extensive Polish-Lithuanian Commonwealth [Wikipedia briefing and map; note that the old Lithuania included much of the modern Ukraine], only to fall to Tsarist Russian intrigue during the second half of the 18th Century. Here is MacMillan (2001) explaining why, in 1914, there were therefore so many Poles and such a small Poland to fit them in ...

"The Poles of Germany, perhaps 3 million out of a total population of 56 million, shared in the prosperity of one of the most developed nations of Europe. [...] The Poles of Austria-Hungary, concentrated in Austrian Galicia, lagged far behind. Corrupt, poor, the most backward part of a decaying empire, Galicia was a byword for misery. [...] The rest of Europe's Poles, about half the total number, lived under Russian rule, the most brutal, oppressive, and incompetent of all" (p278).

And by the end of the war, things have, if anything, grown even more confused ...

"In 1919 all [Poland's] borders were in question and there were enemies everywhere: the surviving units of the German army, many of them to the east, and beyond them Russians (Bolshevik or anti-Bolshevik, none wanted an independent Poland) and other nationalists competing for the same territory: Lithuanians in the north, Ukrainians to the east, and Czechs and Slovaks to the south. And Poland had few natural defences. Between 1918 and 1920 [she] was to fight six different wars. [...] As much as 10% of Poland's wealth had been destroyed in the war. The Germans had ransacked the Polish territories during their occupation. Raw materials, manufactured goods, factories, machinery, even church bells had been fed into the German war effort" (p280).

Moreover, the Allies differed one to another for selfish reasons. France wanted a big Poland, in order to spite Germany, the United States had large Polish immigrant communities to keep happy, and Britain - well, Poland was just a long way away (although not quite far enough, come 1939).

One early Polish territorial claim is to reinstate the frontiers of 1772, but in the end even the French come down against this because it would create reversed ethnic minorities (of Germans, Byelorussians, Ukrainians, etc.). But the Polish claim for an access corridor to the Baltic at Gdansk [Wikipedia briefing] will, however, prove harder to refuse. FURTHER READING: For more of the detail see Chapter 17 Margaret MacMillan's (2001) "Paris, 1919" [Amazon] [sub-thread continues at 17th February 1919]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = THE NEVER-ENDED RUSSIAN CIVIL WAR, 1917-ONGOING] [THREAD = THE COLD WAR IN THE MAKING]

1919 [17th February] The Versailles Peace Conference [XIX - Reparations (Initial Claims)]: [Continued from 14th February 1919] On 17th February 1919 the French Minister of Industrial Reconstruction, Louis Loucheur [see 23rd January above], estimates to the French Senate that physical repairs to France's war-
devastated regions are going to cost some 75 billion Francs [- $15B, ~£4B]. Now it so happens that one of the best economists of that age - the aforementioned John Maynard Keynes [again see 23rd January above] - is attending the conference on behalf of the British Treasury, and will conclude that this is a purposely exaggerated figure. Keynes is also deeply (and increasingly loudly) concerned at Germany's ability to pay the sums being demanded. Here is historian Richard M. Watt with some useful context ...

"But there was a practical limit. The limit was Germany's capacity to pay, though nobody could agree upon what this capacity was. A series of British financial experts had tackled the problem and had come up with estimates ranging from 8000 million dollars all the way up to a fantastic 120,000 million dollars - a figure which certainly exceeded the value of the entire German national wealth, which the Americans estimated at about 75,000 million dollars. [...] The United States delegation kept pointing out that the maximum amount which could be got out of the German economy, even over a period as long as thirty years, was only a small fraction of what the French and the British (not to mention the Italians and the Belgians) were claiming. For even while the Reparations Committee was sitting, other committees were busy stripping Germany of her colonies, her overseas investments, her chemicals, her transatlantic cables, and every one of her merchant vessels of more than sixteen hundred tons; still others were taking away the Saar, Alsace-Lorraine, and the Polish provinces, and another committee was requiring Germany to pay for all the costs of the Allied occupation of the Rhineland. With all this capital investment gone, how could Germany possibly pay the fantastic reparations bills?" (Watt, 1968, pp488-499)

And MacMillan (2001) adds ...

"During the Peace Conference the French also realised that, since Britain had spent even more on the war than France, including war costs would boost the British share of whatever the Germans finally paid. The French quietly changed tack, arguing to include only direct damages - for their destroyed towns and villages, their flooded coalmines, and their torn-up railway lines. That would give France about 70% of all German payments, Britain perhaps 20%, and other claimants - Belgium, Italy, or Serbia - whatever was left. After intense bargaining, the British insisted on 30%, with the French getting 50% and the remaining 20% shared out among the smaller powers. It took until 1920 to get a final agreement on 28% for Britain and 52% for France. [...] Thanks to this] British resistance, it proved impossible to agree on a figure for the treaty. At the end of March the Allied leaders, now meeting as the Council of Four [as of 24th March 1919 the top team will be reduced to premiers only, and the Japanese will have gone home - Ed.], decided on the alternative of the special commission. The postponement, one of the American experts wrote in his diary, 'will relieve Great Britain and France from their troubles of making public the small amount they are to get from reparations because both Prime Ministers believe their government will be overthrown if the facts are known'. He was right" (p260).

Needless to say, if the Allies are going to have half a chance of collecting on such a bill, they are going to need a well-fed German workforce, both literally and politically. They also need to survive a counter-offensive by the German banks, most of whom have powerful friends (or even, in many cases, relatives) on Wall Street. The reparations issue, in short, is far from over [sub-thread continues at 18th February 1919]. 1919 [20th February-14th March] The Russian Civil War [XCIV - Political and International Front (Bullitt To Moscow)]: [Continued from 18th February 1919] On 20th February 1919, following Winston Churchill's disastrous intervention at the Quai d'Orsay six days previously (which see), and already prepped by
his briefing at the beginning of the month at the U.S. Intelligence Hub in Bern [see 1st February above]. William C. Bullitt, Jr. is instructed by Secretary of State Robert Lansing [see 6th July 1918] to prepare for a sensitive special mission to Moscow. He is immediately further briefed as to his terms of reference by both Colonel House [see 25th October 1918] and Philip Kerr [Later Lord Lothian] ([check him out ESSENTIAL BACKGROUND]) (Lloyd George's confidential secretary). Here is his account of those discussions (note how the advisors have concealed Churchill's part in collapsing any Prinkipos deal)

***** WILSON DOES HIS BIT (AT LAST) *****

"I was dining at Mr. Lloyd George's apartment to discuss Russian affairs with his secretaries, so that I had a fair idea of the point of view of everyone in Paris. [...] The idea was this: Lloyd George had gone over to London on February 9 [...] He, however, still insisted that the Prinkipos proposal must be renewed or some other peace proposal made, and I arranged a meeting between him and Col. House, which was to take place, I believe, on February 24 [...]. However, on the 19th day of the month, Mr. Clemenceau was shot, and the next day Mr. Lloyd George telephoned over from London to say that [...] this prevented renewing] the Prinkipos proposal. Therefore, it was decided that I should go at once to Russia to attempt to obtain from the Soviet Government an exact statement of the terms on which they were ready to stop fighting." (pp30-31).

Before departing [this may already have happened in Bern - Ed.], he will be teamed up with one Captain Walter William Pettit [no convenient biography], a U.S. Army intelligence officer who is occasionally mentioned in the histories as having prior experience in Russia with humanitarian aid agencies interviewing German prisoners-of-war ...

**CAMEO - CAPTAIN PETTIT'S REPORTS:** Pettit was not a State Department diplomat, and reported separately within the War Department's G-2 chain of command (presumably directly to General van Damn [see both 11th and 23rd January above above]). Bullitt presented copies of Pettit's reports to the subsequent Senate Inquiry as appendices, in order to confirm his own core testimony [see 12th September below]. The reports are interesting because they indicate the sort of detail which intelligence officers have to concern themselves with. Pettit subsequently went second author to one Caroline King Cumming [nothing known] on the (1920) book "Russian-American Relations, March 1917-March 1920" [Amazon].

While in Moscow Pettit will go about his business (whatever that might have been) and Bullitt will attend talks with Foreign Commissar Georgy Chicherin [see 4th April 1918] and, on one occasion, also with Lenin. The outcome of the discussions, which he brings back to Paris in the form of a Draft Allied-Soviet Peace Treaty dated 14th March, will be the subject of detailed front- and back-room discussion in late March and throughout April [sub-thread continues at 26th February 1919]. 1919 [5th April-2nd June] The Russian Civil War [TBA - Central and Southern Front (Hushed Up Polish Atrocities)]: [Continued from TBA] Between 5th April 1919 and 25th May 1919 American-resourced Polish troops carry out a number of (never punished, never generally publicised) antisemitic and anti-Bolshevik murderous atrocities. Here is how these events will be reported a decade later in Walter W. Liggett's (1932/2015) "The Rise of Herbert Hoover" [Amazon] ...

"It is a shameful chapter in our [= the United States] history that while food - purchased with public funds - was being withheld from the starving peoples of Germany, Austria, and Hungary, our so-called representatives in Europe - not content with feeding and financing the armies of Poland - were recklessly squandering government funds, and lavishly giving American relief and Red Cross supplies to such unprincipled military adventurers as Admiral Kolchak [see 18th November 1918 WORLD HISTORICAL], Baron Wrangel [see 3rd July 1919, then as directed REVOLUTIONARY], Denikin [ditto], Judenich [Wikipedia biography], "Butcher" Mannerheim [see 26th January 1918 REVOLUTIONARY], and Von der Goltz [ditto], the German mercenary. [...] This hideous consequence of our interference in internal affairs of Europe is almost unknown to the American people. At Pinsk [map] on April 5, 1919, Polish soldiers surrounded the People's Building where a general conference of cooperative societies was discussing plans for the distribution of flour, and shot 90 of the delegates without any trial whatsoever. Later in April several hundred Jews in Vilna [map] were slaughtered and on April 26 the Jewish quarter of Warsaw was raided by soldiers. Once more the casualties mounted into the hundreds. The Committee for Relief of Jewish War Sufferers [...] was cabled by its agents in Warsaw on May 25 that 'pogroms took place recently in [seven towns named] and other parts of Poland " (p269).
"It was the ruthless policy of rigid blockade, combined with destructive invasions that ravaged the fertile grain growing regions of the Volga valley for three successive years, which primarily was the cause of the Russian famines in 1921-1923. This took a toll of at least 5,000,000 human lives - fully as many as were saved by all the American relief agencies in Europe [...]. The following extract from a letter written by the Lithuanian National Council [...] appeared in the New York press of June 14, 1919, and gives some slight idea of the cruelties perpetrated by the Polish troops: 'Using Bolshevism as a pretext, Poland has invaded and is now occupying large parts of Lithuania. Its troops are there indulging in atrocities so horrible that the entire liberal opinion of the world stands aghast ’ (idem.)

So consistently rumoured are these atrocities that the British government commissions retired M.P. Sir Stuart Samuel [Wikipedia biography] to look into them. His report is delivered to Lord Curzon on 2nd June and in confirming the substance of the allegations still makes shocking reading. ***** IRREDENTISM, THE ONCE AND FUTURE GRIM REAPER *****

1919 [15th May and thereafter to Spring 1920] The 1919-1922 Greek-Turkish Proxy War [I - Outbreak]: [New sub-thread] On 15th May 1919, following failure of the Versailles Peace Conference to reach a mutually agreeable division of Ottoman territory between Turkey and Greece [see 3rd February 1919], the Greeks seize the Turkish mainland port of Smyrna/Izmir [map] and adjacent islands and then fan out to occupy the Western Anatolian coastal strip. The Greeks are driven in this by age-old rivalries going back to the Byzantine-Ottoman wars [see, for example, 26th September 1371], but their ambitions have recently been given a new edge by behind-the-scenes encouragement by the Versailles Supreme Powers, including Britain's Lloyd George. The Greeks, in other words, have been "bigged up" to fight an "irredentist" war,

Readers unfamiliar with Greek claims to the Smyrna Strip at the Versailles talks should see the entry at <3rd February 1919> before proceeding. Note especially that "irredentist" ambitions can easily be turned into proxy wars, as with the 2022 NATO-Russian War in the Ukraine.

KEY VOCABULARY - IRREDENTISM: Le mot juste in such matters is "irredentist", "a political and popular movement in which its members claim, reclaim (usually on behalf of their nation), and seek to occupy territory which they consider "lost" (or "unredeemed"), based on history or legend” (Wikipedia). The standard reading on nationally romanticised human aggression is Vamik Volkan's (2006) monograph "Killing in the Name of Identity" [Amazon ESSENTIAL READING].

CAMEO - THE MEGALI IDEA [Greek = "great idea"]: The Greeks were here resurrecting the Megali Idea [Wikipedia briefing] from their over-romanticised War of Independence in the early 19th Century [see 17th March 1821, thence as directed], when - like many other uppity minorities across the planet - they were persuaded by poets (Lord Byron in this case) and opportunistic politicians (1) that they had former glories (most were exaggerated bardic folk-recollections), (2) that some "other" was preventing you getting them back again, and (3) that war, death, and destruction was a fair price to pay in order to right these imagined wrongs.

Over the coming months, and then on through winter 1919/1920, repeated negotiations between the two parties are attempted and fail, while French and British occupation troops do their best not to be caught openly assisting the Greeks as they press inland. 1919 [3rd July-8th December] The Russian Civil War [The Ukrainian Front (Denikin’s Decisively Ill-Fated Moscow Offensive)]: [Continued from TBA] On 3rd July 1919 General Denikin opens an offensive northward from the White-occupied regions of north-eastern Ukraine around Kharkiv [see video animation below] and the north Caucasus, with the objective of taking Moscow and settling the White-Red issue once and for all. The Caucasus Army is commanded by the previously introduced General Vrangal [<=19th October 1918], and has - it will later be leaked - been funded to the tune of $14 million by an anonymous American automobile manufacturer looking for business opportunities [see 11th July 1928 for our guess as to who this might have been - Ed.]. The offensive is met by spirited resistance from a recently reprovisioned
Red Army and suffers a major defeat at Voronezh in October [Wikipedia briefing: arguably the tipping point in the entire Civil War - Ed.], being driven thereafter back into the Crimea and deep Ciscaucasia. Denikin will duly sack Vrangel 8th December 1919. A century later, the campaign will be neatly summarised at 0430 in this 2022 Eastory computer animation ...

1919 [16th October] The Russian Civil War [TBA - South Russian Front (The Harbord Mission to Armenia)]: [Continued from TBA] On 16th October 1919 General James Guthrie Harbord [CUNY archive] sets off "on a government vessel to Constantinople, Batum and such other places in Armenia, Russian Transcaucasia and Syria, as will enable you to carry out instructions already discussed with you. It is desired that you investigate and report on geopolitical, military, geographical, administrative, economic and other considerations involved in possible American interests and responsibilities in that region” (Office of the Historian's archive material) [sub-thread continues at TBA]. ASIDE - THE UKRAINIAN DIASPORA IN SWITZERLAND: In the 1870s Ukrainian fugitives from Tsarist tyranny, led by one Mykhailo Drahomanov [Wikipedia biography], had established a community in Geneva, Switzerland. In 1876, Drahomanov became active in the Hromada Ukrainian nationalist movement [Wikipedia briefing], publishing their propaganda sheet between 1878 and 1882, and generally lobbying for Ukrainian independence from Russia. This being at the height of the historically highly significant "Great Game" [Wikipedia briefing ESSENTIAL CONTEXT; then see 24th October 1813 for starters, and then 11th July 1867 for a specific], we presume that these anti-Tsarists were covertly supported by British and French intelligence services.

Details of the expedition may be found on the website of the International Commission of the Red Cross - check it out. RESEARCH ISSUE: It is not known how many hostile Western military intelligence agents and/or special operatives accompanied the mission, either as ancillary personnel or actually under Red Cross cover [sub-thread continues at TBA]. 1919 [19th December] Zionism After Versailles I - The Third Aliyah Begins: [New sub-thread to follow on from Zionism in WW1] The SS Ruslan arrives at Jaffa from Odessa (presently the scene of a bitter struggle between Ukrainian White Russians with support from the Western Allies, and Bolshevik Red Russians). She is bringing home a 644-strong group of "Jewish refugees from Palestine" now that the fighting against the Turks in Palestine has ceased. The voyage was authorised by the British Foreign Secretary Lord Curzon [check him out] ...

ASIDE: Curzon had only taken over as Foreign Secretary 19th October 1919 from Arthur Balfour [check him out], so it is quite possible that the decision had been made in principle before that date. However, the Laissez Passer itself was not signed until 27th November. Two earlier periods of Jewish immigration into Ottoman Palestine had taken place between 1882 and 1903 (the "First Aliyah"), and between 1904 and 1914 (the Second Aliyah"), but we have not given these their own entries.

The arrival marks the beginning of a three-year wave of migration totalling some 40,000 Russian and Eastern European Jews, many of whom were highly motivated young settlers [sub-thread continues at 9th January 1920]. 1920 [1st January] The News as State Deception [Treatises Thereon (Lippmann, 1920a)]: [Continued from TBA] American political advisor turned propaganda theorist Walter Lippmann [check him out] publishes "Liberty and the News" [Amazon], the first of two major essays this year analysing British and American press commentary concerning the world-historic events in Russia 1917-1920. We have already included a number of specific examples of his findings [see 16th April 1917, then as directed], but here are some of his more general observations ...

"From the point of view of professional journalism the reporting of the Russian Revolution is nothing short of a disaster" (p105).

"If I lie in a lawsuit [...] I can go to jail. But if I lie to a million readers in a matter involving war and peace, I can lie my head off, and, if I choose the right series of lies, be entirely irresponsible. [...] If I asserted that the Japanese secretly drank the blood of children etc.] I guarantee that most of the newspapers would print it eagerly, and that I could get a hearing in churches all over the country" (pp38-39).

"If [a reporter] is openly hostile to those in authority, he will cease to be a reporter" (p42).

"... the more cocksure [someone] is, the more certainly is he the victim of some propaganda" (p52).

"The biggest liar was the United States government itself" (p112).

1920 [9th January] Zionism After Versailles [II - Creating the Mandate (The Herbert Samuel Mission)]: [Continued from 19th December 1919] The London dailies announce that lately Home Secretary Herbert Samuel [check him out] is to lead a government mission to British-occupied Palestine to look into "questions of administration and finance" alongside General Edmund Allenby's military administration (Lloyd George, Hansard, 19th February 1922). 1920 [1st March] Zionism After Versailles [III - Creating the Mandate (Trumpeldor Killed)]: [Continued from 9th January 1920] One of the Zionist settlers in British-occupied Pre-Mandate Palestine, Joseph Trumpeldor [check him out], is killed in a fire-fight defending his settlement, thus earning himself a place in the Zionist hall of fame [sub-thread continues at 19th April 1920]. 1920 [4th April] The Russian Civil War [The Ukrainian Front (Vrangel Reinstated)]: [Continued from TBA] On 4th April 1920, having spent the winter in disgrace in the Crimea but with Denikin himself now out of favour with the Allies, General Vrangel [check him out] is put in command of what remains of the South Russian field armies in preparation for an advance into the Taurida Oblast [Wikipedia briefing/map] [the Taurida region includes not just the Crimea but also much of modern Kherson and Zaporizhia province; these latter provinces will be occupied by the Russians early in the 2022 NATO-Russian War - Ed.]. 1920 [19th-26th April] Zionism After Versailles [IV - Creating the Mandate (The San Remo Conference)]: [Continued from 1st March 1920] Held under the auspices of the Versailles Peace Conference the previous Spring [see 18th January 1919 above], key delegates get together again at San Remo, Italy, to discuss the proposed League of Nations Mandates for the future administration of the Middle Eastern territories captured from the Ottomans in 1918, that is to say, Palestine, Syria and Lebanon, and Mesopotamia. Much of the thinking has already been done, and so it now only takes a week formally to assign Syria and Lebanon to France, and Palestine and Mesopotamia to Britain. See the Wikipedia briefing for the full wording of the substantive Resolution. The conference coincides with riots by some exceptionally worried Arabs, and - as White Russian settlers heading westward into "Injun country" - the formation of the Haganah [check them out], the paramilitary Zionist self-defence force [sub-thread continues at 30th June 1920]. 1920 [23rd April through to mid-June] The 1919–1922 Greek-Turkish Proxy War [II - Change of Management in Ankara]: [Continued from 15th May 1919] Now the problem with encouraging irredentist ambitions in one country is that they will invariably impact come at the expense of that country's neighbours, who will promptly develop nationalisms of their own. In the present case the ailing Ottomans are now goaded by the Greeks into rising phoenix-like from the ashes of their empire, and on 23rd April 1920 the popular Turkish nationalist leader Mustafa Kemal Atatürk [Wikipedia biography] is elected First Speaker of the Grand National Assembly of Turkey, preaching - among other things - freedom from foreign military interference. The Greek-Turkish War thus becomes in effect a broader Turkish War of Independence [Wikipedia briefing], complete with fronts against Greece, Armenia, and the various occupying powers themselves. On 19th-26th April 1920 Prime Minister Lloyd George and the other interested parties meet at the San Remo Conference [Wikipedia briefing], but fail to define the boundaries of Syria, Palestine, and Iraq to their own satisfaction, let alone that of Ankara. On 3rd May 1920 Atatürk is elevated from First Speaker to Prime Minister, and on 27th May 1920 the Turks win their first victory, killing or capturing an entire French battalion in the hills north of Tarsus [map], in what will become known as the Karboğazi Ambush [Wikipedia briefing]. With their noses thus bloodied, on 2nd June 1920 French occupation forces start to fall back in the face of increasingly belligerent Turkish [Atatürk, it will be remembered, had been a highly successful field commander during the 1915 Gallipoli Campaign, and easily had the measure of the new invasion - Ed.]. 1920 [24th April-18th October] The Russian Civil War [TBA - Central and Southern Front (Polish-Soviet War): [Continued from TBA] On 24th April 1920, following months of partisan support for the Latvian and other White Russian contingents to their east, and openly encouraged by western diplomats backing the Whites against the Bolsheviks (the entire Russian Civil War is a western proxy war, remember), the Poles launch a major military offensive eastward into Belarus and northern Ukraine, with the intention of capturing Kyiv/Kiev [map] and securing the nearby oblasts. The city duly falls 7th May 1920 [Wikipedia briefing]. A week later, however, the Red Army begins a counteroffensive and by mid-July is threatening Brest-Litovsk [map] on the road to Warsaw. A French diplomatic delegation arrives in Warsaw but brings no troops, and by 13th August the Red Army makes its move westward, only to suffer what Lenin will describe as an "enormous" defeat. A ceasefire will then be agreed on 18th October 1920, to be consolidated into the Treaty of Riga [Wikipedia briefing] on 18th March 1921 [sub-thread continues at TBA]. 1920 [6th June-3rd November] The Russian Civil War [The Ukrainian Front (Vrangel's Taurida Offensive)]: [Continued from TBA] On 6th June 1920 the recently reinstated General Vrangel begins his offensive northward out of the Crimea, presently the last stronghold of the White Armies in the south. They quickly fan out into the Taurida Oblast, with one force heading north-westward into Kherson Province and another heading north-eastward past Melitopol [map] toward Zaporizhia Province. There will follow several weeks of initial victories, culminating in a crossing of the Dnieper River at Kakhovka [map] on 7th August 1920 ...

ASIDE: This is the location of the modern Nova Kakhovka Dam [Wikipedia briefing], as regularly featured during 2022 in reports from the NATO-Russian War.

By October, however, the Red Army will have assembled a much larger counterattacking force, and the Whites are easily driven back into the Crimea, from where in due course many will be shipped
out to bolster the Ukrainian diaspora in the West. The campaign is neatly summarised at 0530-0540 in this 2022 Eastory computer animation...

1920 [10th/19th August] The 1919-1922 Greek-Turkish Proxy War [IV - The Treaty of Sèvres]: [Continued from 23rd June 1920] On 10th August 1920, after 18 months of negotiations subsidiary to those at Versailles [see 18th January 1919 above], Turkish and Allied representatives sign the Treaty of Sèvres [Wikipedia briefing], under the terms of which large swathes of the ancestral Ottoman Empire are parcelled out to selected (and long-covetous) conquerors. France receives Syria and Lebanon, Britain Iraq and Palestine, Greece Smyrna, and Italy the Dodecanese Islands. Armenia is confirmed as an independent nation (although the ethnic Kurds do not get an independent Kurdistan) and recovers regions taken away from it by the Treaty of Batum [see 11th May 1918], and the Arabs are established as the Kingdom of Hejaz [Wikipedia briefing; roughly modern Saudi Arabia] under King Hussein bin Ali [Wikipedia biography]. 1920 [24th September-4th December] The 1919-1922 Greek-Turkish Proxy War [V - The Armenian Diversion]: [Continued from 10th August 1920] On 24th September 1920, following their rejection of the recognition of Armenia as an independent nation by the Treaty of Sèvres [upthread] and facing hostile manoeuvring by the British out of Persia and the Soviets north of the Caucasus), the Turks set out to secure that region by force of arms ...

Readers unfamiliar with Armenia's part not just in WW1 but at the Versailles Peace Conference should CAREFULLY STUDY the entry at <30th January 1919>, noting especially the links to the earlier <Armenian Genocide> and the oil war in Persia. For more specifically on the Great Game as it played out in Baku start at <27th January 1918> and follow the <Middle Eastern Campaigns> sub-thread, noting especially the <Dunsterforce> entries.

As usual, there is a lot more going on here than meets the eye, for Armenia has been a pawn in the Great Game since the Crimean War. The Armenians were, in short, an independently-minded mountain tribalism unlucky enough to be surrounded by (presently) no less that FIVE imperially-minded global powers [Wales, by contrast, has only one - Ed.], namely (1) the French, as Ottoman occupying power, (2) the Americans, flexing their interventionist muscles after Versailles, (3) the British, with
ambitions in Iraq and Persia, (4) the Turks, eager to get back some of their Ottoman influence, and (5) whoever should win out of the White Russians and the Bolsheviks. And accordingly, any power (or alliance of powers) wishing to make trouble for any other power (or alliance of powers), simply spoke up for the Armenians [remember what we had to say about Irredentism up-thread - Ed.], thus ...

**CAMEO - WHITEHALL LEAVES GRUBBY FINGERPRINTS:** We promised in an earlier entry [see 28th January 1919] that we should be having more to say about Sir Alfred ["Toby"] Rawlinson, and now is very much the time. Rawlinson, from a prominent military family, joined Britain's Intelligence Corps in February 1918 and is presently assigned to Tiflis in the (oil-rich) Transcaucasus [Wikipedia briefing], overseeing the Ottoman demobilisation and doing his best to guard the Tiflis-Baku Railway [this is all dealt with in the Dunsterforce threading mentioned above - Ed.]. These areas had, of course, been Tsarist before WW1, and had moreover been the scene of intense anti-Bolshevik intriguing since the early days of the Russian Civil War [see 15th November and 22nd December 1917 for starters]. Rawlinson's 1923 memoirs of his 1918-1922 assignment have recently been republished as Rich (op. cit. inf.) and helpfully summarise his contribution as follows (a long passage, heavily abridged; note - for the umpteenth time - the close cooperation between anti-Bolshevik intelligence operations and America's never-entirely-humanitarian relief operations) ...

"The Advanced Headquarters of the British forces was at this time [= Spring 1920] in Tiflis, and the Intelligence Branch occupied a good house in the upper and residential quarter of the town. Here I was allotted a room and reported to my immediate chief, General [William Henry] Beach [Wikipedia biography], who was in charge of the Intelligence Branch [...]. It appeared that my immediate duty would be to go to whatever districts were most interesting [...] and to report what was going on. [...] The first point upon which it was desired to acquire reliable information was the actual state of affairs existing on the frontier between the new Socialist Republic of Georgia [Wikipedia map and briefing] and its neighbour on the east, the new Tartar Republic of Azerbaijan [Wikipedia map and briefing]. [...+ details of the resulting expedition +++] The Georgians are a type quite by themselves. [...+ details of local contacts +++] It was here that I first had an opportunity of judging [the work of] the great American organisation of Near East relief. Ships arrived at the port of [Batumi]Batoum [map] with supplies of food [destined for] the famine-stricken districts of Kars and [Y]Erivan [Wikipedia briefing and map]. [...] My next expedition was more interesting than the last, as rumours had been reaching us of the actions of some of General Deniken's Volunteer Russian Army [see the entries for 2nd and 16th January 1919], portions of which were at this time operating on the northern slopes of the Caucasus, far from their headquarters, and were reported as not being under effective control. [+++ details of the resulting expedition +++] [Next] I received a cable [...] instructing me to proceed at once to Kars, on the Turco-Russian frontier, about 170 miles south-west of Tiflis, to examine and report by wire as to the situation there, as the Turks were thought to be about to give trouble. [...] We reached Alexandropol (known to the Turks as Gumri) [map] [at] the junction of the line passing through [Y]Erivan to Persia, with the military strategical line which goes through Kars to Sarikamish, the old Russian military camp on the Turco-Russian frontier. [...] One hundred miles south of Alexandropol is Mount Ararat [...] Immediately north of Mount Ararat lies the old Russian province of [Y]Erivan, at that time known as the New Armenian Republic, which is bounded on the south by Persia, and on the east, north, and west by Azerbaijan, Georgia, and Kars, all three old Russian provinces, of which the two first declared themselves to be independent republics after the Bolshevik revolution in Russia" (k2532-2766).

Unsurprisingly, there had been skirmishing in these politically highly charged border areas since as early as June 1920, but the main Turkish advance does not begin until 24th September, when, under the command of General Kâzim Karabekir [Wikipedia biography] their XV Corps moves against Kars [see 23rd April 1918]. The Armenians promptly call for Western and Bolshevik support but their appeal to the West falls upon suddenly deaf ears, and the appeal to the East finds Moscow with more than enough on its plate already with its campaign against the Whites in the Ukraine [see the interwoven Russian Civil War thread]. The campaign goes well for the Turks. Kars is abandoned to them 24th-30th October 1920, followed by Gyumri/Alexandropol a week later. The situation then becomes more complicated on the night of 28th-29th November 1920 when Anatoly Gekker's [Wikipedia biography] Soviet Eleventh Army crosses into Armenia and declares the Armenian Soviet Socialist Republic [Wikipedia briefing]. One Boris Legran [Wikipedia biography] is appointed to administer the region. This is followed on 2nd December 1920 by the now-Sovietised Armenians conceding military defeat to the Turks in the west of their territory and signing the Treaty of Alexandropol [Wikipedia briefing], The Red Army then enters [Y]Erivan on 4th December 1920. **FURTHER READING:** For more on Rawlinson's Tiflis-Baku machinations see Paul Rich's (2012) re-editing of Rawlinson's (1923) memoir "Adventures in the Near East" [Amazon ALWAYS INTERESTING, SOMETIMES REVELATORY]. 1920 [25th October-18th November] **The 1919-1922 Greek-Turkish Proxy War [VII - Greek Political Upheaval]:** [Continued from 15th October 1920] On 25th October 1920 King Alexander of Greece [Wikipedia biography] dies of accidental blood poisoning. This event re-kindles animosity between supporters of the pro-German exiled ex-King Constantine [see 30th August 1916, then as directed] and the pro-Allies ruling Greek Liberals under Eleftherios Venizelos [ditto], ushering in the concluding chapter of what is now known to historians as the "National Schism" [Wikipedia briefing]. The renewed confrontation coincides with elections already scheduled for 1st November, and a groundswell of pro-Royalist sentiment sees Venizelos duly dismissed from the premiership, to be replaced by one Dimitrios Gounaris [Wikipedia biography]. Milton (op. cit. inf.) explains the impact of these events this way ...

"Mid-morning on Monday, 15 November 1920, Lloyd George was handed a telegram that brought the worst possible news. The unthinkable had happened - a political earthquake so unexpected that the implications had not yet been fully understood. In the previous day's Greek general election, Venizelos had been trounced at the polls. [...] King Constantine, living in exile since 1917, had become the rallying cry for the opposition [...] and much to the surprise of the opposition, their election strategy struck a chord with the electorate. [...] Chivers Davis [no convenient biography] was one of the first to realise the scale and consequences of the defeat. [...] Greece was dependant on Britain to guarantee its empire in Anatolia, but Britain was unlikely to continue supplying Greece with arms and loans once King Constantine, a reviled figure in England, returned to claim his throne" (pp184-185).

Unfortunately, with the Turks rapidly rediscovering their assertiveness [see items VI and VIII in thread], it was - as we shall be seeing - a particularly bad time for the Greeks to fall out of step with their Versailles sponsors. **FURTHER READING:** Suggestions for further reading will be given at end-of-thread [sub-thread continues at 9th January 1921]. 1920 [19th November and over winter] **The Russian Civil War [The Ukrainian Front (Vrangel Evacuated To Constantinople)]:** [Continued from 6th June 1920] On 19th November 1920 the ships carrying the remnants of General Vrangel's White Russian Army - freshly evacuated from Sevastopol and other Crimean ports following its trouncing by the Red Army - start to arrive in Constantinople, the Allied-occupied capital of the defeated Ottoman Empire. From here they will be distributed to emergency transit camps in that general region. While in Constantinople they are, it will later be remarked, "unwelcome guests in a hungry city under Inter-Allied occupation" (Stewart, op. cit. inf., k6257). The White Russian Navy - thirty vessels and some 6000 crew - has escorted the transports, and will now be sent on to the French port at Bizerta, Tunisia [map], a thousand miles to the west. Their numbers include a certain "young lieutenant", thus ...

**CAMEO - "ONE YOUNG LIEUTENANT":** Stewart adds the following clearly-purposefully-anonymised [and not, as far as we have yet been able to establish, independently confirmed - Ed.] tale ...

**Readers unfamiliar with the Allied Intervention in Northern Russia, 1919-1920 will get a feel for the campaign by skimming the entry for <26th February 1919> (then as directed) before proceeding.**

"One young lieutenant who had formerly been in Archangel, where he had formed a guerrilla fleet of armed motor boats, made his way to the United States and later to a Latin American country. During a revolution he was commissioned to arm motor boats, and with their help the revolutionists won the war. ..."
The government thereupon offered him a position as admiral of the navy and Minister of Marine! He later secured a position as chief engineer of their wharves and docks and hired some half dozen of his old friends of the Naval Academy at Petrograd as assistants" (k6323).

Stewart is here clearly referring to the picaresque exploits (on the North Russian Front) of the Lake Onega Flotilla, a makeshift collection of cutters and chasers in the middle of frozen nowhere [map] commanded from Archangelsk by General Sir Charles Maynard and in the field [i.e., on the lake] by Robert Woodward Curteis, RNR [no convenient biography but several online mentions]. However, it is not clear whether the "young lieutenant" in question was from the British, American, or White Russian contingents in said campaign, and the Americans were pulled out after only a couple of weeks. The Imperial War Museum has placed some explanatory old newsreel online - view it here (last five mins) FASCINATING STUFF.

1921 [9th January-16th March] The 1919-1922 Greek-Turkish Proxy War [VIII - The Turkish Winter Offensive]: [Continued from 25th October 1920] On 9th January 1921 the Greeks are defeated in their first major engagement with the Turks in the Battle of İnönü [Wikipedia briefing], and realise that they have bitten off more than they can chew. ***** CHURCHILL SPEAKS FINE WORDS *****

1921 [12th-22nd March] Zionism After Versailles [VI - Finding Neighbours To Fall Out With (The Cairo Conference)]: [Continued from 30th June 1920] Between 12th and 22nd March 1921 British colonial administrators gather at Cairo’s (original) Semiramis Hotel [Library of Congress image] to discuss the military and political way forward in the occupied provinces of Palestine and Mesopotamia. Among those in attendance are [in alphabetical order] High Commissioner for Egypt General Allenby, Baghdad-based intelligence officer Gertrude Bell (check her out), Colonial Secretary (in only his second month in the post) Winston Churchill, High Commissioner for Mesopotamia Sir Percy Cox [Wikipedia biography], Colonial Office special advisor T. E. Lawrence ["of Arabia"] [see Timeline 30th September 1918], High Commissioner for Occupied Palestine Sir Herbert Samuel [check him out], and Chief of the Air Staff Hugh Trenchard [Wikipedia biography]. Here are a few words of background ...

"Lawrence still clung to the vision of a free Arab Middle Eastern Dominion voluntarily joining the British Commonwealth as an equal partner [, writing] in 1919 that 'My own ambition is that the Arabs should be our first brown dominion, and not out last brown colony'. Churchill's strategy, which was aimed at putting down
native revolt, suggested that Britain would rule her Arab subjects by coercion rather than consent. [...] Thus the Cairo conference [...] brought into sharp contrast the policies pursued by Churchill and those advocated by Allenby: Churchill was planning to hold the line against Arab nationalism and Allenby was not [wanting] to give Egypt a measure of independence by bringing the British protectorate in Egypt to an end" (Fromkin, 1989, pp501-502).

The conference agrees on four complementary objectives, as follows: (1) to make Prince Faisal bin Hussein [see 3rd and 19th January, and 9th February, 1919 above] [to whom many promises had been made during the fight against the Turks] king in a newly delineated Iraq [doubts remain for some time whether this should or should not include Kurdistan in the north of the region - Ed.], (2) to keep the costs down by using airplanes and armoured cars instead of large monolithic garrisons, (3) to make (Faisal's brother) Prince Abdullah bin Hussein [Wikipedia biography] emir of a newly delineated Transjordan, and (4) to keep the Saudi tribes on side by raising their "subsidy" to £100,000 a year. On 30th March Churchill tries to reassure the Palestinian Arabs in the following terms ...

"It is manifestly right that the scattered Jews should have a national centre and a national home to be re-united and where else but in Palestine with which for 3000 years they have been intimately and profoundly associated? We think it will be good for the world, good for the Jews, good for the British Empire, but also good for the Arabs who dwell in Palestine and we intend it to be so ... they shall share in the benefits and progress of Zionism" (ibid., p519).

Churchill will summarise the Cairo proceedings in the House of Commons later in the year [see 14th June below], and then lead the decisive Colonial Debate in Parliament a year later [see 1st July 1922 below].

With their eastern frontier thereby fairly secure, the Turks are now free to begin an 18-month-offensive against the Greeks in the west, progressively rolling back both them and the French occupation garrisons. **FURTHER READING:** Suggestions for further reading will be given at end-of-thread [sub-thread continues at 20th October 1921]. 1921 [17th April and ensuing months] **The Russian Civil War [The Ukrainian Front (The 1921 Ukrainian Diaspora)]:** [Continued from 19th November 1920] On 17th April 1921 the French government issues "a strong statement" to the effect that they no longer want a White Russian Army-in-Exile on Turkish soil. Over the coming months, several tens of thousands [at least 40,000 - Ed.] Of vehemently anti-Bolshevik White Russians will be re-homed across Europe and in the United States., thus creating a vocal and highly influential Ukrainian diaspora, complete with extensive family contacts into Soviet Russia.

However, much more is at stake than simply feeding a few starving peasants, as one contemporary commentator now explains (a long extract, heavily abridged) ...

Readers unfamiliar with <Admiral Mark Bristol>'s South Russian Intervention in direct military support for the White Russians in the Ukraine MUST see the entry for <28th January 1919> before proceeding.

"It was apparent by February 1921 that Russia was facing one of the worst famines in all history. The Quakers, Jewish Joint Distribution Committee, and Russian Red Cross were broadcasting frantic appeals, and Dr. Nansen, making public addresses in all the capitals of Europe, raised nearly $6,000,000 in less than five months. In Great Britain, where the situation was well known, thanks to the publicity of the British Friends and Dr. Nansen's efforts, the press was sympathetic to Russian relief, but in the United States, unfortunately, the daily papers practically ignored the famine. This was why [various names] personally appealed to Hoover to at least make a statement calling attention to the situation so that private agencies would have a fair chance of raising relief. At that time Mr. Hoover was so thoroughly established in the public mind as 'The Great Humanitarian' that it was almost impossible to consider substantial charitable donations without his endorsement. Month after month went by [...] but Mr. Hoover did not make the desired statement. Instead, assertions were traced to some of his aides which subtly discouraged the raising of relief. Hoover himself - ignoring the blockade which he had helped to impose - invariably attributed the misfortune to a breakdown of industry brought about by Socialism. [...] When June arrived, the world began to have some realisation of the horrible situation in Russia. A population of nearly 355000000 [sic - possibly a typo for 35,000,000 - Ed.] in the famine regions was threatened with extinction. Whole villages were being wiped out and hordes of hungry, diseased refugees were flocking into the cities, which also were short of food. [...] Then, in July 1921. Patriarch Tikhon [...] and Maxim Gorky, the famous novelist, addressed separate appeals for help which were spread around the world. [...] Hoover, on July 23, cabled Gorky as follows:

'I have read with great feeling your appeal to Americans for charitable assistance to the starving and sick people of Russia, more particularly the children. To the whole American people the absolute sine qua non of any assistance must be the immediate release of the Americans now held prisoners in Russia and adequate provision for administration. Once these steps have been taken, the American Relief Administration, a purely voluntary association and an entirely unofficial organisation of which I am chairman, together with other cooperating charitable American organisations [...], have funds in hand by which assistance for the children and for the sick could be undertaken immediately. [...] However, for obvious administrative reasons it has been and is compelled to stipulate for certain undertakings [...] namely that the Moscow Soviet should [agree]: -

(A) That there is need of our assistance.
That American representatives of the Relief Administration shall be given full liberty to come and go and move about Russia.

That these members shall be allowed to organise the necessary local committees and local assistance free from governmental interference.

That they shall be given free transportation, storage and handling of imported supplies with priority over other traffic [as well as] necessary buildings and equipment and fuel free of charge.

That in addition to the imported food, clothing, and medicines the children and the sick shall be given the same rations of such local supplies as are given to the rest of the population.

That the Relief Administration must have the assurance of non-interference of the government with the liberty of all of its members.

On its side, the Relief Administration is prepared as usual to make a free and frank undertaking: First, that it will [operate] without regard to race, creed, or social status. Second, that its representatives and assistants in Russia will engage in no political activities. I desire to repeat that these conditions are in no sense extraordinary, but are identical with those laid down and readily accepted by the twenty-three other governments in whose territories we have operated.

On July 31 the Soviet government formally accepted Hoover's conditions. On August 10 Walter Lyman Brown, director for Europe, assisted by [three further names], respectively heads of the German, Polish, and Baltic branches of the ARA, met in Riga with Maxim Litvinov, assistant Soviet Commissar of Foreign Affairs, to work out details for the operations in Russia. After ten days of discussion, an agreement was signed on August 20, which incorporated all the conditions set forth in Hoover's cablegram of July 23. [...] The first kitchen was opened in Petrograd on September 7” (Liggett, op. cit. inf., pp277-280).

!!!!! ANTISEMITISM ALERT - INSENSITIVE PROFILING IN 1921 !!!!!

A LITTLE BACKGROUND: In his (1989) "A Peace to End All Peace" [Amazon], academic historian David Fromkin explains the problem as follows ...
"In 1917-1918, when General Allenby took Palestine away from the Turks, he established a British military administration for the country. Ever since then, throughout the military administration, there had run a strong streak of resentment at having been burdened by London with an unpopular and difficult-to-achieve policy: the creation of a Jewish homeland in Palestine pursuant to the Balfour Declaration. [...] Some British officers serving in Palestine were unsympathetic to Zionism even in [a] limited sense, and sided with the Arabs, who opposed it altogether. As they saw it, London's policy of Zionism [...] must have been devised by far-off officials who did not have to live with and deal with local conditions" (op. cit., p445).

"[Colonial Secretary Winston Churchill] gloomily estimated that 90 percent of the British Army in Palestine was arrayed against the Balfour Declaration policy. [Congreve] sent a circular to all troops stating that, while 'the Army officially is supposed to have no politics,' it did have sympathies, and 'in the case of Palestine these sympathies are rather obviously with the Arabs [as] victims of an unjust policy forced upon them by the British government'. [...] Congreve expressed confidence that 'The British government would never give any support to the more grasping policy of the Zionist Extremist, which aims at the establishment of a Jewish Palestine in which Arabs would be merely tolerated'. In passing the circular on to Churchill, [his aide] John Shuckburgh noted 'It is unfortunately the case that the army in Palestine is largely anti-Zionist and will probably remain so whatever may be said to it'" (ibid., p524).

1922 [24th July] Zionism After Versailles: [XIV - Creating the Mandate (The League of Nations Mandate)]: [Continued from 1st July 1922] After three years under negotiation the League of Nations finally approves the Palestinian Mandate [Wikipedia briefing; full text online courtesy of the Yale Law School] as a way of delivering upon the promises made to Zionists in the 1917 Balfour Declaration [see 2nd November 1917]. The new governance structures will apply fully with effect from 29th September 1923. In his (2020)
"The Hundred Years' War on Palestine" [Amazon] academic historian Rashid Khalidi notes as follows ...

"In the third paragraph of the Mandate's preamble, the Jewish people, and only the Jewish people, are described as having a historic connection to Palestine. In the eyes of the drafters [see inset below - Ed.], the entire two-thousand-year-old built environment of the country [...] belonged to no people at all, or only to amorphous religious groups. There were people there, certainly, but they had no history or collective existence, and could therefore be ignored. The roots of what the Israeli sociologist Baruch Kimmerling [Wikipedia biography] called the 'politicide' of the Palestinian people are on full display in the Mandate's preamble. The surest way to eradicate a people's right to their land is to deny their historical connection to it. Nowhere in the subsequent twenty-eight articles of the Mandate is there any reference to the Palestinians as a people with national or political rights. Indeed, as in the Balfour Declaration, the words 'Arab' and 'Palestinian' do not appear. [...] On the other hand, the Mandate laid out the key means for establishing and expanding the national home for the Jewish people, which, according to its drafters, the Zionist movement was not creating, but 'reconstituting'" (p34).

ASIDE - "THE DRAFTERS": As it happens, the "drafters" referred to above, were (or, more precisely, the drafter was) none other than our old friend Lord Milner [check him out], for it was he who coordinated the long and tiresome process of guiding and re-guiding draft wordings for comment (Sanders, 1983). Indeed the Balfour Declaration ought by rights to be known as the "Milner Declaration", thus ...

"By the middle of August [1917], Milner evidently had concluded that the Balfour draft declaration, based so closely as it was on [Nahum Sokolow's [check him out and see Timeline 1st June 1917]] document, was a bit too strongly Zionist. He therefore drew up a proposed declaration that [...] hedged the language in some significant places" (op. cit., pp574-575).

"... Milner was the actual draftsman and was, apparently, its chief supporter in the War Cabinet. This fact was not made public until 21 July 1937 [...] by [William Ormsby-Gore [check him out]], speaking for the government in Commons []. Milner had referred to this fact in a typically indirect and modest fashion in the House of Lords on 27 June 1923, when he said, "I was a party to the Balfour Declaration" (Quigley, 1949, p169).

"What happened over the two weeks that followed must surely rank as one of the most compelling human dramas of the twentieth century. Innocent civilians - men, women, and children from scores of different nationalities - were caught in a humanitarian disaster on a scale that the world had never before seen. The entire population of the city became the victim of a reckless foreign policy that had gone hopelessly, disastrously wrong. The American consul, George Horton [Wikipedia biography], witnessed scenes of such horror that he would carry them with him to the grave. 'One of the keenest impressions which I brought away from Smyrna,' he wrote, 'was a feeling of shame that I belonged to the human race.' [...] Smyrna's hundreds of thousands of refugees clung to the hope that the Western governments who had done so much to precipitate the crisis would now come to their rescue. But those governments displayed a shocking callousness towards their own nationals, choosing to abandon the refugees to their fate in order not to jeopardise the chance of striking rich deals with the newly victorious Turkish regime" (p5).

The rescue operation - now into its second night - had continued throughout the small hours, yet the quayside was still densely packed with people. [...] Admiral Mark Bristol reckoned that there were less than a third of a million [...] others suggested] as many as half a million [...]. [+++ many eyewitness statements +++] For many, survival was a combination of quick thinking and good luck. This was certainly the case for Aristotle Onassis [check him out], the eighteen-year-old son of Socrates Onassis, one of Smyrna's wealthiest merchants. [+++ the Onassis story in detail +++] Kemal was planning his next move with great care. The British were utterly opposed to withdrawing their forces from the neutral zone around Constantinople. [...] But when the Allied governments were asked to send troops too, there was a lukewarm response. And when British ministers appealed to the empire for help, they were met with a wall of silence. [...] Knowing that Lloyd George was becoming increasingly isolated, Kemal held several secret meetings with representatives of Britain's allies. [...] Kemal had neither the desire nor the inclination to fight for Constantinople [...] merely 'to isolate the British'. [...] On the following day, the Turkish high command issued a decree, informing all of Bournabat's surviving Greek families that they were free to return to their homes. [+++ more eye-witness accounts +++] While the Turkish generals plotted their next move, [an Armenian physician named] Hatcherian had temporarily managed to escape from the quayside [and locate his family]. [...] He and a friend disguised themselves as Turks and set off through the smouldering city [...] eventually being] stopped at gunpoint by a Turkish soldier. He quizzed them about their nationality and - not believing their claim to be Turkish - arrested them [...]. For the next twelve hours, they were held in a crowded room along with forty other prisoners."

Readers unfamiliar with the ill-feeling between Armenians and Turks at this point in time should see the entries for <23rd April 1918> and <30th January 1919>, then as directed, before proceeding.

Readers unfamiliar with the use of more or less fabricated atrocity stories to maintain a population's war fervour should work their way through the eight entries in the <Atrocity> thread, starting at <5th August 1914>.

The lurid recollections in an American publication of an American camp-follower of Armenian extraction (and with probable anti-Soviet political leanings) are therefore not the most compelling testimony when the alleged perpetrators of the atrocities are the Armenians' old enemy, the Turks.

"[...] Every few minutes, more prisoners were led into the room, which was soon packed and claustrophobic. As darkness fell, a new horror emerged. 'After midnight ... my attention is drawn to the begging voice of a woman coming from the floor below,' wrote Hatcherian. 'Her voice is mixed with the threatening voice of a Turkish soldier and the plaintive screaming of a three to four year old. The woman, whose voice sounds young, implores the soldier to spare her honour.' Her pleas went unanswered. She was repeatedly raped - at least twelve times - before dawn. [more in like vein] Senior American officials spent the weekend trying to persuade the Greek government to send a fleet of vessels to rescue the crowds on the quayside before it was too late. But
the Greeks would only agree to this if the safety of their ships would be guaranteed by the Turks. Such an assurance was not forthcoming. [...] Bristol himself was coming under increasing pressure to send more vessels to Smyrna in order to speed up the humanitarian relief effort, yet he remained extremely reluctant to get involved, fearing that it would jeopardise American interests and potential future oil deals. [...] Although no American vessels pulled into the Bay of Smyrna that weekend, a few other ships made an appearance. Among them was a little freighter called the Dotch [no convenient shipography], which arrived on Sunday [17th September] with a delivery of food and supplies for the American Relief Committee. This had been established, against all the odds, at the farthest end of the quayside. On board the Dotch was an American doctor named Esther Lovejoy [check her out AN INTERESTING LADY], who had volunteered to come to Smyrna in order to help with the relief effort. She had visited the city once before, in 1904, and had fond memories of its Edwardian charm. Now a rather different sight greeted her eyes. 'The destruction was complete,' she wrote. 'The ruin somehow reminded me of trees I had seen in Belleau Wood [...] with all the branches shot away." ...

ASIDE: The Battle of Belleau Wood is dealt with in the entry for 27th May 1918, which see. The wood is nowadays an open air museum, looking down on the Aisne-Marne American Cemetery [been there - Ed.]. We presume that Lovejoy - one of a number of American women physicians embedded with the A.E.F. - was either supporting the medical services during the battle or else toured the battlefield shortly after the fighting there.

"Lovejoy estimated that there were still 300,000 refugees on the quayside, all of whom were in a terrible condition. 'The people squatting on that quay were filthy,' she wrote. 'They had no means of keeping clean. They dared not go back into the ruins of the city for any purpose lest they lost their lives. [...] When the crowd stirred, the stench was beyond belief'. Lovejoy realised the absolute urgency of getting these people off the quayside. [...] Although she could not do it by herself, she knew that there was someone on hand to help" (pp338-351).

Readers unfamiliar with the AEF’s use of the YMCA and the Red Cross as cover organisations for field intelligence agents should see the entry for <Boris Pash> before proceeding. Note especially the RESEARCH ISSUE therein.

The person Lovejoy has in mind is fellow American aid worker Asa Jennings [check him out], a YMCA employee who had worked for that organisation "in several foreign countries" (p352), and was presently "Chairman of the American Relief Committee in Mytilene [man]" (p358). Here is Milton with the combined Lovejoy-Jennings story (another long passage, heavily abridged)...

"Asa Jennings [...] was, according to most accounts, a shy and unprepossessing individual. Scarcely five feet tall and diminutive of build, he wore large glasses and had an uncommonly large mouth. When he smiled, he looked like a frog. [...] Now forty-five years of age, he had come to Smyrna with his wife and two sons in order to take up his appointment as Boys’ Works Secretary [for the YMCA - Ed.]. He had been in the job for only a few weeks when he found himself caught up in a crisis of unprecedented proportions. When the killings began [...] he hoisted the American flag over the two properties that he had appropriated and told the marines on shore to bring pregnant women and orphaned children into his care. Within hours, he had more than 1000 [...]. [+++ details of his exploits +++] Jennings next approached the Turkish authorities and - after introducing himself as head of the American Relief Operation - told them of what he intended to do. The Turks [...] granted him permission to take away women and children, but [not] men of military age. [+++ details of the subsequent evacuations +++] While Jennings had been arranging the fleet of rescue ships, Esther Lovejoy had been trying to work out how to get all the refugees away from Smyrna. The logistics were frightening. More than a third of a million people needed to be evacuated in the space of six days. [...] The sight of Asa Jennings’ fleet sailing into the harbour triggered a mixture of exhilaration and dread among the refugees. There was elation at the thought that they might finally be rescued, but absolute terror that they might be left behind. [...] The description of that frantic rush to reach the ships is beyond the possibility of language,’ wrote Lovejoy. [...] [+++ more of witness Hatcherian’s story +++] [+++ the coup in Greece +++] Jennings was deeply concerned when he was brought news of the revolution in Athens [...] but the new regime gave him their unstinting support [...] By the end of Tuesday evening [= 26th September], Jennings had managed to spirit away another 43,000 souls. [...] By nightfall on 27 September, the number of refugees who had fallen to below 200,000. Just two days later, less than half that number remained. Esther Lovejoy embarked on USS Litchfield on the last day of September in order to head to America and raise funds for the homeless and destitute“ (p338-370).

Lovejoy’s experiences were seized upon by the New York Times, who featured her experiences on 9th October 1922 [full text online (paywalled)]. Jennings will be the subject of two movies, links to which are provided in the check him out above. And as for the two "big ideas" which had started it all back in 1919, Greece’s ambitions are in ruins, whilst America’s ambitions - the trashing of European
influence in the Near East - are coming along very nicely indeed. **FURTHER READING:** Suggestions for further reading will be given at end-of-thread [sub-thread continues at 13th October 1922]. 1922 [5th November-5th December] The Russian Civil War [TBA - Political and International Front (The "New Economic Policy")]: [Continued from TBA] Between 5th November and 5th December 1922 the Fourth Congress of the Communist International [Wikipedia briefing] takes place in Petrograd (until 8th November) and then Moscow. Having dealt with the most serious White Russian offensives, and with the West finally pulling out its field presence and interfering now only with economic sanctions and agents provocateurs [both massive efforts - Ed.], it is time to look to the future ...  

**ASIDE:** The future will take time to arrive. At time of writing [= 26th October 2022], the Centenary of the 1922 Congress is only ten days away. **The sanctions and the provocations are still in place.**

**Lenin**, not in the best of health, has already tabled a written report dated 4th November but manages to speak personally to that paper in Moscow on 13th [transcript online]. He is concerned primarily with what he calls the "New Economic Policy" for Russia, which in a nutshell is that the Motherland has a long way to go. He begins with the hyperinflation of the ruble of late, hoping that the currency will stabilise as peace sets in. He then turns to the three main sectors of the Russian economy. The first two of these are under control: agriculture has already recovered from the 1921 famine and light industry is in "general revival". With heavy industry, however, the situation is "still grave", thus ...

"The economic history of the capitalist countries shows that heavy industry in backward countries can only be developed with the aid of long-term loans of hundreds of millions of dollars or gold rubles. We did not get such loans, and so far have received nothing. All that is now being written about concessions and so forth is not worth much more than the paper it is written on. [...] Yet I think our concessions policy is a very good one. However, we have not concluded a single profitable concession agreement so far. I ask you to bear that in mind. Thus, the situation in heavy industry is really a very grave problem for our backward country, because we cannot count on loans from the wealthy countries. In spite of that, we see a tangible improvement, and we also see that our trading has brought us some capital. True, it is only a very modest sum as yet—a little over twenty million gold rubles. At any rate, a beginning has been made; our trade is providing us with funds which we can employ for improving the situation in heavy industry. At the present moment, however, our heavy industry is still in great difficulties. But I think that the decisive circumstance is that we are already in a position to save a little. And we shall go on saving. We must economise now though it is often at the expense of the population. [...] The salvation of Russia lies not only in a good harvest on the peasant farms—that is not enough; and not only in the good condition of light industry, which provides the peasantry with consumer goods—this, too, is not enough; we also need heavy industry. And to put it in a good condition will require several years of work. [...] To begin with, we have leased only a certain number of the small and medium plants, but all the rest remain in our hands. As regards trade, I want to re-emphasise that we are trying to found mixed companies, that we are already forming them, i.e., companies in which part of the capital belongs to private capitalists—and foreign capitalists at that—and the other part belongs to the state. Firstly, in this way we are learning how to trade, and that is what we need."
In short, therefore, Lenin’s strategy is that Russia needs to export grain to fund heavy industrial growth, and [though it might well have gone against the grain, so to speak - Ed.] is willing to offer joint venture projects to foreign industrialists to help them do so. There accordingly begins a decade-long drive to industrialise the collective farms with agricultural machinery, resulting in a number of large tractor factories being built [the Henry Ford works at Stalingrad will feature large in the 1942 battle for that city; the Holt-Caterpillar works at Kharkiv will be severely damaged during the NATO-Russian War of 2022-ongoing - Ed.] [sub-thread continues at 28th December 1922]. 1924 [16th August] Versailles, Collecting Germany's Reparations [II - Phase One, 1921-1924 (The Dawes Plan to Refinance Reparations)]: [Continued from 15th November 1923] On 16th August 1924 German Chancellor Gustav Stresemann [Wikipedia biography] signs his country up to a package of proposals drawn up by a post-Versailles debt-collection committee chaired by the U.S. banker-politician Charles G.
The essence of the agreement is that a German debt-refinancing plan will now be put in place, in return for which the precautionary post-war occupation of the Rhineland can come to an end. The refinancing arrangements include a $200 million loan arranged by J. P. Morgan and Company and the State Department ...

THE STORY SO FAR: Tampke \((op. cit. \text{inf.)})\) suggests that the problem with the Dawes Plan was that the Germans used their 1924 J. P. Morgan and Company loan to meet the first payment due, and then pleaded penury again. But in his (1949/2013) "The Anglo-American Establishment" [Amazon], Carroll Quigley insists that the problem was fundamentally a geopolitical one - a clash of empires jockeying for position ...

"The aim of the Milner Group through the period 1920 to 1938 was [...] to maintain the balance of power in Europe by building up Germany against France and Russia [...]. The sabotage of the peace settlement by the Milner Group can be seen best in respect to reparations and the League of Nations. In regard to the former [firstly] the reparations were too large because they were a dishonourable violation of the Pre-Armistice Agreement, and [secondly] any demand for immediate or heavy payments in reparation would ruin Germany's international credit and her domestic economic system, to the jeopardy of all reparations payments [...]. The argument against reparations as a violation if the Pre-Armistice Agreement can be found in the volumes of [Alfred] Zimmern [check him out] and [Robert] Brand [check him out] already mentioned. Both concentrated their objections on the inclusion of pension payments by the victors to their own soldiers in the total reparation bill given to the Germans. This was, of course, an obvious violation of the Pre-Armistice Agreement, which bound the Germans to pay only for damages to civilian property. [...] From 1921 onward, the Milner Group and the British government (if the two policies are distinguishable) did all they could to lighten the reparations burden on Germany and to prevent France from using force to collect reparations. [...] Brand was financial adviser to the chairman of the Supreme Economic Council \((\text{see 24th February 1919 HISTORICALLY SIGNIFICANT})\) \((\text{Lord Robert Cecil (1864–1930) \text{\emph{see}} 21st January 1919))\) [see 24th February 1919 HISTORICALLY SIGNIFICANT] (Lord Robert Cecil \((\text{\emph{see}} 21st January 1919))\) [+++ further details +++] He was also a member of the International Committee of Experts on the Stabilisation of the German Mark in 1922. [...] On the two great plans to settle the reparations problem, the Dawes Plan of 1924 and the Young Plan of 1929, the chief influence was that of J. P. Morgan and Company [...]. The Milner Group was outraged at the efforts of France to compel Germany to pay reparations. Indeed, they were outraged at the whole policy of France [disparaging it] as 'the Poincaré system' [Wikipedia briefing]” pp240-241).

The Rentenmark scheme [upthread] exchange rate had been set at 4.2 gold marks to the dollar, "a return to the pre-WW1 exchange rate” (Lebor, 2013).

Members of the Dawes committee include our old friend Emile Francqui [check him out AN INTERESTING FELLOW], Josiah Stamp [Wikipedia biography], and Robert Kindersley [Wikipedia biography], and behind-the-scenes support is given by U.S. Commerce Secretary Herbert Hoover and Britain's future Foreign Secretary Austen Chamberlain [Wikipedia biography]. The agreement ushers in a period of net inflow into Germany of largely American capital, thus ...

"Between 1924 and 1928, Germany borrowed $600 million a year, half of which was provided by American banks. Much of it swiftly returned from whence it had come. Like modern bailouts, the money swirled back and forth, raising and lowering balance sheets, boosting confidence, and keeping the markets happy. As John Maynard Keynes [check him out] wrote, The United States lends money to Germany, Germany transfers its equivalent to the Allies, the Allies pay it back to the United States government. Nothing real passes [...]" (Lebor, 2013 op. cit. inf., p9).

Another figure in the strategic background is the exceptionally well-connected corporate lawyer (and one day U.S. Secretary of State) John Foster Dulles [check him out]. The arrangements worked well, at least to begin with ...

"The Dawes Plan was floated in New York and London in October and was quickly oversubscribed. American banks soon clamoured to finance the companies now investing in the German economy” (ibid., p10).

Treasury to start the ball rolling on a 4% "Perpetuity", that is to say, a government bond (or "gilt") paying 4% annual interest, tradeable on the bourses, and redeemable at par in or after 1957 (the final date, if ever, to be decided by the governments of the time) (Taylor, op. cit. inf.).

The issue will end up at £133,600,331, and will “consolidate” - that is to say, pay off and reborrow - a number of earlier gilts. The difference in face value so shown is £23,815,054, but in order to make a true comparison it is necessary to take into account the 5 per cent. premium over par due on 5 per cent. National War Bonds. With this adjustment the increase in nominal value is £20,553,743. The cash applications amounted to £81,300,525 4 per cent. stock, the cash proceeds from which will be £69,105,446. The annual interest charge on the new perpetual stock is estimated to show a saving of approximately £492,000 per annum on the cost of the old securities, including tax concessions, interest, etc. (Hansard, 202:277).

Further details will emerge on 15th February 1927, thus ...

"£823,117,000 3½ per cent. Conversion Loan has been issued mainly in 1921 and 1922: £129,660,000 3½ per cent. Stock being issued for cash proceeds of £99,991,000 and the remaining £693,457,000 3½ per cent. Stock in exchange for 5 per cent. National War Bonds, 5 per cent. Exchequer Bonds and 5½ per cent. Treasury Bonds to a nominal amount, including premiums on repayment, of £463,575,000. £210,587,000 4½ per cent. Conversion Loan was issued in 1924 in exchange for £148,407,000 5 per cent. War Loan and £57,728,000 5¾ per cent. Exchequer Bonds. In the latter case the consideration for conversion was a cash payment of 2¼ per cent, in addition to £100 4½ per cent. Stock for each £100 5¾ per cent. bond converted." (Hansard, 202:747-748).

As we understand the practice, the consolidation would have involved offering holders of the old bonds the choice between EITHER a cash redemption OR an automatic transfer to the new stock at an actuarially assessed fair (and sometimes deliberately attractive) conversion rate. Hidden amongst all this parliamentary jiggery-pokery are the facts (1) that all the interest payments and capital repayments on the loans mentioned have already been, or – ultimately – will be, funded out of Treasury tax receipts, (2) that the longer it is before a given loan is repaid the higher its total cost becomes, and (3) that the various earlier debts specified above included the 1833 Slavery Compensation Loan, the subject of this thread. Unfortunately, Hansard does not explicitly track the 1833 monies back through the decades, and it may therefore be bundled into any one of the stocks named. The 4% Consols in question will be redeemed 1st February 2015. 1927 [24th July] The Menin Gate Memorial is formally unveiled. It contains the names of 55,000 British and Commonwealth soldiers missing in action on the Ypres sector, and therefore without known grave [an overflow of 35,000 further names had to be commemorated at the Tyne Cot Memorial a few miles out of town - Ed.]. A ceremony of remembrance has taken place every evening since (save during the German occupation of WW2) [YouTube video]. Still unwilling to mince his words, Siegfried Sassoon dismisses it in his 1928 poem "On Passing the New Menin Gate" [full text online] as a "sepulchre of crime", which the Dead - were they able - would "deride". 1927 [15th November-1938] The Chinese Civil War [X - The 1927-1938 German Military Mission]: [Continued from 1 October 1927] Having severed his links with Moscow Chiang Kai-Shek accepts a military advisory mission from Berlin, headed initially by Max Bauer [check him out]. The Germans duly settle in at the Whampoa Military Academy and start to mould the Nationalist Army along Prussian lines, complete with German uniform [Wikipedia briefing and several interesting images]. Following the death of Max Bauer in 1929, Hermann Kriebel will take over until 1930, and he will be followed by Generals Wetzell (1930-1934), von Seeckt (1934-1935), and von Falkenhausen (1935-1938). German influence is such that between 1927 and 1931 Germany will supply 37% of the KMT's arms imports, and by the mid-1930s they have entire divisions (88th Division and others) in German uniforms, doing German drill, equipped with German equipment, and singing fusion marching songs [YouTube one now]. The mission is continued until around 1938. 1928 Siegfried Sassoon publishes "Memoirs of a Fox-Hunting Man", the first instalment of an anonymised WW1 autobiography.
1928 Work begins on the Thiepval Memorial to a design by Sir Edward Lutyens [see 1918]. [THREAD = FORMALISED REMEMBRANCE]

1928 The British author Edmund C. Blunden [Wikipedia biography] publishes "Undertones of War".

1928 Writing under the pseudonym Mark Seven, Max Plowman publishes "A Subaltern on the Somme", an account of his WW1 experiences on the Western Front. The work is matter-of-factly anti-war, containing rueful observations rather than complaints, as follows. On censoring his troops' mail ......

"Censoring letters is an unpleasant, impertinent duty, to be hurried over and treated as formally as possible. By constant repetition it becomes a deadly bore. [...] The writer is in the pink, in spite of everything: a condition he hopes is mutual. He believes there's a war on, so we must keep smiling. Hopes and fears for leave are always expressed, and promises of battle souvenirs are usually remembered. There is the inevitable P.S.: 'The cakes were all right, but a bit smashed, and I'd like some Woodbines" (p30).

On press euphemism ...

"This place is beginning to show what the newspapers describe as 'a certain amount of liveliness'. (Why 'liveliness'? Deathliness would be truer)" (p98).

On tanks ...

"The lecture on Tanks was a little disappointing. We were all agog to hear about these new land-caterpillars that, according to the papers, have done such marvellous things in the recent push on the Somme. [...] But the Tanks officer put rather a damper on our hopes [explaining] that tanks have to go very carefully, or they get stuck in T-places where communication trenches join the line. He also said they were quite vulnerable underneath and on top [...] also that] with the winter coming on their general deployment would probably be delayed till the spring” (pp121-122).

On the proper "fighting spirit" ...

"Yesterday the whole battalion marched out to a quarry not far from here and, in the natural amphitheatre, heard a lecture by a Scottish officer on 'The Spirit of the Bayonet'. From a purely military standpoint it was excellent. Why, indeed, should we spare a fat German just because he throws up his hands and shouts 'Kamerad', when, as the lecturer says, if we let him live he may become the father of ten more Huns? Killing is the job for infantrymen, and if we don't like killing, why did we join the infantry? The bayonet is the logical conclusion of all fighting” (p120).

On the impossible possibility of just getting up and walking away ...

"We seem to be here under the constraint of some malevolent idiot. In this sunshine it seems impossible to believe that at any minute we in this trench, and they in that, may be blown to bits by shells fired from guns at invisible distances by hearty fellows who would be quite ready to stand you a drink if you met them face to face. What base, pathetic slaves we are to endure such idiocy!” (p172).

And finally on why, deep down, men like war, and are therefore the authors of their own misfortune ...

"The great seductive enjoyment of war, outside the infantry ranks, is the sense of power it confers. By means of finely adjusted guns and the use of high explosives, the maximum of effect can be produced by the minimum of effort. [...] Every sport, if you come to analyse it, depends largely upon its power of producing a big effect with apparently small cause, whether the power resides in the ace of hearts, the thickness of a cricket bat, or the responsiveness of a golf ball to fine timing. In war this apparent disproportionate relation between cause and effect, which confers its flattering and enjoyable sense of power upon the player, is seen at its highest. Hence, from this standpoint, war is king of sports” (p190).

1929 The German author Erich Maria Remarque [Wikipedia biography] publishes the novel "Im Westen nichts Neues" [In English as "All Quiet on the Western Front"], a fictionalised account of his WW1 experiences in the German Army on the Western Front. David Jones, survivor of Mametz Wood, enjoys the book but declares he can do better. Robert Graves [Wikipedia biography] publishes "Goodbye to All That", a memoir of his WW1 experiences on the Western Front. The British author Henry W. Williamson [Wikipedia biography] publishes "The Wet Flanders Plain", a memoir of a 1927 battlefield tour of the Ypres Salient. His account includes the following observations ...

"Those at home, sitting in arm-chairs and talking proudly of Patriotism and Heroism, will never realise the bitter contempt and scorn the soldiers have for these and other abstractions; the soldiers feel they have been betrayed by the high-sounding phrases that heralded the War, for they know that the enemy soldiers are the same men as themselves, suffering and disillusioned in exactly the same way" (p17).

On surviving ...

"I must return to my old comrades of the Great War - to the brown, the treeless, the flat and grave-set plain of Flanders - to the rolling, heat-miraged downlands of the Somme - for I am dead with them, and they live in me again" (p19).

And on why wars happen at all ...

"Wars are economic in origin, the mass of each people being cohered and controlled by emotional slogans which are hostile to the truly peaceful lover of his country; the matured stupidity called patriotism is but a glossy light of selfishness, most evident among those with commercial power, hating their rivals in commercial power, and 'giving their young men to the War" (p32).

1929 Writing anonymously as "Private 19022", the Australian author Frederic Manning [Wikipedia biography] publishes "The Middle Parts of Fortune", a fictionalised account of life and death on the Western Front. The following year this work will be republished as "Her Privates We" with its field expletives deleted, death being somehow less offensive to public taste than a bit of effing and blinding. Manning will not be identified as author until 1943, and the full strength original will not be re-available until 1977.

as to how best to move forward with Germany's inability (or reluctance) to meet its scheduled reparations payments, thus ... 

"The answer to the never-ending German reparations question was, of course, another conference. This one was named after its chairman, Owen Young. The delegations arrived in Paris in February 1929 [...]. [Hjalmar Schacht] introduced upthread made his opening offer: $250 million a year for the next thirty-seven years. Émile Moreau [Wikipedia briefing], the equally stubborn governor of the Bank of France, demanded $600 million a year for sixty-two years. Perhaps even that might not be enough, he informed Young. France might yet settle for nothing less than $1 billion" (Lebor, 2013, p11)

A conference proper opens on 6th August 1929 at Den Haag, Netherlands, but the stubbornness takes its toll and the final agreement, signed on 31st August 1929, did not please everybody. The package of recommendations quickly becomes known as the Young Plan [Wikipedia briefing]. The main provision of the new agreement is that Germany's total debt be reduced, specifically, from the Versailles target of 132 billion gold marks to 121 billion, with 58 years to pay. Another J. P. Morgan and Company loan - this time of $300 million - is built into the payments schedule, and a new superbank - eventually the Bank for International Settlements (BIS) [detailed upthread] - is proposed, in order to administer the scheme with greater discipline than hitherto. Implementation of the plan is however destined to be rudely disrupted two months later by the Great Crash of 1929 [Wikipedia briefing], the ensuing worldwide economic depression, and the rise of the Nazis Further Reading: Suggestions for further reading will be given at end-of-thread [sub-thread continues at 3rd January 1930]. Here, from Lebor (2013, *op. cit. inf.*), still heavily featuring grey eminence Hjalmar Schacht [upthread], is some **historically highly significant** background ...

"Schacht's colleagues in Berlin had a very particular view of the role of the BIS - one quite different to that which the Allies had envisaged when signing the Hague Convention [upthread]. The bank set up to administer reparations was to be used to wreck them. Karl Blessing [Wikipedia biography], a protégé of Schacht, wrote a lengthy memorandum in April 1930, setting out policy on the BIS. 'Opinion on how the Reichsbank should conduct itself in the BIS' called for Germany to gain as much influence at the BIS as possible [... and] to fill its posts in the bank with the most able and perceptive individuals. [...] Blessing understood what many bankers did not: that [...] the bank was an inherently political institution, dealing with one of the most contested and bitter issues in politics - German war guilt and reparations. [...] France and Britain might believe that the establishment of the bank settled the reparations issue, but Blessing understood that the existence of the BIS actually offered a forum to open up the issue once again. [...] The Reichsbank, Blessing argued, should certainly cooperate with the BIS in its new role as the bank for central banks. [...] But Blessing called for German officials to undermine the new bank by making impossible demands [...]. He demanded a sophisticated form of psychological warfare against the BIS [and in 1931 he] left the Reichsbank to take up a senior post at the BIS" (pp27-28).

The new committee is chaired by the BIS’s Italian representative Alberto Beneduce (Wikipedia biography) amd includes Germany's veteran negotiator Carl Melchior [check him out AN INTERESTING FELLOW]. Here is the British Foreign Office, no less, with more of the details ...

"The composition of the committee to inquire into the further credit needs of Germany was announced by the Bank for International Settlements to-day. Sir Walter Layton is the British representative. A communiqué issued by the Bank says:— The London Conference of July, 1931, officially advised the Bank for International Settlements that the Conference recommended that the Bank should be invited to set up a committee of representatives nominated by the Governors of Central Banks interested to inquire into the immediate further credit needs of Germany and study the possibilities of converting a portion of the short-term credits into long-term credits. The Bank announces that the membership was completed to-day with Signor Alberto Beneduce, President of the Consorzio di Credito per le Opere Pubbliche, Rome; Dr. R. G. Consideration of the date and place of the first session will take place at the meeting of Central Bank Governors in Basel on Sunday, August 2” (National Archives, 1st August 1931 [full text online]).

The committee eventually - and drearily predictably - recommends as follows ...
"The Beneduce Committee's conclusions, published just before Christmas 1931, were a triumph for Berlin. All intergovernmental reparations and war debts must be 'adjusted' to ensure peace and economic stability. 'Adjustment' was a euphemism for abolition. Six months later, in 1932, European governments met in Lausanne to consider the Beneduce Committee's recommendations. They agreed to cancel German reparations, except for one final payment" (Lebor, 2013, op. cit. inf., p29).

Short was an ex-WW1 flyer who found it easier to make a living as a “flying instructor” in China than as a “stunt and endurance pilot” in the Depression back home. He had gone on contract to Chiang Kai-Shek’s air ministry in 1930 to help China attack rival Chinese warlords, and had then chosen to remain in theatre after the Japanese invasion of Manchuria [see 19th September 1931]. He is thus part mercenary, part U.S. advisor, caught up in somebody else's war.
In the resulting aerial dog-fight, he is shot down and killed. It is not the first time he has crossed swords with Japanese naval aviators around Hangzhou, however, so we deem it likely, on the day of his death, that the Japanese had contrived to ambush him [sub-thread continues at 7th July 1932], [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = WASHINGTON-MOSCOW PROXY WARFARE, 1917 TO DATE]

1932  [16th June-9th July] Versailles, Collecting Germany's Reparations [VIII - Phase Two, 1925-1932 (The Lausanne Conference): [Continued from 31st July 1931] Between 16th June and 9th July 1932 a conference takes place at Lausanne, Switzerland, to approve the recommendations of the recent Beneduce Committee [upthread]. Reparations are duly terminated, but only on an inter-sovereign basis [Germany to France, for example]: repayments on the sovereign-private American bank loans of 1924 and 1929 [Germany to J. P. Morgan and Company, for example] remain honoured for the time being ...

CAMEO - THE PRIVATISATION OF SOVEREIGN DEBT: Here is Lebor (2013, op. cit. inf.) again with some of the details (two clips) ...

"Even the BIS’s more nebulous mandate of central bank cooperation had its defenders. Economists and bankers had long argued that as the world economy became more sophisticated a system of large capital movements, free from political or governmental control became more powerful, there was a need for some kind of coordinating body to ensure financial stability. Julius Wolff [no convenient biography], a professor at the University of Breslau, had proposed in 1892 that a new financial institution in a neutral country be set up to issue an international currency and arrange emergency funding to countries in crisis. [+++ other early world bank suggestions +++] The U.S. government took a very different view. The BIS was born out of reparations negotiations chaired by two Americans, Charles Dawes and Owen Young. Its first presidents, Gates McGarrah [check him out AN INTERESTING FELLOW] and Leon Fraser [Columbia University archive WOW] were American. But Henry Stimson [Wikipedia biography], the secretary of state, proclaimed that the United States did not wish to 'directly or indirectly participate in the collection of German reparations through the agency of a bank or otherwise'. The United States had never asked for reparations, thus it had no reason to participate in the BIS” (pp30-31).

"The BIS had been established for three main purposes. The first [...] was to manage German reparations under the 1929 Young Plan. The second was to facilitate cooperation between central banks. And the third was to act as a bank for central banks. [...] The Young Plan had collapsed almost as soon as it was agreed to. The Hoover Memorandum, announced a year later, had paused repayment payments. The 1932 Lausanne Conference had confirmed that Germany’s war debts would be written off. Thus there were no more reparation payments. [...] Germany had even] stopped using the BIS to repay the Dawes and Young plan loans. Instead, Schacht had blackmailed Germany’s creditors into signing new bilateral agreements. [...] So for what other reasons did the BIS continue to function? It acted as a facilitator of central bank cooperation for countries whose currencies were on the gold or gold exchange standard [...]. With no more reparation and the collapse of the gold standard, why did the BIS stay in business? In part [...]because] Schacht and Norman had designed their bank superbly. It was not possible to close the BIS. In fact, the end of reparations and the collapse of the gold standard proved a boon for the BIS. It allowed the bank to focus on its founders’ intentions: to build a new transnational financial system of large capital movements, free from political or governmental control. Gates McGarrah, the bank’s first president, had explained as much soon after the bank was founded. [+++ supporting detail ++++] The new mechanisms of transnational capitalism allowed the bankers to send vast sums of money quickly and easily around the world and harvest vast profits from doing so, free from oversight" (pp41-43).
So, although America did not benefit from Lausanne, Americans did, whereas in France both the nation and the people went hungry. As luck would have it, the Lausanne Conference more or less coincided with the publication (after two years in preparation) of Eleanor Dull's (Wikipedia biography) [1932] "The Bank for International Settlements at Work" (Amazon), an academic economist's some-say-tedious observations of everyday high finance, thus ...

"Eleanor Lansing Dull—[...] published her book on the BIS in 1932, despite some difficulties when she was rumoured to be an American spy [everybody else in her brother Allen Dulles' circle was a spy, and so these rumours were almost certainly true - Ed.]. [She] went on to enjoy a stellar career in the U.S. Foreign Service, specialising in Germany" (pp31-32).

Be all this as it may, the immediate practicality is that there will be no more gravy trains on the inter-sovereign reparations railroad, for what little money the Germans have is being spent paying off their American credit card. Or to put that another way, having been gutted in the flesh during the war, the old empires are now being gutted economically by those who sent in the A.E.F. to "save" them. Germany's unemployed, for their part, with their leftists eviscerated (often literally) in the revolution of 1918-1919 [Wikipedia briefing; also see Timeline 7th November 1918, then as directed], and no longer weighed down by debts to the older empires, are looking around for an orator to inspire them. They will not have long to wait. FURTHER READING: Suggestions for further reading will be given at end-of-thread [sub-thread continues at 9th April 1933]. 1933 [9th April] Versailles, Collecting Germany’s Reparations [IX - Phase Three, 1933-1945 (The BIS Goes Nazi)]: [Continued from 16th June 1932] In the German general election of 5th March 1933 [Wikipedia briefing], the Nazis had strengthened their hold on power with a near-11% swing in the vote, giving them an overall majority of 87 seats in the Reichstag. Washington is accordingly uncertain of what is going to happen next, and a month later, on 9th April 1933, Schlacht is busily reassuring U.S. High Commissioner James G. McDonald [see own entry NOT SURE WHAT TO MAKE OF HIM], newly arrived on a fact-finding mission to Europe (Breitman, et al. (Eds.), 2007, diary entry 9th April 1933). The trans-Atlantic element of the reparations therefore continues to flow, even as European antisemitism is rapidly becoming the order of the day. Melchior, for example, the BIS's Jewish vice-president, will soon be forced out of office (to die shortly afterward) to be replaced by promoted Dutch board member Leonardus Trip [Wikipedia biography]. **CAMEO - LIBBY-OWENS-FORD GLASS COMPANY:** Libbey-Owens-Ford Glass [Wikipedia briefing] was formed by merger in 1930 and provided industrial glass to such projects as the windscreen of the Ford Model A motor car and the windows of the Empire State Building. In the present context we note them merely as the unwitting vehicle of an illegal Stockmarket “Pool” involving Henry Sinclair, Walter P. Chrysler, and Joseph P. Kennedy. The pool bought “buy options” on the stock and then subtly spread rumours that the company would make a fortune making beer bottles once Prohibition ended. The stock duly peaked at $37 per share, the pool sold out, and the stock then dropped to $21 when the rumours proved inconsequential. The syndicate cleared an estimated $395k, of which Joseph Kennedy’s share was $66k.

**CAMEO - THE NATIONAL CITY BANK:** The Committee subpoena’d Charles E. Mitchell [Wikipedia biography], Chairman of National City Bank [Wikipedia briefing], because of “its recognised leadership in the orgy of speculation which led to the business collapse”. Mitchell revealed a number of just-not-illegal transactions during the Crash, but the real damage had been done by an accumulation of questionable lending schemes all through the 1920s. Mitchell duly resigned in disgrace (but comfortable disgrace). More recent scholarship suggests that Federal Reserve Bank policies did far more damage.

The event is marred by violent clashes between Blackshirt bouncers [U.K. English slang = event stewards (here mainly party heavies and piece-rate muscle)] and leftist activists on a mission to disrupt, and this disorder will prove historically significant because it persuades Britain’s hitherto protofascist media barons - not least Harold Harmsworth/Lord Rothermere [Wikipedia biography] - that the BUF’s in-your-face bully-boy politics is not the sort of middle-class Nazism which Britain does so well. To start...
with, sovereign reparations payments to Britain and France have stopped and non-sovereign loan repayments to the American banks are now at an all-time low ...

"[T]he old fox, as Schacht was known, had outmanoeuvred everybody with a high-stakes game of international poker. [... A]s soon as Germany had broken free from the BIS, Schacht swiftly concluded bilateral agreements with Dawes and Young loan bondholders in seven countries, including Britain, France, and Italy, albeit at reduced rates of interest" (Lebor, 2013, p38).

... at the same time, the American-funded German armaments industry is booming ...

"[O)n or just after 30th September 1934] Schacht had submitted a report to the Führer entitled 'Report on the State of Work for War-Economic Mobilisation as of September 30, 1934' [originally "Bericht des Reichswirtschaftsministers über den Stand der Arbeiten für eine wirtschaftliche Mobilmachung am 30. Sept. 1934 einschl.", and later, translated for that purpose, a Nuremberg Trials appendicised document, and now available in English in photostat, courtesy of the University of Connecticut]. In this report he proudly stressed that his Ministry had been 'charged with the economic preparation for war' [and] related how the Nazi war machine had been funded with assets taken from 'enemies of the state' and blocked foreign accounts. 'Thus our armaments are partially financed with the credits of our political enemies' " (Lebor, 2020, p129).

1938  Drawing on his WW1 experiences as a Medical Officer in the 2nd Battalion, Royal Welch Fusiliers,  **J.C. Dunn**  [Wikipedia Biography] publishes "**The War the Infantry Knew**"  [Amazon]. Here are some indicative passages. Firstly concerning snipers (and how much sympathy they could expect if captured alive) ...

"The German snipers observed and fired from under the eaves of houses, so it was most difficult to locate them. When a parapet was blown in by a shell, or when a trench caved in [...] the sniper looked out for the repair or rescue party. [...] Snipers covered their working parties; worse still, they covered attacks, preventing our then lining the parapet until the attackers were close up. Only in the dark could food and ammunition be brought up, and the wounded and dead be taken down. [...] Then the suspicion arose] that there was a sniper behind us, so Stanway, who had several snipers to his credit, took out a few men to make a search. While they were halted beside a large strawrick one of the men noticed some empty German cartridge cases at his feet. On thrusting their bayonets into the rick the party was rewarded by a yell and a German coming out headlong. Inside was a comfortable hide, having openings cleverly blocked with straw, and a week's supply of food. The sniper could come out at night for exercise and water. Only his carelessness with his used cartridges cost him his life, for he was finished there and then" (pp83-84).

On the deterrent value of dead bodies ...

"The Hun is trying to get in his dead near his trenches. We try to prevent him, it's good for him to see how many there are" (p89).

On rivalry between units ...

"Two good stories of the shoot came round to us after relief. While our guns were giving the Prussians opposite us hell, the Saxons opposite the Middlesex applauded the hits. Later they shouted across, 'We are being relieved by Bavarians tonight. Give us some time to get out then shoot the bastards'" (p113).

And finally on the inequality of the contest between man and machine ...

"This has been an uncommonly active tour, our casualties greatly exceed the weekly average. Dewhurst, returning off leave, met his Company stretcher-bearers carrying down one of the dead; following them was a man with something in a sand-bag. As money, letters, and other personal possessions were taken off the dead and sent home, Dewhurst asked, 'Are these his effects?' 'No, Sir, it's his pal'; for of a second victim of the same shell only parts of two limbs could be found" (p179).

"From 1st June 1938 to 31st May 1945, the BIS organised ...

**184 gold shipments for a total amount of 297 tonnes of fine gold, and**
112 gold location exchanges for a total amount of 127 tonnes of fine gold

However, these numerous gold shipments and gold exchanges were not spread evenly over this period of time. Three periods are distinguished in this paper:

Period 1: before the outbreak of the Second World War (from 1st June 1938 to 31st August 1939);
Period 2: from the outbreak of the war until the end of the German military campaign in Western Europe (from 1st September 1939 to 30th June 1940);
Period 3: from the end of the German military campaign in Western Europe until the end of the Second World War in Europe (from 1st July 1940 to 31st May 1945)" (pp3-4).

The piece then reports the all-important numbers, as follows: For Period 1, 230.8 tonnes of gold were physically shipped out, and a further 74.1 tonnes swapped out in situ to different beneficial owners.

1939 [5th January] Versailles, Collecting Germany's Reparations [XI - Phase Three, 1933-1945 (Raubüberfall bei Threadneedle Street)]: [Continued from 30th September 1934] On 5th January 1939 the governor of the Bank of England Montagu ["Always absolutely charming, always absolutely wrong"] Norman [Check him out FLAWED AS A MAN, CUCKOLDED AS A BANKER] arrives in Berlin for a rendezvous with Reichsbank president Hjalmar Schacht [upthread A WILY BANKER], prior to them travelling together to that month's Bank for International Settlements (BIS) board meeting in Basel, Switzerland. Here is Lebor (2013) again, (1) giving some background relating to Norman's part as co-architect of the BIS (and thus, ultimately, co-architect of the loss in 1932 of Britain's sovereign reparations stream), (2) detailing subsequent developments as the money thereby saved by Germany was diverted to new and sinister purposes, and (3) explaining the 1939 trip itself, one of Norman's final excursions prior to the outbreak of WW2 (each extract long and heavily abridged) ...

EDITORIAL NOTE: Lebor's 2013 and 2020 books are histories of 20th century bankers and banking, not per se of German WW1 reparations. Indeed, between 1929 and 1939, reparations move from top of the agenda to any other business. Where the following extracts drift too far off our present topic, we shall abridge them [+++ thus +++]. Where an abridged topic happens to be of particular interest in its own right - the story of Nazi gold, for example - side pointers are provided.

(1) THE FINAL REPARATIONS YEARS, 1930-1932:

"During Norman's term as governor, from 1920 to 1944, he was one of the most influential men in the world, an apparently permanent bastion of the global financial system. [...] Such was Norman's power that a single speech could move markets. [example given] The governor was a scion of an old and respected banking
dynasty, but his mental state was an open secret among financial insiders. Norman was a mercurial figure, a manic-depressive, and a workaholic, notorious [...] for his mood swings. Shy and hypersensitive, Norman was introverted to the point of neurosis. [...] The world's most powerful banker abhorred publicity, being recognised, or socialising, and was prone to fainting fits. He once threw an inkpot at the head of an underling who failed to meet his exacting standards. [...] His stepson, Peregrine Worsthorne [Wikipedia biography], [later recalled:] 'He was always very neurotic and had very bad nervous breakdowns. He was very shy and a loner. [more of same] He lived very austerely and discouraged all signs of ostentation. He hated cocktail parties.' [...] One day in the summer of 1929 [he] picked up the telephone and spoke to Walter Layton [1st Baron Layton [1947]] [Wikipedia biography], the editor of The Economist [asking him] to come to his office as soon as possible to discuss a very important matter. [...] Layton [...] quickly made his way to the bank's headquarters at Threadneedle Street [...]. Norman wanted to talk about a new bank, to be called the Bank for International Settlements. The BIS was being set up in connection with the Young Plan [...] but Norman had more ambitious ideas. The BIS would be the world's first international financial institution. It would be a meeting place for central bankers. Away from the demands of politicians and the prying eyes of nosy journalists, the bankers would bring some much needed order and coordination to the world financial system. [...] A subcommittee would soon meet in Baden-Baden, in Germany, to draw up the bank's statutes. The editor of The Economist, Norman said, was just the man to draft the BIS's constitution, one that must above all guarantee the bank's independence from politicians. [...] He lived very austerely and discouraged all signs of ostentation. He hated cocktail parties.' [...] Layton replied [...]. The constitution was eventually drafted by one of the many committees set up to establish the bank's constitutional structure. The key point, as Layton recalled, was to 'work out some form of words that would place the bank beyond the reach of governments'. Layton 'struggled [...] with the new bank's constitution, one that must above all guarantee the bank's independence from politicians. [...] France led the punishers. [...] Norman and the rebuilders, who included most of Wall Street, believed otherwise. Europe could be reconstructed, but its future lay in trade and financial cooperation. The aim was not to reduce Germany to penury, but to help it fix its economy [...]. [...] So in 1923, with the Rentenmark established, the next step was to build a gold reserve to give the new currency real backing. [...] Schacht told Norman that he wanted the Bank of England to lend $25 million to a new subsidiary of the Reichsbank, the Gold Discount Bank [Deutsche Gold- und Silberkreditbank Wikipedia briefing]. The new bank would instantly alter global perceptions of [Germany's] financial prospects. [...] Tenacious as ever, Schacht got his money. Schacht had sweet-talked Norman, but the reparations question remained unresolved. [...] The Reichsbank was placed under the control of a fourteen-man board of seven foreigners and seven Germans. [...] The answer to the never-ending German reparations question was, of course, another conference. [...] Young asked how such a plan could be put into practice. Schacht has a ready answer: by setting up a bank. [...] The answer to the never-ending German reparations question was, of course, another conference. [...] The bank would hold central banks' gold and convertible currency deposits. These deposits could be used to settle international payments without having to physically move the gold between banks or trade the currency through foreign exchange markets. [...] The next question was where the new bank should be located. [...] And finally the delegates settled on Basel, Switzerland, which was conveniently located on several international railway lines and on the borders of France and Germany. Meanwhile in London [Layton] was still grappling with the new bank's constitution. The key point, as Layton recalled, was to 'work out some form of words that would place the bank beyond the reach of governments'. Layton 'struggled hopelessly' and then told Norman that he had failed. 'Why do you insist that it can't be done?' Norman demanded, annoyed. 'Because it's the right of every democratic government to reserve its freedom of action,' Layton replied [...]. The constitution was eventually drafted by one of the many committees set up to establish the BIS [... and] the bank's statutes, still extant today, enshrined its absolute independence from interfering politicians and governments. [...] Schacht and Montagu Norman had their bank” (pp3-13, slightly resequenced).

(2) THE TRANSITION TO NAZISM:

"For Hjalmar Schacht and Montagu Norman, January 30, 1930, was a date to savour: they had created a bank beyond the reach of either national or international law. [...] The Hague Convention guaranteed that the BIS would be the world's most privileged and legally protected bank. Its statutes, which remain in force to this day [= 2013], essentially make the BIS untouchable. [...] It is a highly profitable bank that is accountable to, and controlled by, its members, central banks. [...] In February 1930, the governors of the central banks of Britain, France, Italy, Germany, and Belgium gathered with representatives from Japan and three American banks to sign the BIS's instrument of foundation. As the Federal Reserve Bank of New York was not permitted to own shares, for political reasons, a consortium was formed - J. P. Morgan, the First National Bank of New York, and the First National Bank of Chicago - to represent the United States. The BIS formally came into existence on February 27, 1930. The bank's initial share capital was set at 500 million Swiss francs, which was divided into 200,000 shares of 2500 gold francs. The governors of the founding central banks were ex-officio members of the board of directors. Each could appoint a second director of the same nationality [who] did not have to be a central banker. [...] The BIS was incorporated under Swiss law. Its authorised activities included [listed]. There were some restrictions that were intended to prevent the BID from becoming a competitor of commercial..."
banks. The bank could not issue banknotes, open accounts for individuals or commercial organisations, own property other than its headquarters or offices, or have a controlling interest in a business. [...] It enjoyed a guaranteed revenue stream from the reparations payments that it would manage under the Young Plan, as well as from the highly profitable services it would carry out for its clients, the central banks. [...] The monies did not physically move through the BIS. When Germany made a reparations payment, it informed the BIS that the Reichsbank had credited the BIS’s account in Berlin. The BIS then informed the national banks of those countries receiving reparations, such as, for example, Britain that the monies were available to draw on, if they so wished. [...] In the meantime, the BIS used the funds earmarked for Britain to buy securities - which it could sell if and when Britain wanted to draw its monies. [++] the Greek national gold [++] But not everyone was happy. Hjalmar Schacht, who loved to refer to the BIS as ‘my bank’, continued to rage over the scale of reparations under the Young Plan. In December 1929 he wrote to J. P. Morgan that he would not take up his directorship at the BIS. The following month, Schacht resigned from the Reichsbank [and that autumn he went on a lecture tour across Europe and the United States. [...] Wherever Schacht spoke, he gave the same address: fulminating against the Young Plan, the Versailles Treaty, and reparations” (pp19-24).

**3) THE BOWLER-HATTED ACCESSORY TO NAZISM, 1939:**

"On January 5, 1939, [...] Montagu[typos in original corrected] Norman stepped off the train at the Zoologische Garten station in Berlin and was met by Hjalmar Schacht. Norman was the guest of honour at the Christening of Schacht's grandson, and he was swiftly driven to Schacht's apartment in the Reichsbank building, where the ceremony took place. [...] Numerous articles in the German press welcoming Norman to Berlin heightened the friendly atmosphere. The two bankers then travelled to Basel together for the monthly board meeting at the BIS. [However,] British journalists and politicians were asking increasingly pointed questions about the close ties between Norman and Schacht. The Reichsbank president had been in London just before Christmas and had visited Norman at home. What had been discussed? [++] further complaints detailed [++] [People] were right to be suspicious of Norman's relationship with Schacht. The Reichsbank president, more than anyone else, had rebuilt Germany [...] Schacht had wrought a miracle - a centrally planned economy that was not ravaged by inflation, a worthless national currency, or unemployment. In the six years since Hitler had taken power, unemployment had been reduced from six million to around three hundred thousand. Armies of the jobless were diverted to massive programs of public work [examples]. Arms production was soaring. Trade unions no longer existed [...]. The work-shy, along with Jews, leftists, and others viewed as undesirable were dispatched to concentration camps. Germany adored its miracle maker. [examples] Schacht's admirers believed, correctly, that without him Germany would still be weak, poor, and, worst of all, humiliated. [...] In May 1935,] Hitler appointed Schacht General Plenipotentiary for the War Economy. For all his old-world manners and elegant appearance, Schacht was a state-sanctioned crook, licensed by Hitler to tear up contracts, steal, extort, and fiddle the Reichsbank's books. [++] the MEFO chicanery [upthread] [++] He could outsmart anyone, even the wily Jews, proclaimed Hitler: '[...]. In spite of his ability, I could never trust Schacht for I had often seen how his face lit up when he had succeeded in swindling someone out of a hundred mark note'. [...] Yet even as he rebuilt Germany's economy, Schacht must have asked himself if the price was really worth paying. He did not believe in the Nazis' ideas of racial supremacy and refused to join the party. Rather, he was an authoritarian national conservative [once remarking, 'How could I have known that we have fallen into the hands of criminals'? [...] By 1938 Schacht had begun to play a perilous game, using the BIS as a secret backchannel to Britain to try and bring down Hitler and stop the march to war, or so he claims in his memoirs. Schacht first approached several senior military leaders to encourage them to launch a coup.”

**YOU COULDN'T MAKE IT UP (AND YOU HAVEN'T GOT TO)**

"Meanwhile, as Europe slid to war, the atmosphere in Basel between the central bank governors remained 'entirely cordial' [...]. The governors' monthly meeting took place at 4 p.m. on Sunday, without notes or minutes being taken, after which high tea was served. The rest of the two days were busy with breakfasts, lunches, dinners, concerts, receptions etc.]. In 1939 the BIS board welcomed one of the world's most powerful industrialists, Hermann Schmitz [check him out NOT A VERY WHOLESOME CHARACTER], the CEO of Ig. Farben [Wikipedia briefing]. The presence of Hermann Schmitz on the BIS board highlighted how deeply the bank was entangled with the Third Reich. Nazi Germany benefited immeasurably from its relationship with the BIS. [details] The BIS thus ensured that the Reichsbank, which should have been a pariah institution, remained a central pillar of the global financial system. [...] The BIS reports the 1930s, and the buildup to war are especially illuminating [...]. The bank's access to figures provided by the world's leading central banks allowed it to collate and analyse statistics, to dissect global trends, etc.]. The BIS annual reports, wrote John Maynard Keynes, the influential British economist, were now ‘the leading authority for certain statistics, not easily obtainable,’ and the staff were to be congratulated. The reports were supervised and written by Per Jacobsen [Wikipedia biography] [... who had joined the bank in 1931 as economic adviser. [++] more on Per Jacobsen [++] The Anschluss, the Nazi annexation of Austria, is noted on pages 100 and 101 of the 1938 report as follows: ‘In connection with the incorporation of Austria in the German Reich in March and April 1938, the Austrian

Readers unfamiliar with the two-stage Nazi annexation of Czechoslovakia 1938-1939 will find this Wikipedia briefing useful. The 1938 political annexation of the (then German-speaking) Sudetenland began in earnest on 24th April 1938 and dragged out until 10th October 1938. The military invasion of the Czech heartlands (Bohemia and Moravia) then followed on 15th March 1939.

Readers unfamiliar with Montagu Norman's part in facilitating the Nazi acquisition of the Austrian and Czechoslovakian gold reserves should see the entry for <5th January 1939> before proceeding.

Here is Lebor (2013, op. cit. inf.) with the story ...

"When Nazi Germany annexed the Czechoslovakian border province of the Sudetenland in September 1938, it immediately absorbed a good part of the country's banking system [...]. By then the country's national bank had prudently transferred much of its gold abroad to two accounts at the Bank of England: one in the name of the BIS, and one in the name of the National Bank of Czechoslovakia itself. (Countries had deposited some of their gold reserves in a sub-account at the BIS account in London to ease gold sales and purchases.) Of the 94,772 kilograms of gold, only 6337 kilograms remained in Prague. The security of the national gold was more than a monetary issue. The Czechoslovak reserves [...] were an expression of nationhood. Carved out of the remains of the Austro-Hungarian Empire in 1918, the Czechoslovak Republic was a new and fragile nation. A good part of the gold had been donated by the public in the country's early years [and if that] was safe, then
something of the country's independence would endure. They were wrong. The Czechoslovaks' faith in the probity of the BIS and the Bank of England was tragically misplaced. The gold was sacrificed, with barely a second thought. [...] The Nazis' first demand came in February 1939 when Berlin ordered Prague to transfer just over 14.5 metric tons of gold, supposedly to back the German currency now circulating in the Sudetenland. [...] The following month the question became academic. On March 15 [1939] the Wehrmacht marched into Prague. The German protectorate of Bohemia and Moravia [Wikipedia briefing] was declared, and Czechoslovakia no longer existed. But the gold reserves did. Three days later a Reichsbank official was dispatched to the National Bank of Czechoslovakia and ordered the directors, under the threat of death, to issue two orders. [...] The first order instructed the BIS to transfer the 23.1 metric tons of Czechoslovakian gold held at the BIS account at the Bank of England to the Reichsbank BIS account also held at the Bank of England. The second order instructed the Bank of England to transfer almost 27 metric tons of gold held in the National Bank of Czechoslovakia's own account to the BIS's gold account at the Bank of England, Malik and his fellow directors hoped that it would be obvious that the instructions had been issued under duress and so would not be implemented. [...] But Malik had not reckoned on Montagu Norman. The Governor of the Bank of England had no interest in whether Czechoslovakia was free or a Nazi colony. [...] The transfer order, he said, must go through" (pp59-60).

Lebor (2020, op. cit. inf.) tells the same tale more succinctly thus ...

"In March 1939 [typo in original corrected], when the Nazis marched into Prague, the directors of the Czech National Bank were immediately arrested and held at gunpoint. The Nazis demanded that they hand over the $48 million national gold reserve. The Czechs announced that the gold reserves had already been sent to the BIS, from where they were to be forwarded to the Bank of England. The Nazis' reply was to order the Czechs to ask the BIS to get the gold returned to Basle. Montagu Norman, Governor of the Bank of England, who, like many British financiers and members of the establishment, was pro-Hitler, quickly obliged. The gold was returned to the BIS and then sent on to Berlin" (p108).

Not all in Britain were so spineless. Here is Lebor (2020) again, with some of the names ...

"The journalist who got the scoop, Paul Einzig [Wikipedia biography], met with Labour M.P. George Strauss [Spartacus Educational biography AN INTERESTING FELLOW], who began asking questions in Parliament. On 15 May 1938 Strauss asked Neville Chamberlain [...] Is it true, sir, that the national treasure of Czechoslovakia is being given to Germany? Chamberlain's reply: 'It is not'. But it was a lie. Eleven days later Strauss asked a further question about the Czech gold, this time of the Chancellor of the Exchequer, Sir John Simon [Wikipedia biography]. Winston Churchill, outraged at this craven compliance with Nazi demands, and collusion with them by leading British financial officials, led a verbal attack on the Chancellor in the House of Commons" (p108).

The movie is an eponymous biography of Alvin York [see 1917 (5th June)], the most decorated U.S. serviceman of WW1, and relates how he was converted from conscientious objector to expert sniper. The movie was the highest grossing release of 1941, and is in its own way a masterpiece of militarist propaganda. The essence of this conversion is conveyed in an exchange between York and his Battalion commander, Major Buxton (played by Stanley Ridges). Here is our transcript ...

YORK: "Private York reporting, Sir."
BUXTON: "Yes, York: at ease. York, Captain Danforth has just handed me a report concerning you, made by your Company Sergeant."
YORK: "Yes, Sir?"
BUXTON: "You have a very excellent camp record."
Mighty glad to hear that, Sir.

You applied for exemption, I believe, as a conscientious objector?

Yes, Sir.

Well I think we can disregard that. York, Sergeant Parsons recommends your promotion to the rank of corporal with special detail as an instructor in target practice. Captain Danforth and I heartily approve.

I congratulate you, York.

Well I'm much obleeged to you, Major Buxton, Captain Danforth. Well I'll learn them fellers to shoot the best I can, like I already done Pusher and Bert - I mean Privates Ross and Thomas, Sir - but, well, I don't wanna be no corporal.

What's that?

I said I don't wanna be no corporal.

Why not?

Wait a minute, Captain, let him talk ...

Well you see, er ...

Is it because of your religious convictions, York?

That's it. You see I believe in the Bible, and I'm a-believin' that this here life we're living is something the Lord done give us. And we gotta be a-livin' it the best we can. An' I'm figurin' that killing other folks ain't no part of what He was intendin' for us to be a-doin' here.

Well yes, in a way I agree with you.

You say you believe in the Bible?

Yes, Sir.

Well I do too. But do you believe that the Bible means that a man shouldn't fight for what he believes to be right?

Blessed are the peacemakers.

You remember that verse - I think it's in Luke where he says: 'He that hath no sword, let him sell his garment and buy one'?

He said that to Peter, but he done stop Peter from using the sword. He said: 'them that lives by the sword will be a-perishin' by the sword'. I read that further on.

Yes, I remember, but ...

Go ahead, Captain.

But according to Saint John he said 'My kingdom is not of this world; if my kingdom were of this world then would my servant fight'?

That's just the point, Captain. He done said that his kingdom were not of this world, and that made it different.

Yes, but ...

Just a moment, Captain. York, you ever read this?

History of the United States. Sure is a lot of writing! Daniel Boone!

Yeah - You know about him?

Everybody down our way knows about Daniel Boone! First man into the Valley of the Three Forks.

He was quite a man! One of the greatest. That book's full of great men. York, what do you suppose that Boone was looking for when he went out alone into the wilderness?

I never thought much on it.

Was he looking for new lands?

Might be.

Maybe. Maybe for something more? Something that a man just can't see with his eyes or hold with his hands? Something that some men don't even know they have until they've lost it?

Yes, Sir.

To be free. That's quite a word, freedom. I think that's what he wanted. I think that's what sent Boone into your Tennessee country.

Is that what this here book's about?

Yes - that's the story of a whole people's struggle for freedom. From the very beginning until now. For we're still struggling. It's quite a story. York. How they all got together and set up a government. Whereby all men were pledged to defend the rights of each man, and each man to defend the rights of all men. We call it a government of the people, by the people, and for the people.

Well I never knowed it was all written down ...

You're a religious man, York ...

Yes, Sir.
BUXTON: "You want to worship God in your own way."

YORK: "Yes, Sir."

BUXTON: "You're a farmer."

YORK: "Yes, Sir."

BUXTON: "You want to plough your fields as you see fit, and raise your family according to your own likes. And that's your heritage. And mine. Every American's. But the cost of that heritage is high. Sometimes it takes all that we have. Even our lives. How are you going to answer that, York?"

YORK: "Well you done give me a powerful lot to be a-thinkin' about."

BUXTON: "Take your time.

YORK: "If I could only get home.

Back in them hills

BUXTON: "What would you do?"

YORK: "I could figure somethin' out."

BUXTON: "All right, take ten days furlough.

YORK: "You mean I can go home?"

BUXTON: "You mean I can go home?"

YORK: "What would you do?"

BUXTON: "Report to me as soon as you get back."

1941 [3rd and 11th July] U.S. and Soviet Aid to China, 1930-1945 [VII - The Magruder Mission]: [Sub-thread continued from 22nd November 1937] On 3rd July 1941 General George C. Marshall recommends to the White House that the United States should help Chiang Kai-Shek rearm 30 Chinese divisions and also upgrade Claire Chennault's AVG [they start to appear in the media almost immediately as the "Flying Tigers", and the movie comes out in 1944 - Ed.]. On 11th July President Roosevelt approves the proposal, and General Sherman Miles [Wikipedia biography], head of the Army's Military Intelligence Division (MID), sets about "the immediate establishment of an American mission in China" - the American Military Mission (AMM or telegraphic AMMISCA) [check them out]. In September, Miles gives command of that mission to General John L. Magruder [check him out] [sub-thread continues at ??th July 1932]. 1941 [14th July and ensuing weeks] Chennault's Various Air Forces [VI - American Volunteer Group]: [Continued from 9th June 1941] Just arrived after five weeks in transit via Rangoon, Claire Chennault's American Volunteer Group (AVG) now has 68 P-40s and 30 pilots available at Taungou [map] and by late November will organise itself into three squadrons. A week later, the Pearl Harbour attacks will allow their use in combat to be officially recognised rather than diplomatically disavowed [sub-thread continues at 20th December 1941]. 1941 [1st December] Civil Air Patrol Founded: In an attempt to address a congressionally noted shortage of pilots, Texas oilman David Byrd [check him out] helps establish an air cadet club named the Civil Air Patrol (CAP) [check them out], with a chapter in New Orleans ...

RESEARCH ISSUE: We should like to know how many CAP trainees ended up in Claire Chennault's famous Flying Tigers, and, of those who did, how many went on to fly for its successor company Civil Air Transport (CAT) [check them out].

1941 [20th December] Chennault's Various Air Forces [VII - First Blood]: [Continued from 14th July 1941] Now reasonably well equipped, Claire Chennault's American Volunteer Group (AVG) detects, intercepts, and attacks a formation of ten Japanese bombers, accounting for nine of them, and generating morale-boosting headlines over the next few days, during which they are dubbed the "Flying Tigers". The success needs to be seen in the light of four and a half years of hard work and

1942 [3rd February, and rest of 1942] Chennault's Various Air Forces [VIII - AVG Becomes CATF within 10th Air Force]: [Continued from 20th December 1941] On 3rd February 1942 Claire Chennault learns that his American Volunteer Group (AVG) is now to be officially recognised by incorporating it into the U.S.A.A.F. command structure under the provisional appellation 23rd Pursuit Group. However the official orders need to be approved by Chiang Kai-Shek and the reorganisation will not actually take effect until 4th July 1942, by which time the name China Air Task Force (CATF) [Wikipedia briefing] has been selected instead. The new unit reports to 10th Air Force in India. In just over 18 months of operations the new unit will achieve 297 kills and some 150 probables, for the loss of 23 pilots killed and three captured; 12 of the Warhawks will be lost in combat and a further 61 destroyed on the ground (Samson, 1987) [sub-thread continues at 5th February 1943]. 1943 [5th February-19th March, through to mid-1944] Chennault's Various Air Forces [IX - CATF Becomes 14th Air Force]: [Continued from 3rd February 1942] On 5th February 1943, the Commanding Officer of 10th Air Force, Henry H. Arnold [Wikipedia biography] reports upwards that Chennault is an "exceptionally able" tactical commander, BUT dispositionally unsuited to being given strategic independence [Chennault was also regularly at friction with Chief of Staff George Marshall and Burma Commander Joseph Stilwell - Ed.] Despite this damning opinion, on 19th March 1943 CATF is upgraded from being part of 10th Air Force to being 14th Air Force [Wikipedia briefing] in its own right, with Chennault in command. In late 1943 the Japanese 11th Army mounts an offensive in South-Eastern China aiming, amongst other things, to push back Chennault's forward fields and threaten the Burma Road [sub-thread continues at 1st March 1944]. 1944 [20th January] JFK and New Orleans [XII - Alton Avoids Tax]: [Continued from 6th November 1942] Following Partners' meetings and having taken advice from accountants and lawyers, the 1942 Ochsner Clinic, Inc. is re-incorporated as the more tax-efficient Alton Ochsner Medical Foundation.

ASIDE: At least some of the Partners' motivation here was the research grant system, the system by which institutions bid for state-, federal-, or private foundation monies. This is made clear in a 2007 historical review paper by one of the clinic's cardiologists, Hector O. Ventura, thus ...

"In 1944, the founders wanted to expand the Clinic's activities to include areas of public service. More specifically, they were keen on developing programs in research, medical administration, and charity. On the advice of J. Blanc Monroe, the Clinic's attorney, Dr. Ochsner and his colleagues elected to maintain the Clinic for the practice of medicine and established a non-profit foundation to execute all its other activities" (Ventura, 2007, p74).

The clinic henceforth leases everything from the foundation "in order to receive tax exempt donations from [the public]" (Caldwell, 1965, p19). The well-connected businessman Theodore Brent [check him out] is made a lay trustee. One Thomas Findley [check him out] becomes Research Director, and Otto

1944 [1st March] Chennault's Various Air Forces [X - "Operation Matterhorn"]: [Continued from 5th February 1943] Chennault’s 14th Air Force now finds itself seriously restricted operationally by the need to support "Operation Matterhorn" [Wikipedia briefing], plans to station a strategic long-range bombing force of (initially) 150 B-29s at Chengdu [map], in east-central China, from 1st March 1944. Chennault is deeply concerned over the command structures here, because he does not want to see his tactical strike strength constantly syphoned off to provide fighter cover to the strategic bombing offensive. In the event the B-29s are allocated a dedicated protection wing of 200 long-range P-51 Mustangs. Japanese land forces, meanwhile begin a full-blown offensive in the direction of Changsha [map] in May 1944 [sub-thread continues at 6th June 1944]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = THE DEVICES OF CRYPTO-IMPERIALISM]

1944 [6th June, then through summer] Chennault's Various Air Forces [XI - Stillwell Drops In]: [Continued from 1st March 1944] Chennault is visited at Kunming by Burma Road commander Joseph Stillwell - with whom he famously has a "long-lasting disruptive feud" (Samson, 1987/2012, Kindle2989) - to resolve supply difficulties over the Burma-China land-air route. Chennault is able as a result to support a 20th Air Force B-29 raid on Yawata, on the Japanese mainland, on 15th-16th June [Wikipedia briefing]. Changsha will fall 18th June, causing Chennault's screen of fighter strips to be pulled back. The long-range raids continue through the summer, draining scarce resources from Chennault's 14th Air Force, unwisely in Chennault's opinion because the effort would have been better directed against the already depleted Japanese merchant fleet than against their heavy industry at home. The summer also sees Chennault giving support to Dave Barrett's Dixie Mission [check it out], President Roosevelt's high-level, but ultimately unsuccessful, exploratory talks with the Chinese Communists in Yenan. By November 1944, Chennault will have 36 squadrons at his disposal, but the Japanese land advances nevertheless continue through that winter [sub-thread continues at 29th August 1944]. **ASIDE:** Once the D-Day landings had taken place, a "Communications Zone" existed between the ports of supply and the often highly fluid fighting line. By late Summer 1944 the Allied advance was actually being severely held up by lack of fuel and ammunition, and by the not inconsiderable problem of "displaced persons" and prisoners-of-war crowding the communications zone. As a result, various logistical and administrative command sections were put in place to ease this situation. Oise Section was one of these, receiving supplies from the south-west and moving them toward the front in Lorraine. And because the French railway system had been crippled by the Allied strategic bombing offensive prior to the invasion, this meant trucking the supplies forward using the famous Red Ball Express ...

**ASIDE - THE RED BALL EXPRESS:** The Red Ball Express [Wikipedia briefing] was the everyday name of the convoyed truck system used by SHAEF Sections during the 1944 advance on Germany, to get supplies across the Communications Zone in Northern France from the point of origin to the fighting line. The name derives from the six-inch diameter red roundel mounted on the front fender of the vehicles used, which guaranteed priority of transit through checkpoints and refuelling stations. Some 25,000 personnel and 6,000 trucks were involved at the height of the operation, and by Christmas 1944, when the French railways had been repaired and the red ball convoys were no longer needed, a million tons of supplies had been delivered to the fronts. A post-war War Department cine-documentary shows in greater detail what was involved - YouTube it now - FASCINATING. Naturally enough, the U.S. supply chain became a military target in its own right, and indeed during the December 1944 Ardennes Offensive, Oise Section's available engineers were organised into "Task Force Thrasher" and deployed to the Meuse River crossings in case they needed to be destroyed at short notice in the event of a German breakthrough around Bastogne.

1945 The British physician Charles M. Wilson [by now Lord Moran - Wikipedia biography] publishes "The Anatomy of Courage", in which he sets out "to find how courage is born and how it is sustained in a modern army of a free people" (ix). In this quest he draws on his WW1 experiences as Medical Officer with 1st Battalion, Royal Fusiliers, from which we have selected the following insights. Firstly, concerning courage in general ...

"My job as a medical officer was to value the assets of the battalion - to take stock - to guard against depreciation. [...] I realised that I must live with the men, watch them, listen to them, get to know them, be their friend. I began to divide them into types. There seemed to be four degrees of courage and four orders of men measured by that standard. Men who did not feel fear; men who felt fear but did not show it; men who felt fear and showed it but did their job; men who felt fear, showed it, and shirked" (pp4-5).

On cowardice he points out (Chapter 2 generally) that it is not the same thing as fear, rather it is the dysfunctionality which results when fear is allowed to get the upper hand. On shell shock in particular he distinguishes between "emotional shock" and "commotional shock". The former is a state of extreme fear reasonably occasioned by the horrors of combat and threatening therefore to reduce the sufferer's combat effectiveness. The latter is acute where the former is chronic and insidious, resulting usually from a near-miss experience with a lot of bang but (luckily) with little physical injury.

1947 [27th-30th January, and then rest of year] **Chennault's Various Air Forces [XX - CAT Hauls Freight]**: [Continued from 25th October 1946] CAT's first five planes - military surplus Douglas C-47s - arrive in Shanghai, and the first billable load of UNRRA relief is flown out 3 days later. By 1st July CAT will employ 385 people, will be flying 7 C-47s and 17 Curtis C-46s, and - most importantly - will be making money.

**TECHNICAL ASIDE**: The Douglas C-47 Skytrain [Wikipedia briefing] is the ubiquitous twin-engined "Dakota" transport aircraft, derived in 1941 from the 1935 DC-3 airliner. The Curtis C-46 Commando [Wikipedia briefing] is broadly similar, but in fact better suited to working the Burma-China "Hump".

By the end of 1947 CAT will have flown some two million miles and carried some seven million tons of cargo. On 21st December **Chennault** will marry his Chinese girlfriend **Anna** [check her out] [sub-thread continues at 18th January 1948]. [THREAD = THE SHAPING OF THE MODERN WORLD]

1947 [??th September] **JFK and New Orleans [XXIV - David Becomes a CAP Instructor]**: [Continued from 27th January 1947] **David Ferrie** becomes a Civil Air Patrol (CAP) flying instructor at Cleveland's Hopkins Airport (Baker, 2014) [sub-thread continues at 18th March 1948]. 1948 [18th January and the ensuing 16 months] **Chennault's Various Air Forces [XXI - CAT and Mau's]**: [Continued from 27th January 1947] In a brave attempt to help **Chiang Kai-Shek**'s Nationalists retain control in northern China, CAT begins an airlift of food and ammunition into (and refugees out of) the Mukden sector of Manchuria [sub-thread continues at 3rd May 1949]. [THREAD = THE SHAPING OF THE MODERN WORLD]

**BRIEFING - THE CHINESE CIVIL WAR, ENDGAME 1948-1949**: The Communist Chinese at this time were receiving massive grass-root support from a Chinese peasantry grown sick and tired of the corrupt official government, and were rolling up the Nationalists on all fronts. This is why Samson (1987/2012) closes his account of 1947 with the observation that Chennault "was now ready to go to war for Chiang Kai-Shek - for the second time" (Kindle6770). This time, however, there would be no fighters or bombers, just transports. By 25th May 1948 the Mukden airlift had flown in 2210 tons of flour and brought out 22,173 passengers, including 4571 wounded soldiers (Leary, 2002). CAT's efforts continued until the city fell 31st October 1948, whereupon the airlift switched to the defence of Taiyuan. Over the winter 1948-1949 it was not unknown for CAT aircraft to fly ground support missions as well as logistical, and at least one U.S.M.C. plane had CAT markings on it (Ibid.). Taiyuan and Nanking fell 24th April 1949, and when Shanghai followed 2nd June 1949 the People's Liberation Army had free rein to cross the Yangtze River and roll up what was left of the Nationalists in southern China.

1948 [1st March-8th May 1958] **Costa Rica, 1871-2018 [V - The Figueres/Ulate Years, 1948-1958]**: [Continued from 8th May 1940] Costa Rica's 1948 presidential elections witness a contest between **Rafael Calderón** [check him out] going for a second term after four years out of office, and **Otilio Ulate** [check him out]. Ulate scores a clear win with 55% of the vote, but Calderón refuses to accept the result, alleging vote-rigging. The incumbent **President Picado** [check him out] still has three months to run of his four year term in office, but his attempts to find a successor are interrupted by an armed uprising by a junta led by left-winger **José Figueres** [check him out], who is duly proclaimed Provisional President on 8th May 1948. There follows a period of out-and-out civil war during which Figueres forces through no less than 834 reforms, completely modernising the country. He then steps down 8th November 1949 in favour of the 1948 President-Elect Ulate, who then serves a full term to 1953. Figueres is then rewarded with a term with democratic mandate between 1953 and 1958 [sub-thread continues at 8th May 1958]. [THREAD = THE SHAPING OF THE MODERN WORLD]

1948 [18th March] **JFK and New Orleans [XXV - Lee Moves School]**: [Continued from 7th September 1947] **Marguerite Oswald** moves house again. In amongst the first list of tenants is **William G. Gaudet**,
a South American commodities analyst and sometime CIA operative [sub-thread continues at 31st July 1948].

Chennault puts a case to the Senate Armed Forces Committee to re-activate the AVG [see this thread, entry V, 9th June 1941], only directed this time against Mao Zedong's Communists and preferably with both an air and a ground presence. To his chagrin, Secretary of State Dean Acheson pours cold water on the plan. The Communist advance accordingly continues apace, and on 1st October 1949 Mao formally proclaims the People's Republic of China. But by then, however, Chennault has "found another organisation in Washington more sympathetic toward his ideas, one that shunned the light of publicity: the Central Intelligence Agency" (Leary, 2002, p70) [sub-thread continues at 4th October 1949]. ***** "IGNORANCE IS STRENGTH" *****

1949 [8th June] Inspired in part by Jack London's (1908) "The Iron Heel" [see 24th August 1908], the British novelist George Orwell [check him out] publishes "Nineteen Eighty-Four" (Orwell, 1949 [Kindle; full text online; Wikipedia synopsis]), regarded by many as the class-defining dystopian novel. The work is noteworthy in the present context (a) for depicting a world of endless war, (b) for showing how black becomes white as soon as a savvy enough government says that it is, (c) for depicting a world of endless surveillance and the instant and merciless repression of dissent, (d) for a world in which history is constantly being selectively edited so as to justify the present (the hero of the work is employed doctoring back numbers of The Times), and (e) for inventing the syntax and vocabulary of an entire new language - "Newspeak" - specifically designed to suppress dissent. Here are some of Orwell's handiest new words ...

Doublethink: To so train a population's memories that a new and officially promoted reality emerges. Often involves holding "simultaneously two opinions which cancelled out, knowing them to be contradictory and believing in both of them".

EXAMPLE: To be told that the chocolate ration has just been raised to 20 grammes a week, when yesterday it had been thirty grammes a week. For additional examples, just turn on your fucking television.

Duckspeak: To quack like a duck, that is to say, to speak without engaging your brain, as when reciting official government mantras.

Ministry of Love: The Gestapo on steroids (and then some); keepers of the dreaded Room 101, wherein you will learn to Doublethink, for they know - better than you know it yourself - what really scares you.

Ministry of Truth (Minitrue): The Ministry of Propaganda. Works to the dictum IGNORANCE IS STRENGTH. Scriptwriters for the ubiquitous telescreens. [In 2018 we might perhaps rename it the Ministry of Unfake?]
Room 101: See Ministry of Love.

Thoughtcrime: Dissent.

Thought Police: Those within the Ministry of Love charged with fighting Thoughtcrime; who came - invariably at night - and who can erase not just you, but all reference to you.

1949 [1st August] JFK and New Orleans [XXX(a) - Alton Takes Advice]: [Continued from 10th March 1949] The Trustees of the Alton Ochsner Medical Foundation now take advice on how best to obtain donations toward a permanent hospital on the nearby "Riding Academy" site, at 1516 Jefferson Highway [map]. The campaign will begin 31st March 1950 with a $4 million target, and succeeds in raising nearly $1 million in its first year. The balance of the purchase price will then be commercially financed or grant-aided. When refurbished the premises will be known as the Ochsner Foundation Hospital [sub-thread continues at NEXT ENTRY]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1949 [1st August or hereabouts] JFK and New Orleans [XXX(b) - Robert Founds a Department]: [Continued from PREVIOUS ENTRY] Around this time, Tulane Medical School's latest professorial signing, Robert Heath [check him out - VERY IMPORTANT], is creating that university's new Department of Psychiatry and Neurology. Aged only 34, he is already a pioneer in microelectrode studies in human subjects, and his PubMed profile [check it out] indicates that his specialisms over the next couple of years will be psychosurgery and the cognitive neuropsychology thereof.

ASIDE - PSYCHOSURGERY AND COGNITIVE NEUROPSYCHOLOGY: Psychosurgery - commonly and not entirely accurately known as "lobotomy" - is the medical practice of more or less grossly resecting or ablating brain tissue. Cognitive neuropsychology is the associated non-medical practice of theorising as to the structure and workings of the human mind based upon observations of what subjects can and cannot do following psychosurgery (or - indeed - the full gamut of naturally occurring brain lesions). There is a quick introduction to psychosurgery in Section 3 of the present author's 2003 podcast on "Frontal Lobe Syndrome" - click here. There is a quick introduction to the science of cognitive neuropsychology in the present author's 2002 précis on "Ellis (1982)" - click here.

Heath's first tranche of research bids will be directed into the Tulane Electrical Brain Stimulation Programme, 1950-1970 (as critiqued in Baumeister, 2000, Casey, 2015, and O'Neal et al., 2017). He will often publish jointly with Johns Hopkins' even more prolific Arthur Earl Walker [Wikipedia biography]. Heath is thus something of a lucky catch for Tulane, and we shall be hearing more of him in due course [sub-thread continues at 22nd February 1950]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1949 [4th October] Chennault's Various Air Forces [XXIII - CAT Goes Dark Again]: [Continued from 3rd May 1949] Following Secretary of State Dean Acheson's refusal to sanction official U.S. military support for the crumbling Nationalists, the matter of covert rather than overt military operations against the Communists is resolved by CAT being taken over on a hidden budget by the CIA's Office of Policy Coordination (OPC) [check them out].

ASIDE - A QUICK REMINDER: The OPC was formed 1st September 1948 under the direction of Frank Wisner [check him out], and has already conducted covert operations in Europe.
Under the terms of the government take-over, CAT is advanced $200,000 toward costs on 4th October 1949, and the first OPC flight will take place 10th October. Wisner assigns an experienced upriver pilot named Albert T. Cox as tactical commander of the China operation [sub-thread continues at 29th November 1949]. [THREAD = THE SHAPING OF THE MODERN WORLD]

1949 [6th October] The 1949 Mutual Defense Assistance Act: President Truman signs the Mutual Defense Assistance Act into law, thus authorising the United States to supplement its diplomacy "by furnishing military assistance to foreign nations". Insofar as this Act will henceforth be applied to Latin America, it helps expand the School of the Americas [check it out] [THREAD = THE SHAPING OF THE MODERN WORLD]

1949 [29th November-5th January 1950] Chennault's Various Air Forces [XXIV - CAT becomes CATI]: [Continued from 4th October 1949] With its Nationalist stockholders now in exile in reduced circumstances on Taiwan, talks begin concerning how best to transfer the assets of CAT to American rather than largely Chinese ownership. Over the coming months, therefore, the air fleet is transferred to a new company, Civil Air Transport, Incorporated (CATI), although - confusingly - it continues to fly and market itself as CAT. After the fall of Chungking 30th November and Kunming 10th December CAT, along with CNAC and CTAC, moves its aircraft into Taiwan, the British colony of Hong Kong, and similar offshore safe havens. However, because Hong Kong is now facing large numbers of Communists lined up along its "New Territories" border, this move rapidly brings CNAC and CTAC into conflict with the British authorities there, who have been instructed by Clement Attlee's left wing government in London not to take sides. Nor can the aircraft simply be handed over to the Communists, thus ...

"During the waning months of 1949, as the Nationalists faced final defeat on the mainland, CAT officials [...] fought political and legal battles to keep the bulk of China's air transport fleet out of Communist hands. [...] Based in Hong Kong since the fall of Shanghai in May 1949, CNAC and CATC had been operating sporadic air service to Nationalist-held areas [...] and the defection of the general managers of both airlines to Peking with twelve fully manned aircraft [on 9th] November was a shock. Seventy-one transports, including modern Convairs and DC-4s, remained on the ground in Hong Kong." ...

ASIDE - "CONVAIRS": Probably Convair CV-240s [Wikipedia factsheet].

ASIDE - DC-4: Basically a four-engined variant of the older DC-3, the Douglas DC-4/C-54 Skymaster [Wikipedia factsheet] was the workhorse of international air travel and airlift throughout the 1950s. Just such an aircraft - perhaps even one of those referred to here - features large in the entry for Robert Vinson [COMPULSORY READING] on the afternoon of the JFK Assassination, in Dallas, without markings.

... "Communist authorities promptly claimed the aircraft as the 'sacred property' of the Chinese People's Republic, Chennault and Willauer reacted with surprise and dismay to news of the defection. Communist control of the aircraft, they feared, would place the final resistance of Chiang Kai-Shek on Taiwan in grave danger [from Red paratroops]. [...] In an effort to prevent the aircraft in Hong Kong from falling under Communist control, Willauer offered the services of CAT. [...] On November 13 the Nationalist Civil Aeronautics Administration in Taiwan suspended the registration certificates of the aircraft. Three days later [...] a squad of [...] guards went on duty to prevent removal of the transports. Willauer personally led a group of CAT pilots and crew chiefs in a midnight foray to the airport, where they immobilised the aircraft, at least temporarily, by letting all the air out of the tyres. [...] On November 17 Sir Alexander Grantham [Wikipedia biography], governor of the colony, announced that no aircraft would be permitted to depart for the mainland [...] Unwisely, however, he] ordered the removal of CAT's security force [whereupon local Communist sympathisers] took physical possession of the aircraft. [...] Their plan to act as agents for the Nationalists a failure, Chennault and Willauer realised that the only remaining chance for success lay in transfer of the equipment to American ownership" (Leary, 2002, pp91-93).

On 15th December, former OSS chief William Donovan is able to inform Foreign Office contacts in London that CNAC and CATC are now in American ownership. They were not, however, actually in American possession, and little will now happen until the British Privy Council rules on the case in 1952 [see 28th July 1952] [sub-thread continues at 5th January 1950]. 1950 [5th January] Chennault's Various Air Forces [XXV - CAT Puts Its Feet Up]: [Continued from 29th November 1949] On 5th January 1950 President Truman announces that the U.S. will not occupy Taiwan, preferring to rely instead on a protective screen to be provided by the U.S. Seventh Fleet. CAT, meanwhile, with nobody left on the mainland to support, is effectively grounded on Taiwan for lack of orders, and lives off handouts from the OPC [sub-thread continues at 13th March 1950]. 1950 [22nd February] JFK and New Orleans [XXXI - CAP Moves Into Trade Mart]: [Continued from 1st August 1949] One of Clay Shaw's newest tenants at the Trade Mart is the office of the Louisiana Wing of the Civil Air Patrol (CAP) (Carpenter, 2014) [sub-thread continues at 9th January 1951]. 1950 [13th March through to that summer] Chennault's Various Air Forces [XXVI - CAT becomes CIA Air]: [Continued from 5th January 1950] After some months in deliberation, the State Department and the Joint Chiefs finally approve CIA support for CATI, thus ...

"The situation in the Far East - with mainland China gone and Ho Chi Minh's activities in Indochina becoming more serious - apparently spurred the CIA to do something concrete. While the United States still had not reversed its policy on the Nationalists on Taiwan, covert activities were permissible. The CIA was beginning to act as it did in later years - unilaterally. The agency's bankers advanced CAT $350,000 on March 24, to clear up bills such as payroll, gasoline debts, and supply bills. In addition, $400,000 was to be paid to fund operating deficits until mid-June. The bankers - 'undisclosed principles' in CIA parlance - would then have the option to purchase the airline for $1 million. [...] The infusion of CIA personnel into the airline was done so slowly and so subtly that many regular employees never suspected the company was becoming a front for covert activities. To look legitimate, CAT continued its regular commercial operations" (Samson, 1987, Kindle7273-7292).

On 24th April Hainan Island is captured by the Communists and Chennault makes arrangements for his administrative centre to relocate to Tokyo. Then, on 25th June, North Korean troops invade South Korea, whereupon (on 28th) CIA Director Roscoe Hillenkoeter [check him out] approves the CIA purchase of CATI in its entirety. Henceforth the aircraft will fly in mission-appropriate livery - sometimes bright and obvious, sometimes drab and anonymous. Even their allies the Nationalists are kept in the dark, because aid will on occasions be flown to "Third Force" independent warlords, who hate both Chiang and Mao alike [sub-thread continues at 23rd August 1950]. 1950 [1st May] Germ Warfare [The Supporting Research, Post-WW2 (The Wells and Riley Studies)]: [Continued from TBA] The American Journal of Public Health publishes a paper by the CDC's newly appointed chief epidemiologist Alexander D. Langmuir [check him out], et al. entitled "Air sanitation (progress in the control of air-borne infections)" [full text online], in which the authors - one of whom is William F. Wells - review recent publications not just in the field of sanitary ventilation (Wells' specialism), but also concerning "the potential importance of the air-borne route in biological warfare" (p82). This division of effort reflects the sad fact that microbes and/or microbial toxins are no longer matters for physicians and public health officers to worry about, but are also being inexorably militarised [the <Wells and Riley studies> continue at 3rd September 1955 in this companion resource]. 1950 [8th-11th June] World Brotherhood Founded: Between 8th and 11th June 1950 American evangeliser Everett R. Clinchy [check him out ESSENTIAL PRIOR CONTEXT] chairs the conference in Paris at which the World Brotherhood (Fraternité Mondiale) [ditto] is formally constituted, explicitly as a Godly bastion against Communism. This from the Web 5th August 2021 (auto-translated from the organisation's French Wikipedia entry) ...
“More than 150 people from 12 nations, Europe (France, FRG, Italy, United Kingdom, Ireland, Switzerland, Belgium, the Netherlands mainly) and North America, attend. The conference is supported by US President Harry Truman, General Lucius D. Clay [... four other names listed]. According to [its Chairman, the Manhattan Project physicist Arthur H. Compton [Wikipedia biography]], World Brotherhood brings together ‘those who consider that (…) under the gaze of God, it is man that counts, and not the State. Judeo-Christian civilization, including democratic freedom, faces the greatest danger of the modern era [because of] the dictatorial forces of communism. The need for military defence is obvious, as is the need to maintain our economic strength. What is not so obvious is that the courage and determination to go forward in our defence can only be sustained if the free peoples of the world recognize that they have an objective reason to defend themselves. It seems to me that World Brotherhood fulfils this objective.” (Source)

**ELEPHANT IN THE ROOM:** There is little doubt that the World Brotherhood would have been used - we guess without the knowledge of some of its officers - as a cover operation for CIA infiltration of the countries wherein it operated. 1952 [17th June-18th June 1954] **Guatemala, 1898-2018** [V - The 1952 UFCO Expropriations]: [Continued from 15th March 1951] As the centrepiece of his economic policy, President Árbenz signs off the "Decree 900" Agrarian Reform Law [Wikipedia briefing]. One of the targets of this new law is the United Fruit Company (UFCO) [check them out], in that they are regarded (with no little justification) by Árbenz as little better than a bunch of slave owners who have brought mediaeval feudalism into the 20th Century. He duly begins compulsory purchases of UFCO land (about one twelfth of their three million acres, only some 5% of which was actually planted anyway).

**ASIDE:** Árbenz had devised the fiendishly clever plan of setting high rates of compulsory compensation, but assessed against the previous year's tax returns. So if you had been deliberately under-declaring your value, then you had been too clever for your own good. UFCO, who had last valued their land at $627,572, now decided that it had really been worth some $16 million. It would be interesting to know whether UFCO was contributing more to the Guatemalan economy of the mid-20th-Century than Amazon and Starbucks do for the economy of Britain in 2018. If anyone out there can do this sum please contact the author.

In August 1952 the Wrigley Gum Company likewise felt the sting of compulsory purchases of its chicle - edible rubber - plantations, and retaliated by stopping buying Guatemalan chicle altogether [sub-thread continues at 18th June 1954]. [THREAD = THE SHAPING OF THE MODERN WORLD]

However Heath is definitely NOT listed as having attended 12th May 1954 the First Psychochemical Conference at the same venue - see the Conference Report (Marrazzi, 1955). 1954 [12th June] JFK and New Orleans [XLI - Ochsner Foundation Hospital Opens]: [Continued from ??th March 1954] Alton Ochsner's new Foundation Hospital opens for business, transferring 134 patients across from the henceforth-defunct Camp Plauche site by lunchtime (Caldwell, 1965) [sub-thread continues at ??th January 1955], [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

ASIDE: The CIA's professed motivation for engineering this coup is set out in the State Department White Paper entitled "Intervention of International Communism in Guatemala" (Department of State, August 1954 [full text online]). This document directly addresses the United Fruit Revenge meme, characterising the entire story as Communist propaganda, and rather haughtily dismissing the suggestion as absurd. Instead, Secretary of State John Foster Dulles proudly claimed that the United States had brought Árbenz down in order "to inspire men everywhere". One recent recruit to the CIA's Miami Station was David Morales [check him out], believed by many to have been in Dealey Plaza on 22nd November 1963, and their man in Guatemala City was master of the false trail narrative Birch O'Neal [check him out].

Castillo Armas crosses the border 18th June 1954, preceded by a fifth column of saboteurs, covered by his own private U.S.A.F. wing (reportedly four F-47N Thunderbolts and a P-38L Lightning), with the U.S. Navy standing by, prevented from receiving United Nations help by the stonewalling of U.N. Ambassador Henry Cabot Lodge, Jnr., and - above all - pre-legitimised by an ongoing programme of CIA disinformation. Árbenz resigned on 27th June 1954 and took protective exile in the Mexican Embassy. The ensuing 1954 elections returned Castillo Armas as a dictator (only one candidate), whereupon he carried out a stringent and not infrequently bloody purge against Árbenz' network of political and trade union supporters. At the same time, the CIA fabricated documentary evidence of black doings on Árbenz' part during his administration in order to minimise world sympathy for his case. Castillo Armas then repealed the Agrarian Reform Law and freed up the exportation of unrefined oil. He will be assassinated 26th July 1957, and - strangely - eulogised as "a great loss ... to the entire free world" [sub-thread continues at 2nd March 1958]. [THREAD = THE SHAPING OF THE MODERN WORLD]

wishing to relocate south of the 17th Parallel. Between 22nd August and 4th October CAT will fly out 19,808 such political and military refugees. This operation required CAT to liaise with the Saigon Military Mission (SMM) [Wikipedia briefing], the CIA's command structure in South Vietnam.

ASIDE - EDWARD LANDSDALE IN SAIGON: The SMM was headed at this time by a latter-day king-maker named Edward Lansdale [check him out - RECOMMENDED]. We shall be meeting him again 11th May 1961 [q.v.] when he is selected to mastermind covert operations against the Castro Administration in Cuba, on 2nd November 1963 [q.v.] when he masterminds the coup/assassination of South Vietnamese President Ngo Dinh Diem, and again in Dealey Plaza 22nd November 1963 [You Tube him now] when - to be frank - historians are still trying to figure out who the mastermind was (but there are few better qualified than he).

Operations will continue in Indochina up to, during, and out the other side of the Vietnam War, albeit the name and corporate structure of the airfleets involved will change from time to time [sub-thread continues at 13th September 1954]. [THREAD = THE SHAPING OF THE MODERN WORLD]

1955 [26th April] JFK and New Orleans [XLIII - Alton's P.R. Stunt Fail]: [Continued from ???th January 1955] In what will shortly turn out to be a painfully foolhardy P.R. stunt, Alton Ochsner affirms his faith in the Cutter Labs polio vaccine by publicly inoculating his grandchildren. The very next day, public health authorities in California suspend that vaccine's use because children there have become infected by it with the live disease. Tragically, this is exactly what then happens to his grandson, who dies, aged 30 months, 5th May [sub-thread continues at 13th May 1955]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1955 [Friday 13th May] JFK and New Orleans [XLIV - David Gets a Request He Can't Refuse]: [Continued from 26th April 1955] This is the date given in David T. Beddow's (2019) novelised docudrama "A Ferrie Tale" [Amazon - RECOMMENDED] for David Ferrie to have possibly received a telephone call from minor New Orleans villain Charles "Dutz" Murret, who needs, he says, a "personal favour". Murret goes on to explain that he would like Ferrie to take his 15-year-old nephew - a certain Lee Harvey Oswald - into his Civil Air Patrol (CAP) squadron "and teach him some discipline". Ferrie agrees to do what he can.

ASIDE - FERRIE AND LHO: Beddow mentions in passing that at this time Ferrie was taking a philosophy course at Tulane, and was spending a lot of time over at the Medical School watching demonstrations by Robert Heath [see this sub-thread 1st August 1949 and ???th March 1954]. These demonstrations involved "prisoners from the state mental hospital" being "hooked up to wires and electrodes". We find no great problem with Beddow's suggestion given what else we know about Heath's research at this time [see, for example, this sub-thread 1st November 1955]. Beddow also first-mentions Ferrie keeping a primitive animal research house of some sort.

Beddow dates LHO's first attendance at Moisant Field as 10th June [sub-thread continues at 15th June 1955]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

engineering prowess at the Brno Exhibition Centre. Clay Shaw is quickly contacted by the CIA, wondering whether he might be going and suggesting some observations he might like to make while over there. CORROBORATION: This is not inconsistent with the deposition made 15th December 1978 to the House Select Committee on Assassinations by CAP instructor (subsequently corporate attorney) Jerry C. Paradis - see HSCA full text online (scroll to p114).

In his 2019 novelised docudrama "A Ferrie Tale" [Amazon - RECOMMENDED] David T. Beddow has it that Ferrie took LHO to his home at 209 Vinet Avenue after the bivouac, showed him gun collection and his animal house, and made a (firmly rejected) homosexual pass at him [sub-thread continues at 10th October 1955]. 1955 [1st November] JFK and New Orleans [XLVIII - Robert Gets a Publication]: [Continued from 10th October 1955] This month's Journal of Nervous and Mental Disease carries the latest paper by Robert Heath. The five authors on this occasion are fellow neuropsychiatrist Henry Lesse [check him out], Heath himself, Walter A. Mickle [no convenient biography], Russell R. Monroe [no convenient biography, but several easily located obituaries], and William H. Miller [no convenient biography]. The title of the paper is "Rhinencephalic Activity in Thought" ...

and it describes observations of - and contingent correlations between - the upper and lower brain separately at work. Here are a few lines from the paper's introductory paragraphs ...

"This report concerns findings from four patients selected because they were relatively cooperative reporters during interview. Three were chronic schizophrenics. The fourth was being treated for intractable pain. [...] Recording electrodes were 1 mm. silver ball contacts implanted by use of stereotaxic coordinates [...] Electrical recordings were obtained from at least five sites in each of the three psychotic patients. These included [six sites within the subcortical Limbic System - the aforementioned Rhinencephalon - , plus] frontal and parietal cortex. [...] Corticograms and subcorticograms were recorded by a standard 8-channel Grass electroencephalograph" (Op. cit., p433).

Dr. Monroe would later be identified as principal researcher for army contract DA-18-CML-5596, in the programme "Neurologic and Psychiatric Changes During the Administration of Certain Drugs", specifically LSD and Mescaline. Dr. Mickle likewise - check out his publications for the late 1950s at ResearchGate. This cluster of research projects is nowadays commonly viewed retrospectively as
the "Tulane Brain Stimulation Programme" [check it out]. The programme drew many of its human subjects from the third floor chronic psychiatric wing of the adjacent Charity Hospital, and resourced lab animals from, amongst others, David Ferrie [see ??th December 1956]. The present author taught neuropsychology for 20 years and will be happy to respond to emails from researchers on the still unsolved relationship between brain and mind [sub-thread continues at 30th June 1956]. 1956 [24th October-18th January 1957] JFK and New Orleans [LII - Lee Joins The Marines]: [Continued from 3rd October 1956] Shortly after his 17th birthday, LHO joins the U.S.M.C. and goes off to Marine Corps Base Camp, Camp Pendleton, 40 miles north of San Diego CA. He is a very proud young man [Wikipedia image]. On 30th October he scores two points below average on aptitude tests ...

ASIDE - 48TH PERCENTILE: Aptitude tests are frequently "standardised", that is to say, calibrated so that a score of 50% is the population average. This is why we are often reminded that half of us are by definition "below average". Whilst that statement is undeniably true, a more meaningful truth would be to state that slightly over a third of us are consummately "average". A score of 48% is accordingly not at all concerning, indeed, other assessments give him an IQ of 118, which is in the 88th percentile for intelligence! For more on the statistics of standardised test scores, see this Wikipedia briefing or email the author.

In all, he will undergo ten weeks of boot camp [sub-thread continues at ?9th December 1956]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

***** IMPORTANT - READ THIS CAREFULLY *****

1956 [??th December] JFK and New Orleans [LIII - David Starts a Sideline]: [Continued from 24th October 1956] David Ferrie is reported around this date to be running a backyard animal laboratory at 209 Vinet Avenue [map], where he keeps just about the full research menagerie, from small rodents to monkeys. It is highly likely that this has been arranged by Tulane Medical Center's Robert Heath, as an outstation for his Tulane Brain Stimulation Programme [check it out], although it remains to be established whether Ferrie is servicing particular researchers or just offering an on-demand facility ...
ASIDE: In his 2019 novelised docudrama "A Ferrie Tale" [Amazon - RECOMMENDED] David T. Beddo suggests that this facility had been active at least as early as 13th May 1955 [q.v.]. Either way it was the first of two such operations, this one serving the Tulane Medical Center, and a later one at 3225 Louisiana Avenue Parkway serving Mary Sherman’s project at the Ochsner Foundation Hospital in the early 1960s. The exact nature of Ferrie’s Tulane involvement is not on record, but PubMed lists no publications to his name so he is best regarded as having been lab assistant, pure and simple. Heath’s personal publications in this period are all to do with human subjects, not animals, so he can safely be ruled out [little is known, of course, about his defence-classified work - Ed.]. However in his department as a whole there seems to have been a lot more research with animals. In her (long-overdue) 2018 book "The Pleasure Shock" [Amazon - RECOMMENDED], biographer Lone Frank remarks as follows ...

"[In 1951 Heath] ruled supreme over two floors of the new, boxy building on Canal Street where Tulane University had consolidated its medical research facilities. [...] he had access to a seemingly endless supply of cats and monkeys ..." (pp18-19).

"The septal¹ of countless cats - a favourite experimental animal for the nascent field of neuroscience - were surgically removed, to see what would happen" (p30).

"a handful of Rhæs monkeys with electrodes implanted in their cranium were regularly stimulated in the septum¹” (p31).

"Heath hired a biochemist and started collecting blood from [schizophrenic humans] and injecting monkeys with it. The animals appeared to react with schizophrenic symptoms” (p75).

"[In 1977] Robert Heath stated to the New York Times that in 1957 he had tested a drug for the CIA - so-called bulbocapnine - and that the testing involved three Rhesus monkeys [...] and [...] an inmate of Angola prison” (pp142-144).

'SEPTUM [Pl. SEPTA]: See our 2003 course notes on the Limbic System.

Here are two lists identifying Tulane researchers in this era. LIST A shows researchers with whom Heath co-wrote papers (masked 1953-1957), but who - this being common practice - were often affiliates of other universities in other cities. LIST B adds the names of Tulane researchers not lucky enough to co-publish with their Head of Department ...

LIST A: C. Angel [see own entry]; Hal C. Becker [see own entry]; M. Cohen [see own entry]; Charles Fontana [see own entry] (electroencephalography); W. L. Founds [see own entry]; H. E. Himwich [see own entry]; G. Jefferson [see own entry]; B. E. Leach [see own entry]; H. Lesse [see own entry]; R. C. Llewellyn [see own entry]; S. Martens [see own entry]; W. A. Pool [see own entry]; Donald Richardson [see own entry]; G. Von Bonin [see own entry]; A. E. Walker [see own entry]

LIST B: Frank Elvin [see own entry MAJOR ANIMAL RESEARCHER]; Francisco Garcia [see own entry]; Robert Hodes [see own entry]; H. E. King [see own entry]; Harold Lief [see own entry]; Arnold Mandell [see own entry]; Charles O'Brien [see own entry]

Whatever the backstory, Tulane would certainly have paid Ferrie for his trouble and charged that outlay in turn to whoever was grant-funding the project(s) in question. Moreover the extent of his involvement was enough to prompt one contemporary witness to remark that he "was constantly at Tulane during those years" (Anthony Atzenhoffer, cited in Baker, 2014). Indeed, there is a strong suspicion that in addition to minding the research animals for Tulane he also mined his students in the Civil Air Patrol (CAP) for human volunteer subjects. It is even possible that Ferrie took part personally in dodgy drug evaluation trials, at no little cost to his health in general and his body hair in particular [sub-thread continues at 21st December 1956]. 1956 [21st December] JFK and New Orleans [LIV - Lee Becomes a Sharpshooter]: [Continued from ??th December 1956] During his final weeks in boot camp, LHO passes his musketry training with a 212 sharpshooter rating. After Dealey Plaza it will be hotly debated whether LHO was a good enough rifleman to have fired the fatal shots fast enough and straight enough to have been a Lone Assassin. Swike (2008) has him as "an excellent shot" (Kindle302), for example, whilst Hurt (1986) remarks on his reputation as a "shitbird" [U.S.M.C. slang for poor shot] and Jesse Ventura - himself an expert shot - points blame not at the rifleman but at the Mannlicher Carcano rifle, which, to put it politely (which Ventura doesn't), was just not up to the task - YouTube him now [EXPLETIVE ALERT. OUR VERDICT? A Lone Assassin would have been very lucky to get a single hit from the TSBD Snipers’ Nest, and would only have been able
to fire twice in the time available. A professional sniper team would neither have shot from the TSBD, nor used a Mannlicher. [sub-thread continues at 18th January 1957]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

He is then sent on an Aircraft Control and Warning Operator (ACWO) course at Keesler AFB, Biloxi, MS [Wikipedia briefing], passing out 17th June as 7th in a class of 30. On 25th June he is rated occupation specialist in AEO [=Aviation Electronics Operator] with a Confidential security rating [sub-thread continues at 9th July 1957]. [THREAD = THE SHAPING OF THE MODERN WORLD]

HISTORICAL ASIDE - EL TORO: Between 1943 and its closure in 1999, El Toro was "the largest Marine air station on the West Coast".

He will be there for the next six weeks, undergoing further training in his radar operator specialism [El Toro is also MACS-1 headquarters base - Ed.] and, perhaps, beginning to learn Russian (which has been a sure and certain career aid in the American armed forces since 1917) [sub-thread continues at NEXT ENTRY]. HISTORICAL ASIDE - ATSUGI: Atsugi was a major Japanese airbase during WW2, and was duly taken over as their own by the U.S. Occupation Forces in 1950 to help secure the Pacific Rim during the Korean War and thereafter. MACS-1 was part of Marine Aircraft Group 11 (MAG-11) [Wikipedia briefing], which in turn was part of 1st Marine Aircraft Wing [Wikipedia briefing] one of the Aviation Combat Elements of the Fleet Marine Forces (FMF). This is why LHO's archive documents - not least his court martial paperwork - are often signed off by a named officer affiliated like this ...

MACS-1 MAG-11 1stMAW FMF

The CIA also had space on the base for their Joint Technical Advisory Group (JTAG), where they organised infiltration operations against China, North Vietnam, North Korea, and Laos. Civil Air Transport (CAT) aircraft were therefore frequently to be seen. Atsugi became a U-2 base in April 1957, so another compound
hosted "Detachment C". There was also a top-secret nuclear weapons assembly compound - the METO. MAC-1’s job at Atsugi since 1956 had been "the air defence of central Japan" (Swike, 2008, Kindle364), and their radar operators therefore had to cope with C AT and U-2 traffic as well as everything else. The facility features large in Kerry Thornley’s [check him out] 1991 fictionalised docudrama "The Idle Warriors".

1957 [25th September] Saving Indonesia From Itself [I - The NSC Finding]: [New sub-thread] Finding that Indonesian President Sukarno [Wikipedia biography] has been developing too close a relationship with Moscow, the National Security Council (NSC) recommends to President Eisenhower that the CIA be instructed to "employ all feasible covert means" to oust him. They do this by making secret overtures to selected Indonesian dissidents, promising arms and financial backing for an anti-Communist military coup if and when one could be arranged [sub-thread continues at 10th February 1958], [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1957 [27th October] JFK and New Orleans [LXI - Lee On a Charge]: [Continued from 12th September 1957] Alone in barracks, LHO reportedly opens his locker and is shot in the upper left arm when his loaded .22 pistol falls to the floor and discharges accidentally. It is a perfect flesh wound.

**ELEPHANT IN THE ROOM (1):** Self-inflicted wounds are as old as warfare itself, because at the cost of a controlled amount of pain they can get you out of the firing line. It is an extreme form of malingering; of not pulling your weight. Medical Officers are therefore quick to prescribe Court Martial rather than medicine on suspected miscreants (for a quick introduction to malingering as a disciplinary offence, check out the Timeline entries for 8th March 1847 and 8th October 1863). Now according to Hurt (1985) this is precisely the same conclusion that LHO's messmates reached, thus ...

"The incident seemed so contrived - and the wound, according to Oswald's roommate was 'right where it would be if you were going to shoot yourself' - that there was a general assumption that Oswald had shot himself intentionally" (p200).  

**ELEPHANT IN THE ROOM (2):** It follows that if a true patriot wished to go undercover in the persona of a disaffected malingerer, then he might shoot himself on purpose! He would duly be talked about disparagingly by his messmates and this negative chatter would soon come to the ears of those in the off-base dens of iniquity whose confidence he was indirectly trying to gain (that is to say, those whom he wished to infiltrate in the first place). Or to put it very succinctly, LHO was off on a secret mission, and, having chosen <disaffected malingerer> as his cover, coldly put a slug into his own arm ...

**ASIDE:** None of this cover identity stuff is rocket science - the entertainment industry has been devising plot twists of this sort for centuries. We particularly like Richard A. Smith's (2014 [full text online]) thesis "Spying and Surveillance in Shakespeare's Dramatic Courts", in which he analyses spy personae in the 16th Century. More recently, the writers of TV and cinema thrillers have overtaken real-life counterintelligence experts in devising not-what-they-seem heroes and villains - check out the TvTropes entries for <The Infiltration>, <Fake Defector>, <Reverse Mole>, and <Conveniently Unverifiable Cover Story> - FUN AND INFORMATIVE.

Oswald is duly hospitalised until discharged fit for duty 15th November. Meanwhile, because the weapon was personally owned and therefore in violation of a general order, he is put on a charge. Here is an excerpt from the charge-sheet, as reproduced in Swike (2008): "...on or about 2030 hours on 27th October 1957, violate a lawful general order [precise contravention stated] by having in his possession a privately-owned weapon that was not registered" (p731, Attachment 11-1C) [sub-thread continues at 20th November 1957], [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

**THE PSYCHOLOGY OF PERCEPTUAL NARRATIVE:** In 1817 the poet Samuel Taylor Coleridge remarked upon Humankind's ability to "suspend disbelief" when watching drama. We know we are in an auditorium of sorts, we know that the characters are only actors, and we know that they are not speaking their own words but rather the words of the playwright. Nonetheless we instantly engage with the deception, and accept the unreal as real. In our minds we are up on the stage alongside the players. In our minds we are thoroughly grounded in their time, person, and place, rather than in our own. We even freely grant them access to our emotions, hating those whom they hate and loving those whom they love. The underlying cognitive

STUDENT EXERCISE: UNDER CONSTRUCTION

1957 [20th November] JFK and New Orleans [LXII - Lee Goes On Manoeuvres]: [Continued from 27th October 1957] LHO is part of a MACS-1 detachment which sails for the Philippines aboard the LST USS Terrell County. They arrive Dingalan Bay on the eastern coast of Luzon, from where they take part in Operation PHIBLINK ...

ASIDE - OPERATION PHIBLINK, NOV-DEC 1957: "A three-phase exercise covering shore training, amphibious reconnaissance, and amphibious landings in the Philippine Islands". One presumes that the detached elements of MACS-1 were working up the structures and procedures necessary to integrate the air defence of the Philippines with that provided to Japan by their colleagues back at Atsugi. The two stations could also cooperate in the defence of Taiwan, one sky-watching from the north-east, the other from the south-east. Certainly tensions were running high in the Straits of Taiwan and the entire South China Sea at this time [no change there, then - Ed.], so there was no shortage of potential targets to track.

At the end of the exercises, MACS-1 (Detached) puts in to Subic Bay 31st December 1957, where it will spend the next five or six weeks attached to the Cubi Point Naval Air Station. And Cubi Point, according to Hurt (1985), is presently the other U-2 base in the Western Pacific. Since these are the decisive weeks in the Indonesian Coup operation it is perfectly likely that they are providing live air traffic control for both the black ops against President Sukarno and the U-2 flights supporting those black ops. There is also the strong possibility that the station stays on the air through to 24th March [q.v.] and beyond in order to support the follow-on (but far more effectively concealed) Operation ROBIN HOOD [sub-thread continues at NEXT ENTRY]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [1st March-7th March] JFK and New Orleans [LXV - Lee Goes On Manoeuvres Again]: [Continued from 7th February 1958] LHO's MACS-1 detachment provides air control support out of Corregidor to Operation STRONGBACK ...

**ASIDE - OPERATION STRONGBACK, MAR 1958:** This exercise simulated a U.S. counter-attack against an AGGRESSOR - that is to say Communist China or perhaps a presently very irate Indonesia - should they attempt landings on the Philippines, thus ...

"1. CONCEPT. a. PHIBLEX 58M (Exercise STRONGBACK) involves the commitment of a Marine Expeditionary Force comprised of the 3rd Marine Division (-) and the 1st Marine Aircraft Wing (-), plus certain Armed Forces of the PHILIPPINES in a major combined amphibious and land supported exercise on LUKOZ ISLAND to aid friendly nation destroy an AGGRESSOR invader. [...] 2. MISSION. The 1st Marine Aircraft Wing will move by air and surface lift to the objective area and will provide aircraft and air control facilities for tactical air support and air movement." (Contemporary Operational Briefing, now unclassified [full text online]).

On 7th March 1958 the detachment departs Corregidor, arriving back at Atsugi 18th March 1958 [sub-thread continues at 18th March 1958]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

**ASIDE:** Readers are reminded that it was to Guatemala that CIA operative George de Mohrenschildt [check him out] came on his mysterious 1961 walking tour - just as the Bay of Pigs affair was degenerating into a political and military fiasco.

1958 [18th March-11th April] JFK and New Orleans [LXVI - Lee's Movements Unknown]: [Continued from 1st March 1958] There is little in the literature concerning LHO's duties between returning from Operation STRONGBACK on 18th March and attending for his court martial on 11th April. Swike (2008) explores the possibility that LHO spends time at Iwakuni Naval Air Station [Wikipedia briefing], and concludes that on balance of probabilities that is where he went.

"Oswald's timeline becomes a little muddy here" (Swike, 2008)

**SPECULATION ALERT**

For our own part, we prefer to think that LHO neither returned to Atsugi NOR went to Iwakuni at that time, but rather stayed at his screen on Corregidor during the CIA's Indonesian overflights out of Cubi Point during Operations HAiK and ROBIN HOOD [see 24th March 1958]; moreover, that he must have chatted with, and made a good impression upon, the CIA liaison officers for this operation, who perhaps recognised a good man when they saw one [sub-thread continues at 11th April 1958]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]
1958 [24th March-18th May] Saving Indonesia From Itself [III - Operations HAIK and ROBIN HOOD]: [Continued from 10th February 1958] With Operation STRONGBACK safely out of the way, MACS operators continue to provide an air control service out of Corregidor, this time in support of linked Operations HAIK and ROBIN HOOD ...

**ASIDE - OPERATION HAIK:** This is the cryptonym for the in-the-end unsuccessful 1957-1958 U.S.-sponsored military coup against Indonesia's President Sukarno. The CIA's Civil Air Transport (CAT) air arm had begun supplying U.S.-approved right-wing rebels 26th February 1958, and it was now time to go directly for the regime itself. The operation was approved by President Eisenhower, and not only was it managed by the CIA’s Deputy Director for Plans Frank Wisner personally (who took temporary station in Singapore for the duration), but all four operational U-2s west of the Rockies were flown in to Cubi Point. As usual, the Air Force did what it could to help, in a non-attributable way, retrieving 15 ageing B-26s from reserve at Clark Field, Luzon, giving them a quick service, and "sanitising" them to bare metal. We have seen it suggested that six of these aircraft would reappear three years later in support of the Bay of Pigs Invasion!

**FURTHER READING ON OPERATION HAIK:** Try Douglas B. Kennedy's (1989 [full text online]) paper "Operation Haik".

**ASIDE - OPERATION ROBIN HOOD:** This operation was an adjunct to the broader Operation Haik, and basically controlled Department C's U-2 overflights and the necessary U.S.M.C. support operations (Prados, "The Ghosts of Langley", 2017). The most important Marine Corps elements were the MACS air control units, especially those qualified to support U-2 operations. The photoreconnaissance film stock was developed at a temporary laboratory at Clark Field, Luzon. This is an under-researched [= a very well kept secret - Ed.] operation, and not much more is readily available online.

Corregidor's MACS station is thus Atsugi's out-station, and is responsible for Detachment C's U-2s, the CIA's CAT transports, and the front line unmarked B-26 wing. Sadly one of the B-26 pilots - Allen Lawrence Pope [Wikipedia biography] - will be shot down 18th May 1958 and held captive until a personal appeal by RFK to Sukarno in 1962 results in his release 2nd July 1962. CIA Director Allen Dulles calls disengage that same day, but localised fighting will go on for another three years, partly because both sides have been American-trained. Dulles deflects blame for the highly embarrassing failure downward onto Wisner, who will be retired sick 1st January 1959. Up-and-coming Hugh Tovar [check him out] will finish the Sukarno job (at the cost of half a million dead) five years later [see 12th March 1967]. After his release, Allen Pope will resume his covert operations with a different CIA proprietary, Southern Air Transport, out of Miami. For more of the messy details see Robbins' (1979/2012) book "Air America", Chapter 4 [sub-thread continues at 18th May 1958], [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [28th March] JFK and New Orleans [LVII - U-2 Indonesian Overflights Begin]: [Continued from 18th March 1958 (or across threads from 24th March 1958)] The first U-2 overflight of Indonesia takes place this day out of Cubi Point, under the authority of Operation Haik, and with elements of LHO's MACS-1 detachment providing air control. A further 29 flights will take place over the coming weeks, after which the assets will be returned to their home bases in Japan [sub-thread continues at 11th April 1958], [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [11th April] JFK and New Orleans [LVIII - Lee Gets 20 Days]: [Continued from 28th March 1958] LHO is court-martialled for his self-inflicted wound offence [see 27th October 1957]. He is found guilty, reduced in rank, and given a suspended sentence of 20 days hard labour [sub-thread continues at ?7th June 1958], [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [18th May] Saving Indonesia From Itself [IV - Dulles Calls Disengage]: [Continued from 24th March] CIA "soldier-of-fortune" Allen Lawrence Pope's bare metal B-26 is shot down by the Indonesian air force. Realising that this is going to create one hell of an international stink, CIA Director Allen Dulles immediately calls disengage on Operation Haik, although the situation in Indonesia will
continue to fester through into the Kennedy Administration [sub-thread continues at 16th August 1962]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [??th June] JFK and New Orleans [LXIX - Clay Meets With Permindex]: [Continued from 11th April 1958] Clay Shaw gets a visit at the Trade Mart from Enrico Mantello, Vice-President of the aforementioned Permindex (Carpenter, 2014, p191). Mantello informs him that his Basel headquarters is presently planning to expand operations into Italy, with a new Centro Mondiale Commerciale (CMC) in Rome, and offers him a directorship, which he is delighted to accept. The exiled anti-Communist premier of Hungary (and CIA asset), Ferenc Nagy, is a major force behind the scenes.

ELEPHANT IN THE ROOM: In her 2005 book "A Farewell to Justice", Joan Mellen bluntly describes Permindex as "a CIA front, channeling money not only into legal political parties, but also into right-wing movements" (p136) [it was not as frowned upon to interfere in other countries' elections in those days as it is now - Ed.]. Indeed, she says, James Jesus Angleton "filtered ten million dollars of CIA money to the [Italian] Christian Democrats" (p137).

For more on the personalities behind CMC we recommend Chapter 9 of the Mellen book [sub-thread continues at 20th June 1958], [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [20th June-13th August] JFK and New Orleans [LXX - Sheepdip at the Blue Bird Cafe]: [Continued from ??th June 1958] LHO walks into an off-base bar and, after a few harsh words, "accidentally" spills a drink over Technical Sergeant Miguel Rodriguez. A short fracas ensues, the M.P.s are called, and LHO finds himself on another charge. As with the earlier self-wounding incident [see 27th October 1957], things do not look quite right, thus ...

"The entire incident was so completely out of character for Oswald that some researchers have long speculated that this may have been a ploy on Oswald's part to remove himself from the mainstream - away from his fellow unit members. This could provide him with a suitable amount of time for some sort of espionage training" (Hurt, 1985, p201).

The Court Martial is held 27th June, and LHO is found guilty and sentenced to 28 days hard labour. Since he already has 20 days suspended from his earlier transgression, this tots up to 48 days in all, so he will not be released until 13th August.

***** SPECULATION ALERT *****

Even after his 48 days, LHO might not actually yet be back in circulation, because in one report he arrives for a work detail possibly as late as 13th September accompanied by a brig escort [see 29th August 1958]. Taking Hurt's suspicions at face value, LHO might for example have been spirited away by air to attend a crash course in Russian at the Army Language School [Wikipedia briefing], Monterey,CA. Or he might have dangled himself in the bars and brothels around any of a dozen U.S. bases in theatre, in order to gather intelligence about the Communist spy-rings who helped run the places.

***** END SPECULATION *****

Few Marine Corps records have been allowed to survive, and the official inquiry transcripts are deliberately bland, uninformative, and full of unfilled time-slips. But whatever he was doing, it had all probably been carefully set up in advance, in order to develop a cover persona as <disaffected Marine>. He had, in short, started to be "sheep-dipped", that is to say, given a false identity prior to going under cover. Jim Garrison is crystal clear on this, thus ...

"I thought about the Russian examination Oswald had taken at El Toro [see 22nd November 1958] and began to look into his earlier Marine service for hints of possible intelligence work. [...] Oswald's assignment at Japan's Atsugi Air Base in 1957 before he came to El Toro was consistent with the possibility that he had been working in military intelligence. [...] I thought [this] might be confirmed by two Central Intelligence Agency documents mentioned in the Warren Commission report [references given]. Unfortunately, these documents, along with many other C.I.A. files, were classified as secret following the Warren Commission inquiry, and I could not gain access to them" (Garrison, 1988, p47).
Garrison proceeds to list "which subjects the government wanted the public to know the least about" (Ibid.). Somewhat predictably these will include the all-important timelines relating to his time in Russia and Mexico City [sub-thread continues at 27th June 1958]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [27th June-29th August (perhaps 7th September)] JFK and New Orleans [LXXI - Lee Goes Dark]: [Continued from 20th June 1958] We have already noted the possibility that LHO’s 48 days (or more) "in the brig" might have been spent on, or preparing for, intelligence activities of some sort.

WATCH THIS SPACE

If we come across any suggestions as to what these activities might have been, we shall put them in the space above [sub-thread continues at 11th July 1958]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [11th-21st July] JFK and New Orleans [LXXII - The Battle of La Plata]: [Continued from 27th June 1958] President Batista mounts an offensive against Fidel Castro’s bases in Cuba's Sierra Maestra hills [map]. David Ferrie reportedly flies supply and reconnaissance missions in support of Castro. This might be seen as contradicting the following assertion in Joan Mellen's 2005 book "A Farewell to Justice" ... "Ferrie had flown for the CIA as a contract pilot, taking off from Tampa, the Keys, and Venice, Florida, in sabotage missions: he burned sugarcane fields, dropped propaganda leaflets, and infiltrated and exfiltrated anti-Castro activists. His handler was Eladio del Valle [check him out], a mob-connected Cuban exile [...] Ferrie also flew for South Central Air Lines[1], a CIA proprietary" (p33).

1Probably South Central Airlines [online briefing].

However Jim Garrison offers the following explanation ...

"When Castro was a guerilla in the Sierra Maestra, Ferrie is reliably reported to have piloted guns for him. But in 1959, when Castro started to show his Marxist colours, Ferrie appears to have felt betrayed and reacted against Castro with all the bitterness of a suitor jilted by his girl. From that moment on, he dedicated himself to Castro's overthrow and began working with exile groups such as the Cuban Democratic Revolutionary Front ..." (Garrison, Interview in October 1967 Playboy Magazine [full CIA-"sanitized" text online]; also quoted in Baker, 2014, p90; we recommend the CIA copy because other online copies appear to have been edited down).

There had indeed been a period when Batista's autocratic excesses had alienated even the United States. No clear date emerges from the fog of history, but it seems that the CIA started actively to infiltrate and support the anti-Batista student group Directorio Revolucionario Estudiantil (DRE) (=Student Revolutionary Directorate) [check them out] during the winter of 1956-1957, spreading discontent in general. Matters came to a head 13th March 1957 [q.v.] when activists attempted to storm the presidential palace, and dozens died [Wikipedia briefing].

ASIDE: Similar U.S.-advised provocateur groups are at work in Hong Kong at the time of writing [July 2019] - see Wikipedia briefing. They also cursed Venezuela in early 2019 - see Wikipedia briefing. Turkey in 2016, the Ukraine in 2014, Nicaragua in 2013, etc., etc. The term "fifth column" has been in common usage for this sort of activity since 1936; the term "agents provocateurs" since 1845. But the concept of sapping an enemy's morale is actually as old as warfare itself.

The situation continued to deteriorate during 1957, and on 14 March 1958 [q.v.] the U.S. imposed an arms embargo against Batista. So it makes sense for the CIA to be smuggling light arms, propaganda material, and advisor-agitators to the DRE during 1957, and then heavier arms more directly to Castro during 1958. Baker (2014) wonders whether the Mob might also have had a say in things because Batista was becoming bad for tourism, and that reduced takings at their Cuban casinos [sub-thread continues at 29th August 1958]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [29th August-13th September] JFK and New Orleans [LXXIII - MACS-1 On The Move]: [Continued from 11th July 1958] On 29th August LHO's Marine Aircraft Group, MAG-11, is ordered to relocate to Taiwan in
response to the deepening 2nd Taiwan Straits Crisis [see 23rd August 1958]. MACS-1 will continue to operate from Atsugi until the last minute, but sends a small advance party to Taiwan on 4th September.

ASIDE: MACS-1 is to be located "in the Kaohsiung area" (Swike, 2008, p866) [map], more specifically, eight miles east of that port at Pingtung (North) Airfield [map].

LHO is apparently not in this advance party. Indeed it is possible that he is still in the brig at this date, if the duty officer on the night before departure, William K. Trail, is not mis-remembering. This from 1981 ...

"I do recall that the night before MACS-1 was to embark for Taiwan (during September, 1958), I was the duty officer. I recall that a couple of men were brought from the brig (Oswald was one of them) and spent the night in the duty shack with a brig guard in attendance" (Trail, letter to Swike, 17th July 1981, reproduced as Attachment 14-1B in Swike, 2008, pp906-907).

1In his main text Swike cites Ken Trail (p874), but the attachment is clearly signed "Bill".

On 8th September a MACS-1 detachment of 30 men is sent down to the docks at Yokosuka to start loading USS Skagit [Wikipedia shipography], their allocated transport. In addition to the unit's regular impedimenta the ship needs also to be loaded with several hundred tons of steel hard-standing sections and an emergency consignment of 5" ammunition for onward transit to the offshore Chinese Nationalist strongholds on Quemoy and Matsu.

↓↓↓↓↓ DATE CONFUSION ALERT ↓↓↓↓↓

The histories now start to bicker as to what happens next. We have followed the USS Skagit Veterans Website where we can, then Swike, then Summers (1980/2013), and then Greg Parker's online forum. We shall start with the comparatively reliable unit diary dates (and even these are far from consistent) ...

Thursday 4th September: MACS-1 advance party departs for Taiwan, as noted above.

Monday 8th September: 30-man work detail sent down to the docks at Yokosuka, as noted above.

Saturday 13th September (interpolated): MACS-1 gets trucked out of Atsugi en route for Yokosuka.

ASIDE: Click here to see a photograph of MACS-1 going aboard.

Sunday 14th September: Skagit sails [some tellings] despite impending Typhoon Helen and encounters very heavy weather.

Tuesday 16th September: Skagit sails [HSCA archive date, probably incorrect]. LHO's Medical Card indicates he reported sick this day, but this could have been at Atsugi or on board.

Friday 19th September: Skagit docks at Kaohsiung and starts offloading.

Sunday 21st September: Skagit finishes offloading.

Monday 29th September: MAG-11 up and running at Pingtung.

The problem with fitting LHO's comings and goings into this time-frame is that you have to decide which of the above dates is the day "MACS-1 was to embark" mentioned by Trail above, for it could be either 8th or 13th, thereby dating LHO's return from the brig as either 7th or 12th (respectively 25 or 30 days longer than the original 48 days of his sentence). We prefer the first option (a) because "it's believed that Lee Harvey Oswald was in this [work detail]" (Swike, 2008, p866), and (b) because he is about to report sick 14th September and what he is complaining of takes three days to come out and is difficult to catch in the brig [sub-thread continues at 14th September 1958]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]
the coming years, and official photographs of these documents will in due course be presented to the Warren Committee Investigation in the form of a 39-sheet folio of evidence collated by Staff Medical Officer Captain George Donabedian, from Marine Corps HQ, Washington, DC. Although personally he has neither met nor examined LHO, nor produced any of the documents in question, it will be Donabedian's job to explain the medical terminology to the laymen of the Investigation. His 39-page folio will then be compressed into 36 pages in the Warren Report as a formal exhibit.

**CAUTION:** Do not confuse Donabedian with Senior Medical Officer Paul Deranian, one of LHO's attending physicians. Nor is it guaranteed, as far as we can see, that all the original record sheets were included in said folio, nor (noting the variable filing punches used) that they were taken from a single filing location.

Donabedian's testimony and exhibits are readily available in the online Warren Commission Report as follows ...

- Volume VIII [full text online] pp311-315 for Donabedian's testimony.

Donabedian's exhibits have since been edited and re-typed—we know not how many times by various agencies and authors, and we are about to do it yet one more time, with explanatory hyperlinks and remarks of our own. Where the original was handwritten we have used this cursive font, where the original was typed we have used this font. But firstly we need a crash course in clinical venereology if we are to cope with the concepts and abbreviations we are about to encounter ...

**CLINICAL VENERIOLOGY FOR BEGINNERS:** Male patients typically attend a V.D. clinic with a "discharge" - a foul-smelling runny pus oozing from the urethra [=the pee hole]. The physician removes a sample of this discharge on a sterile swab, and "smears" a small amount of it onto a glass microscope slide. S/he then dries it momentarily over a bunsen burner flame to "fix" it, and then stains it with Gram stain - a dark purple dye. S/he then washes the stain from the slide with alcohol, lets it dry, and then views it under a microscope. "Gram positive" organisms show purple (because something in their cell walls prevents the alcohol washing the stain away), and "Gram negative" organisms show clear/pink (because their cell walls do not prevent the stain being washed away) ...

[click here](#) to see examples of both

This investigation takes about 20 minutes from start to finish, and would typically be carried out by an assistant if one was available while the physician continued to engage with the patient.

*The smear test is important because it so happens that the main Gonorrhoea bug is gram positive.*

The microscopic examination will also reveal the shape of the bacterium involved, and how - if at all - they might be clustered. The two main sorts are the bacillus [pl. bacilli], which is rod-shaped, and the coccus [pl. cocci], which is spherical. Cocci which routinely come in pairs are called diplococci.

*This observation is also important because it so happens that the main Gonorrhoea bug is a diplococcus.*

[click here](#) to see the Gonorrhoea Gram positive diplococcus

A second swab of the discharge is then sent for "cultur ing". This involves wiping the swab gently across the surface of nutrient agar in a Petri Dish, and then incubating it overnight in a body-temperature cabinet. In the morning every single organism on the agar will have multiplied millions of times into "colonies" visible to the naked eye ...

*Read it. See it.*

These colonies are now closely inspected using a hand lens, sorting the possibly pathogenic ones from the everyday ones (the "normal flora"). A suitable colony is then carefully picked off with a sterile probe and spread on a fresh culture plate. This time, however, an antibiotic "assay ring" is added before the culture is incubated. Each assay ring is like a thin paper spider, with a different test antibiotic at the end of each of its legs.
It follows that the organism will NOT grow around any antibiotic to which it is “sensitive”.

See the assay ring and sensitivity zones here (Figure F).

See LHO’s 24th September sensitivity results at Exhibit p602 below

The "Cult. and Sens." instruction is thus the backbone of evidence-based clinical management, but - as we have just seen - it typically takes 48 hours (two overnight cultures) to get the results back. In practice, therefore, if the discharge and discomfort are severe enough the clinician will usually dispense Penicillin as a matter of course on the basis of the smear alone, even though there is no way of knowing if Penicillin was going to work until the culture results come back in two days time.

Here, in date order, are a selection of Donabedian’s exhibits. We begin with an entry 12th July 1958, containing the first mention of LHO's haemorrhoids ("Rx" stands for "Recommendations", and "h.s." for hora somni, i.e., "at bedtime") ...

7.12.58 BLEEDING FROM RECTUM

[For?] past 1 mo. has noted blood on paper [post] BM [bowel movement]. This AM 1-2 drops bright red blood dripped into stool. BMs light brown & very hard. Exam: S[light] excoriation[?] and mod[erate] [unclear] hemorrhoids. Rx: Mineral oil h.s. x2 detergent[?] rectal suppositories.

ASIDE: We cannot make head nor tail of the [unclear], but then neither could Warren Investigation staffer John Ely (Volume XIII, p312). The detergent rectal suppository helps break down any contributing faecal impaction. Sadly, LHO will need further investigation for this problem on 10th October 1958.

We move next to an entry 10th August 1958, containing the first mention of a sexually transmitted infection. This examination appears to have been conducted not at "main side", the base hospital, but at a lesser coughs and colds parade serving the MAG-11 compound, and possibly fronted only by a Corpsman. Ominously, either LHO appears not to have followed this visit up, or Captain Donabedian omitted the follow-up from his evidential folio for whatever reason.

8-10-58 Slight burn on urination. Has urethral discharge, to main side for UD check. Smear.

ASIDE: Assuming Donabedian has given us a full set of records, LHO did not do as instructed, and there is now a five week gap before he re-presents. And this infection does not go away on its own!

We move on now to a five-visit cluster of attendances starting with one at the minor clinic and moving on to four at the main side clinic. There are a lot of mixed typewritten and handwritten entries on this record sheet, and not all are neatly left-justified. The entry for 16th September confirms that the infection presents as gonorrhoea microscopically, and recommends Procaine Penicillin four times a day [qid=quater in die] for three days. Note the Cult. and Sens on 20th September, as discussed
above. By that day it is clear that Penicillin has not been helping, and so a different antibiotic is tried instead. On 22nd/23rd the infecting organism is re-identified - see the TECHNICAL ASIDE below.

ASIDE: We believe there are two typographical errors on the master copies here. Firstly the culture result should be VAR - meaning variant or type - instead of VAS, which is meaningless in this context, and secondly it should read AUREUS - meaning golden - not AURENS, which is not a word in English or Latin. The guilty bug is now a Staphylococcus Aureus, as now detailed ...

TECHNICAL ASIDE - STAPHYLOCOCCUS AUREUS: [Greek stafylia = grapes; kokkos=berry] This is an error in the Marine Corps' master copy. The S. aureus family is one of bacteriology's best known villains, being the "SA" in the killer MRSA [Wikipedia briefing]. It is all around us, and all over us, and generally our immune systems can keep it under control. But if it gets a foothold it can produce anything from a pimple to fatal septicaemia. It kills some 50,000 people a year in the United States, many from hospital-acquired infections. Microscopically, the organism presents as a cluster-forming (hence stafylia!) Gram positive coccus (although strictly speaking it is a round bacillus). It seems to have evolved Penicillin resistance during the late 1940s.

Donabedian's p602 actually belongs after p603 rather than before it, so as to maintain the time sequence. It is a 23rd September Cult. and Sens. Request, overwritten with a next-day Culture Result and Sensitivity List.

**ASIDE:** The plus and minus signs in the right-hand column indicate the degree of sensitivity of the organism to the antibiotic named in the left-hand column, at the dosage stated in the middle column. This particular organism is resistant to Penicillin, so may have out-thrived the *H. gonorrhoeae* earlier in the course of treatment.

We move on to a four-event cluster of attendances, starting with one at the main side clinic, followed by two at the base hospital as an in-patient, and ending with one aboard his troopship. In terms of the treatment sequence it is a clear continuation of p603. However, it is not the *verso* of p603, but rather a continuation sheet pro-forma (same column headings but no identification boxes). Again there are a lot of mixed typewritten and handwritten entries as the visits run their course, and not all attendances are neatly left-justified.

**REMARKS:** On 29th September, seeing no organisms under the microscope, the physician seems to judge - wrongly, it will transpire - that the antibiotics have worked, and so on this occasion no repeat prescription is given. By 6th October, however, the infection has come back with a vengeance, yet strangely there is no mention of further antibiotics being given. Following 24th October there is no record of any 5-day follow-up visit having taken place. Only on 3rd November is the correct antibiotic given - five weeks after the 24th September sensitivity test.

Donabedian's p605 is a back-office type-up of the earlier clinical entries, on a pro-forma headed "**CHRONOLOGICAL RECORD OF MEDICAL CARE**". It is not intrinsically dated but contains entries for 16th September only. Upon close inspection it is clear that most of the typing has been stock-copied, with a few fields typed in. This indicates that LHO is not the only Marine to have contracted V.D. in the line of duty, perhaps by going out into town to hear the latest pillow talk. We have set the typed-in fields in *blue*. The column 1 abbreviations were officially explained to the Warren Commission as **CC** = Chief Complaint, **PI** = Present Illness, **PH** = Past History, **PE** = Physical Examination, and **LAB** = Laboratory.

**ASIDE:** #0303 is a "C.C.", a Chief Complaint code, a clerical device to allow epidemiologists to track the health of large bodies of people open to a wide variety of complaints. It signifies that the condition in question was sustained "In line of duty. Not due to own misconduct", and is important to the extent that it affects the patient's pension and compensation rights (Zaid, undated, *Oswald and V.D.* [full text online]).

We finish with another out-of-sequence record sheet, namely p589, which appears before the other medical photostats but includes items as late as 6th and 10th October. Lines #2 and #3 are scratched through and replaced by #4.

REMARKS: The switch from non-culpable venereal to non-venereal matches the transition from *H. gonorrhoeae* infection to *S. aureus* between 16th September and 23rd September. The tag #0303 decodes as "In line of duty, not due to own misconduct", and the tag DNEPTE, signifies "Did Not Exist Prior to Entry".

**TECHNICAL ASIDE - SIGMOIDOSCOPY:** Sigmoidoscopy is the inspection of the rectum and sigmoid colon for inflammation, bleeding, suspicious growths, tearing, and even on occasions foreign objects unwisely inserted. This inspection is carried out using an endoscope introduced rectally. Nowadays this is done with a highly micro-engineered flexible imaging system for screen display. In the 1960s, it probably involved one of these. We do not know why this examination should have been necessary, because Donabedian's folio of reports for duty this day to the 3rd Marine Aircraft Wing at the Marine Corps Air

One of the issues of recent debate is whether LHO actually sailed with his unit, remained at Atsugi as MACS-1 (Rear), or sailed but was then separately flown back. The Ferrell Foundation, for example, holds documents indicating that LHO remained at Atsugi as part of MACS-1 (Rear). Swike (2008) concludes similarly based on his study of LHO's pay records, which show that "none of Oswald's pay came from Taiwan or even MACS (2008) concludes similarly based on his study of LHO's pay records, which show that "none of Oswald's pay came from Taiwan or even MACS-1 after August 20, 1958" (p896). But Greg Parker has him going with the unit and then coming back on his own, as indeed does Summers. We, too, prefer this version of events because it fits nicely with an otherwise "odd" incident on the night of 4th/5th October 1958 when LHO loosed off a number of shots into the darkness beyond the perimeter fence while alone on sentry duty. He was found either-in-or-feigning a distressed state, and was returned to Atsugi the following day. Given the number of continuity errors highlighted above, we are far from convinced that Captain Donabedian did a particularly thorough job informing the Warren Commission [sub-thread continues at 6th October 1958]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [16th November-22nd December] JFK and New Orleans [LXXVII - Lee at San Francisco]: [Continued from 14th October 1958] Following his return from Japan, LHO is assigned temporarily to "Casual Company" at San Francisco's "Treasure Island" Naval Station [Wikipedia briefing] [sub-thread continues at 22nd December 1958]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1958 [22nd December-15th October 1959] JFK and New Orleans [LXXVIII - Lee at El Toro]: [Continued from 16th November 1958] LHO reports for duty this day to the 3rd Marine Aircraft Wing at the Marine Corps Air
Station, El Toro, where he is assigned to MACS-9. Here he "immediately began his Russian studies" (Swike, 2008, p966). "Little is known", Swike continues, "about Oswald's remaining military service in the States" (p966). Most histories follow the approved narrative by recording that on 25th February 1959 he famously sits a Russian test, scoring poorly.

**ASIDE:** The pejorative "poor" comes straight out of the Warren Commission Report and is not entirely accurate, thus ...

"The Warren Report skated quickly over the details of Oswald's progress in learning Russian, saying only that [...] he rated 'poor'. In fact, Oswald scored +4 in Russian reading [...] +3 in written Russian, and -5 - indeed a low result - in understanding spoken Russian" (Summers, 1980/2013,p140).

This is consistent, Summers argues, with him having been working on the language during his time in Japan.

On 19th March 1959, already planning life after the Marine Corps, he applies to the Albert Schweitzer College, Churwalden, Switzerland ...

**ASIDE:** A photostat/transcript of the application form can be inspected as Warren Committee Exhibit #228 - check it out. Readers are advised not to take this place at face value, for it smells mightily like an intelligence operation concealed by genuine students, just like those detailed in Chapter 6 of Hugh Wilford's (2008) book "The Mighty Wurlitzer: How the CIA Played America". [Click here for a more detailed critique.]

On 17th August he applies for early release date on the grounds that his mother, Marguerite Oswald, needs his care. On 4th September he applies for a passport, presenting as proof of identity a not-yet-valid DD1173 Marine Reserve Identity and Privilege Card [he will not be entitled to privileges until discharged a week later, and so the card is stamped 11th September - Ed.].

**ASIDE - THE BUFF IDENTITY CARD:** La Fontaine and La Fontaine (1996) devote the whole of their Chapter 3 to the story of the DD1173 Identity Card. For our present purposes we need merely to note that the colour is wrong for a reservist Marine UNLESS they are a civilian employee entitled to military discounts on overseas bases. Not all authorities accept the validity of the La Fontaines' research, however.

On 11th September 1959, he is discharged from the Marine Corps, released early "by reason of hardship", and returns to New Orleans. His mother's hardship will not detain him there long [sub-thread continues at 20th September 1959]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1959 [22nd January] **Chennault's Various Air Forces [XXXIII - CATI Supports HOTFOOT]:** [Continued from 1st July 1957] In early 1959, a U.S. Special Forces Group codenamed HOTFOOT begins operations in Laos. CAT, now increasingly using Sikorsky UH-34 helicopters, supports these operations.

**ASIDE - SIKORSKY UH-34:** The Sikorsky UH-34 [Wikipedia briefing] was a bit of a workhorse, and is historically noteworthy for being the last piston-engined helicopter prior to the move across to gas turbine models such as the Bell UH-1 Huey. The UH designation indicates "utility" helicopter, that is to say, general purpose rather than specialised in weapons, avionics, and crew skillset for, say, anti-submarine operations.

CAT senior pilot Robert Edward Rousselot [no convenient biography, but many helpful 2007 obituaries are available to the determined browser] manages the transition to rotary wing, and four experienced U.S.M.C. helicopter pilots are re-uniformed to help out [sub-thread continues at 25th March 1959]. [THREAD = THE SHAPING OF THE MODERN WORLD]

1959 [25th March] **Chennault's Various Air Forces [XXXIV - CATI Becomes Air America]:** [Continued from 22nd January 1959] Now in its 12th year of operations, the CAT air-fleet is finally rebranded and re-liveried as Air America [Wikipedia briefing]. In fact, there is a complex corporate web at work here, hiding behind a number of fronting names. Leary (2002) does his best to explain how all these Accountants' tricks affected operations in the field ...

"By the early 1960s, there were a plethora of company identities under the Pacific Corporation [Wikipedia briefing], which was the interface between the secret and open worlds. These included Air America, which operated in Southeast Asia and Japan; Air Asia, which designated the giant maintenance complex on Taiwan;
Southern Air Transport [Wikipedia briefing], based in Japan; and Civil Air Transport, which flew commercial routes between Seoul and Bangkok. No matter what the name, however, there was a single aircrew seniority list. A pilot, for example, might wear his Civil Air Transport hat and fly a load of tourists into Bangkok, where he would put on his Air America baseball cap and make an airdrop to forces engaged in fighting in Laos” (viii).

The principal maintenance base for all these air-fleets (and many more since) has long been at Pinal Field, Marana AZ [map: take a tour], 20 miles north-west of Tucson. This from Wikipedia at time of writing [the hyperlinks are ours] ...

"From 1948–51, Pinal County leased the property to multiple tenants, and from 1951–56, Marana was reused as a contractor-operated USAF basic flying school, operated by Darr Aeronautical Technical Company. Marana became the headquarters of all Central Intelligence Agency air operations during the Vietnam War years, when it was the primary facility of Intermountain Airlines [Wikipedia briefing], a wholly owned CIA "front" company which was used to supply covert operations in Southeast Asia and elsewhere. Intermountain was infamous for its thinly veiled CIA special ops [...], but its cover was its non-scheduled freight and maintenance operations. Marana was the principal continental United States maintenance base for Southeast Asia CIA operations including Air America and Continental Air Services [Wikipedia briefing]" (snipped 15th July 2019).

Air America will stop flying passenger traffic after a spate of crashes in early 1968 [sub-thread continues at 10th August 1960]. [THREAD = THE SHAPING OF THE MODERN WORLD]

1959 [20th September-15th October] JFK and New Orleans [LXXIX - Lee Whistle-Stops Europe]: [Continued from 22nd December 1958] Having said his goodbyes to his family LHO takes passage on the SS Marion Lykes, bound for Le Havre, France. He is one of only four passengers, sharing a cabin with one Billy Joe Lord and reputedly suffering badly from seasickness. He arrives at Le Havre 8th October, and takes the night ferry for England. On 9th October he docks at Southampton, and the following day flies out of Heathrow for Helsinki, perhaps via Copenhagen or Stockholm, checking in to that city's Torni Hotel for the night. On 13th October he relocates to the Klaus Kurki Hotel and applies at the Soviet Consulate for a six-day tourist visa. The visa is granted the following day, and he catches the Moscow train on the 15th [sub-thread continues at 13th October 1959]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1959 [13th October] JFK and New Orleans [LXXX - Clay Advises on the Twin Towers]: [Continued from 20th September 1959] Charles Nutter (for International House) and Clay Shaw (for the Trade Mart) jointly host "a group of men from New York City", seeking advice on building "a World Trade Center in lower Manhattan" (Carpenter, 2014, p204) ...

ASIDE: Headed by billionaire banker David Rockefeller [check him out] the Downtown-Lower Manhattan Association had begun planning a "World Trade and Finance Center" since 25th May 1959. However, contrary advice during the period of due diligence cast doubt on the viability of the project. Rockefeller therefore sacked the advisors and recruited new ones with bigger ideas.

Whatever it is that Nutter and Shaw tell their visitors, it clearly does not put them off, and work on the WTC begins 6th August 1968 [sub-thread continues at 15th October 1959]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1959 [15th October] JFK and New Orleans [LXXXI - JFK Speech]: [Continued from 13th October 1959] JFK gives a speech to New Orleans' Radio and Television News Directors' Association on the responsibilities of honest journalism. He asks them particularly to learn how "to educate without indoctrinating". What a lovely idea … [sub-thread continues at 16th October 1959]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1959 [16th October] JFK and New Orleans [LXXXII - Lee Crosses into Soviet Union]: [Continued from 15th October 1959] On 16th October LHO arrives in Moscow, where an Intourist courier conducts him to the Hotel Berlin. On 17th October, his guide-for-the-duration, Rima Shirokova, shows him the sights of Moscow, during which tour he tells her he wishes to defect. Since Intourist liaised closely with the Passport Office, and they with the Ministry of Internal Affairs, he is able to submit an application for
Russian citizenship "that same day" (Warren Commission Report, Appendix XIII, p691. When MACS-9 messmates eventually get to hear of his defection in the news, many nod their heads sagely and judge him as a patriot on a mission (La Fontaine and La Fontaine, 1996) [the New Orleans sub-thread continues without LHO at 21st October 1959; for LHO in the Soviet Union see the dedicated sub-thread <LHO the Defector>. 1959 [21st October] JFK and New Orleans [LXXXIII - Alton Gets a "Sensitive Position"]: [Continued from 16th October 1959] Thanks to an FBI statement of approval, Alton Ochsner is cleared for sensitive work on behalf of the CIA. Modern conspiracy theorists make much of the defence-funded research which will subsequently take place at the New Research Building [see next two entries] during the early 1960s [sub-thread continues at ??th December 1959]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1959 [??th December] JFK and New Orleans [LXXXIV - Toys For Children]: [Continued from 21st October 1959] Around mid-December 1959 David Ferrie helps out with Parish efforts to collect toys for Christmas gifts for the children at the Crippled Children's Hospital. Most of the children here are past polio victims, and many have at some time been in the care of the Ochsner Foundation Hospital's Mary Sherman (Baker, 2014). Baker further asserts that Ferrie personally told her that he was introduced to Sherman at one of these gatherings. She then suggests (a) that he took this opportunity to explain to Sherman that he had looked after Robert Heath's research menagerie back in 1956-1957 [see ??th December 1956], and (b) that, with the Ochsner Foundation Hospital's New Research Building nearly ready [see next entry], Sherman might well have mentioned that she would need him for her own research one day soon, and would get back to him [see 15th November 1962] [sub-thread continues at 19th December 1959]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1959 [19th December] JFK and New Orleans [LXXXV - Alton Gets His New Lab]: [Continued from ??th December 1959] The Ochsner Medical Foundation's New Research Building is formally dedicated this day, and Drs. Schales and Segaloff begin to transfer across from the Old Research Building (Caldwell, 1965, p93) [sub-thread continues at ??th August 1960]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1960 [??th August] JFK and New Orleans [LXXXVI - CIA Invited to Speak]: [Continued from 19th December 1959] International Trade Mart publicist Jesse Core [check him out] writes CIA Deputy Director Charles Cabell, inviting him to speak at the Foreign Policy Association of New Orleans (Carpenter, 2014). Clay Shaw, one of the Directors of said association, will introduce Cabell on the night. Carpenter, albeit with the benefit of hindsight, will later remark ...

"The fact that Earle Cabell was mayor of Dallas at the time of President Kennedy's assassination, and his brother was a prominent CIA employee who would essentially be fired by Kennedy in January 1962, months after the ill-fated Bay of Pigs invasion in April 1961, have provided fertile ground for conspiracy theorists over the years. Shaw's brief association with Charles Cabell through [this speech] has compounded the issue" (p217).

[THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1961 [9th May] JFK and New Orleans [XC - The CIA Pays a Call]: [Continued from 20th April 1961] On 9th May 1961 (but arranged by Jesse Core nine months previously) General Charles Cabell acts as M.C. for the event. More than 400 persons attend the talk. Assassination esearcher Edward T. Haslam, Jr., will later refer to this event in his (2007/2014) book "Dr. Mary's Monkey". His interest is with New Orleans' right-wing underground and its attendant propaganda machine. Here are some of the organisations and people which just keep on cropping up ...

"The reactionary sentiment in New Orleans centred around civic organisations which promoted trade with Latin America, like International House and the International Trade Mart. [Alton] Ochsner himself was President of International House, and he joined International Trade Mart's Clay Shaw on the Board of Directors of the Foreign Policy Association of New Orleans, which brought CIA Deputy Director Charles Cabell to New Orleans to discuss the Communist threat. Ochsner saw the situation clearly. With revolutionaries in the capitals of Latin America, the displaced elite would no longer be able to jump on jets and fly to New Orleans for medical treatment. The medical empire he built was threatened. Ochsner did something about it. He became a fanatical anti-Communist and founded an organisation called INCA, the Information Council of the Americas. INCA's objective was to prevent Communist revolutions in Latin America by teaching the sordid truth about Communism to the Latin American masses. In brief, it was a right-wing propaganda mill. Financing for INCA is said to have come from Ochsner personally and from other doctors and business people in the New Orleans area. [...] Sears heirs Edgar and Edith Stern, owners of WDSU radio and television, were members of INCA. Eustis Reily of the Reily Coffee Company personally donated thousands of dollars to INCA. Of all the names on the INCA letterhead, the most interesting one is INCA's 'Chief of Security'. Robert R. Rainold, who was described as the 'Past President of the National Society of Former Special Agents of the FBI" (Haslam, 2007/1024, pp183-184).

ASIDE: In her 2014 book "David Ferrie" Judith Vary Baker adds the following as INCA directors or supporters: John W. Clark (Delta Steamship Line); Archbishop Phillip M. Hannan; Sam Israel, Jr.; Joseph P. Montgomery (United Fruit Company); A. E. Papate; G. Frank Purvis, Jr. (Pan-American Life Assurance); William B. Reily (Reily Coffee); Samuel G. Robinson (Robinson Lumber); William Salzman (Trade Mart); and William G. Zetzman (Trade Mart).

The Foreign Policy Association of New Orleans takes advantage of the quorum to pass a resolution at the same gathering approving its name be changed to the Foreign Relations Association of New Orleans, to better reflect the fact that the Constitution of the United States already has a perfectly adequate system for handling foreign policy qua policy [sub-thread continues at 26th May 1961]. [THREAD = THE JFK ASSASSINATION CONSPIRACIES]

1961 [26th May or hereabouts]  JFK and New Orleans [XCI - David Fetches Carlos]: [Continued from 9th May 1961] David Ferrie is contract pilot for a clandestine flight down to Honduras one night to pick up RFK-deported Carlos Marcello, and drop him back to the United States, probably to an airfield in Texas. Marcello will duly hand himself in to the U.S. immigration authorities in New Orleans on 3rd June [Baker, 2014] [sub-thread continues at 30th June 1961]. 1962 [1st April]  Dallas Gets a Command Bunker: On 1st April 1962 the Dallas City-County Civil Defense and Disaster Commission opens its emergency command and control bunker, reportedly beneath the courtyard of the Dallas Health and Science Museum in Fair Park [for pics see Bonner, op. cit. inf.]. The bunker is the brainchild of Jack Crichton [check him out ESSENTIAL PRIOR AND ONWARD CONTEXT], and comes complete with four-ton lead-lined steel doors and all the necessary emergency communications links. It will one day be suggested by conspiracy theorists as having been used as assassination HQ on and in the run-up to 22nd November 1963. 1962 [4th April]  The U.S. Hard Right [The RFK Offensive (Walker's Stennis Testimony)]: [Continued from 21st September 1961] General Edwin Walker gives testimony to the ongoing Stennis Hearings. He makes no secret of his connections to the John Birch Society, or of his desire to preach doctrinal anti-Communism to the troops he had had under him in Germany, until relieved of his command 17th April 1961. His defence, indeed, was that the mere fact that he was in professional disgrace [he would fall into personal disgrace in the mid-1970s when twice arrested for "lewdness" offences -Ed.] was evidence in itself of precisely the sort of Communist plotting he had been fighting against. They have arranged to stop at Clinton because they need to rendezvous with a fourth man, an orderly at said hospital, who is to be their escort once on site. They then have to join a convoy ferrying in a number of "volunteers" from the Louisiana State Penitentiary, AngolaLA [Wikipedia briefing], who have put their hands up to become lab rats for "medical research" treatment there ...
ASIDE - THE ANGOLA "VOLUNTEERS": Angola prisoners had long been used as subjects for government-funded medical research projects under way at New Orleans' universities. These outings seem to have been something of a "treat" for the prisoners, who were rewarded with token privileges for their pains. For a detailed account of the abuse of medical ethics in these years, see the entry for Rose Cherami [Companion resource HIGHLY REVELATORY IN SEVERAL RESPECTS]. Among the professors reported to have been involved was the otherwise well-respected Robert Heath [Wikipedia biography]. On this occasion, however, the volunteer would not be returning to his cell, but had not given 'informed consent' [Wikipedia briefing], and was not - as some of the team had been led to believe - already suffering from a terminal condition. For a detailed account of the need for human guinea pigs unto-death in the Castro Bioweapon Project see the entries for the abovementioned David Ferrie [HIGHLY REVELATORY] and Judyth Vary Baker [EVEN MORE REVELATORY].

Unfortunately, only the day before, Dr. Martin Luther King, Jr. had delivered his famous "I Have a Dream" speech [Wikipedia briefing; video nostalgia], and civil rights campaigners across the South have staged a day of action to get unregistered black voters to attend their local courthouses and get on the electoral roll. Clinton, normally sleepy, is today therefore unexpectedly buzzing. Baker tells the tale this way ...

"On August 29, 1963, the trip to Clinton, Louisiana, begins. David Ferrie, Clay Shaw, and Lee Oswald leave at dawn, stopping briefly in Hammond, LA, to provide an alibi (Shaw's sick father lives there). Next they pick up an aide who works at Jackson's East Louisiana Hospital, then travel on to Clinton where they wait to join a convoy bringing one or more prisoners from Angola Prison [...]. They are in full view of what they thought would be a nearly deserted courthouse, but it is swarming with blacks trying to register to vote after King's speech. Locals think the Cadillac is suspicious. While David Ferrie and Clay Shaw remain in the Cadillac, Lee [...] decided to stand in line to register to vote. [...] He 'made a bet' with [the others] that he could register without the correct ID, just because he was white'. The Registrar, [Henry Earl Palmer] [no convenient biography] said Oswald signed his name, but it was erased when he could not produce any East Feliciana resident IDs. Sometime after the registration attempt, the Cadillac drove away. The driver of the Cadillac was identified as Clay Shaw [...] by Clinton Deputy Sheriff John Manchester [no convenient biography] [whose] testimony was backed up by a black man - Corrie Collins [2004 Obituary] - then a local CORE [see below] member [...]. Garrison's Grand Jury Court records show that Henry Earl Palmer, the Registrar, had noticed CORE member Collins standing by the black Cadillac and had asked Manchester to investigate. [...] Ferrie (who had expertise with cancer research) was there to advise technicians at the hospital how to handle and keep alive a dangerous cancer-causing material to be tested on the prisoner(s). Oswald was present to observe what Ferrie taught the technicians, and how and where Ferrie administered the shots [...], so he can orally transmit the same information to a medical contact in Mexico City, where the cancer weapon, if successful, will be handed off and smuggled into Cuba. [Lee] fills in a job application form [giving] him an excuse to return, with me, on Saturday, Aug. 31 [...]" (2014, pp271-273).

"From Hammond, Shaw drove north to Clinton, Louisiana, where they picked up a fourth passenger, an orderly who worked in the mental hospital in nearby Jackson. [...] Clay Shaw then drove the foursome to the courthouse in Clinton. There they were to wait for word of the convoy's departure from Angola Penitentiary. [...] They waited for the phone call from Angola [on a payphone by the courthouse]. Secrecy was an important issue in this operation. [...] Once inside the hospital gates, the orderly would direct the team to one of the many outbuildings on the hospital's campus, where the test would take place. Their plan looked good on paper, but there was a problem [...]. Just the day before, Dr. Martin Luther King, Jr. had delivered his historic 'I Have a Dream' speech in Washington, D.C. [and h]oping to leverage the momentum created [thereby] the Congress of Racial Equality (CORE) [Wikipedia briefing] held a voter registration drive in Clinton, a KKK-controlled bastion of White Supremacy which routinely denied blacks their right to vote. [...] The sun was hot and the delays were long, but it was no worse than a day spent picking cotton or digging potatoes. [...] Local white folks watched with scorn as blacks eager to register stood in a line that barely moved. The local Registrar of Voters was stalling, trying to wait them out. [...] Lee said he got out of the Caddie because it was becoming an 'object of interest', but he had to stay close in case the pay phone rang. +++ the aforementioned bet is made ++++ After about two hours of standing in line, Lee finally reached the Registrar of Voters. He was polite and friendly. Lee took out his wallet and flashed his ID [and] the Registrar invited Lee to sign the roll book. ++++ he signs, but the Registrar then notices that the ID states he lives in Orleans Parish ++++ The Registrar quickly erased Lee's ink signature as best he could and told Lee to leave the area [...]. The town's curious sheriff eventually approached the Cadillac to investigate and asked the driver to identify himself. Shaw displayed his driver's licence [...]. Finally, the pay phone rang, and Shaw answered. The prison convoy was on its way: they had to leave at once in order to join it before the convoy came into view of the hospital's manned security gate. All went as planned, and [...] Shaw] entered the main building to take care of some money transactions. The orderly then guided Lee and Dave to the clinic [where] they met the medical and technical personnel who would oversee the experiment. Lee carried the bioweapon in his 'lunch sack', with the sandwiches. The ordinary-looking thermos bottles had clear glass liners on which the cancer cells had been grown [+++ some
biochemistry +++] At Jackson, Dave gave the injections and explained to those involved how further injections should be given, and when. Lee watched and listened, so he would be able to deliver similar instructions when he handed off the Product in Mexico City or Cuba. Lee left after viewing the first round of injections, and saw only one prisoner. [...] Afterwards, Shaw drove Lee and Dave home” (2010, k9584-9649).

At this point the story suddenly becomes complicated by the fact that the medical consent issue has begun to trouble Baker. The Project requires that a lethal injection be given to an unwitting fellow human being, who has been tricked into volunteering. They are acting as state executioners, save only that they lack the black leather masks. And so she decides to "blow the whistle". See next in sub-thread [= 30th August] for developments on this latest twist to the story, or else go straight to next-but-one [= 31st August] for the follow-up visit to Jackson.

1 During his time in New Orleans, Oswald is (or has been led to believe he is) preparing to deliver to contacts in Mexico City a poison pill of sorts for onward transmission to Cuba, where it will be used in a CIA attempt on the life of President Castro. Readers are left to decide for themselves whether Oswald is (1) an active and unwitting member of a genuine CIA assassination attempt, OR (2) an active but unwitting member of a CIA decoy mission [one of James Angleton's famous mole hunts, for example - Ed.]. CLUE: According to Baker, he already suspects he is being "set up".

1963 [Friday 30th August] 1963 Day-by-Day [The Ochsner Project (Baker Objects)]: [JFK has 83 days to live] [Continued from 29th August 1963] Here is Baker (op. cit, 2010) on the medical ethical dilemma of administering a lethal injection to the prisoner she now suspects is not – as she has been led to believe - "at death's door" anyway and resigned to his fate, and who has not been fully informed of what his country has in store for him ...

"But here was the problem. I was originally told that the prisoner was terminally ill and had 'volunteered' to be injected with cancerous cells, knowing his days were numbered. But [...] in order to do my blood test, I had to know what kind of cancer the volunteer had []. Right before the Team left for Jackson [see preceding entry], I asked Dave [= Ferrie] to find out what kind of cancer the prisoner had. 'Oh, don’t worry about that,’ he said matter-of-factly. ‘He doesn’t have cancer. He’s a Cuban who is about the same age and weight as Castro, and he's healthy.' [...] This revelation was sickening to me. We would be giving cancer to a healthy human with the intention of killing him. This was not medicine, it was murder. [...] The question was remarkably clear to me: Was I a murderer? [...] So I wrote a letter of protest to my former hero [= Alton Ochsner himself] [...] even though he has told me not to write down anything about the Project. [...] My note to Dr. Ochsner simply stated: Injecting disease causing materials into an unwitting subject who does not have a disease is unethical. I signed it [...] and hand-delivered it to Dr. Ochsner's office at his Clinic” (k9649-9673).

As she fears, her principled stand is not well-received by those running this top secret black op, and Baker only barely escapes being promptly dealt with (as happened 11 months later to her immediate technical lead in the Project, the ill-fated Mary Sherman) [start with the entry for Nicholas Chetta and follow the pointers] [sub-thread continues at 31st August 1963].

***** OSWALD SEES "FRICITION BETWEEN LEFT AND RIGHT" IN DALLAS *****

***** ANTISEMITISM ALERT *****

1963 [Wednesday 23rd/Friday 25th October] 1963 Day-by-Day [Oswald's Movements (The U.S. Day Rally)]: General Edwin Walker [see Companion entry ASSASSINATION PIVOTAL] speaks at a designedly vexatious "U.S. Day Dallas Rally" in "the old Dallas Memorial Coliseum on Akard and Young streets" (a short distance from the TSBD). Author Gayle Nix Jackson [see Companion entry RECOMMENDED SOURCE] explains the political background to the event in her (2017) book "Pieces of the Puzzle" [Amazon], as follows ...

"[A] political firestorm was preparing to hit Dallas in October 1963 over a major right-wing contention, the United Nations. On October 21, 1963, the Dallas Morning News ran an article on two noted speakers that were coming to town during the annual United Nations Week. Brooks Hay[corrected] [JFK Library archive-biography], a special assistant to President Kennedy, was due to talk in Dallas during the week to the League of Women Voters. U.N. Ambassador Adlai Stevenson [Wikipedia biography] was also scheduled to be in town, upon the invite of Jack Boren [no convenient biography but much to reward the determined browser], Vice President of Neiman Marcus [Wikipedia briefing]. Co-sponsored by the Dallas League of Women Voters and the Dallas United Nations organisation, Stevenson's speech was scheduled on October 24, 1963. With the many Dallas citizens and John Birchers running around town with 'Get US out of the United Nations' bumper stickers on their vehicles, this wasn't going to be popular. News had already leaked out to all Dallas John Birchers, National Indignation Convention members, and General Walker's inner circle. U.N. Ambassador Stevenson was coming to Walker's adopted city to speak on the virtues of the United Nations, and the Jews than ran Neiman Marcus were behind it all. [...] Contemplating this, the general and his volunteers devised a plan [and] obtained booking for a rally at the Dallas Memorial Coliseum one day before on October 23rd [...] with General Walker as the keynote speaker. [Walker] delivered a fiery speech to an estimated 1200 rabid supporters [even lambasting] the CIA. [...] Moving into John Birch talking points, Walker ripped apart President Kennedy, former Presidents Eisenhower, Truman, and Roosevelt, and former Vice President Nixon. Amid the waving U.S. and Confederate flags, he continued to verbally dismantle the State Department and its foreign policy. He finished by [...] reading off a list of local Dallas organisations that were sponsoring Stevenson's U.N. Day speech, over the boosing of his angry supporters. By all accounts, Walker had whipped the crowd up into a raucous frenzy. However, there was at least one individual present in the auditorium who didn’t share the crowd’s infectious enthusiasm for the General: Lee Harvey Oswald" (pp127-129).

Two evenings later [= Friday 25th October], Oswald attends an address by the American Civil Liberties Union (ACLU) [Wikipedia briefing] in the company of (indeed at the suggestion of) Michael Paine [see own entry ASSASSINATION PIVOTAL]. Here is Jackson again ...

"Evidence strongly suggests that Oswald did attend the Walker U.S. Day Rally. While attending an American Civil Liberties Union (ACLU) meeting at SMU [= Southern Methodist University] with Michael Paine on October 25, 1963, the topic of the John Birch Society came up. An audience member mentioned that the John Birch Society should not be considered anti-Semitic. Taking exception to that comment, Oswald stood up and mentioned that he just attended the Walker U.S. Day Rally two days earlier and heard many anti-Semitic and anti-Catholic remarks. [He also] wrote to Arnold Johnson [NYU Archives biography] of the Communist Party USA stating that he attended [it]. Explaining the situation in Dallas, Oswald wrote 'as you can see, political friction between left and right is very great here’ " (p129).

This latest incident is yet a further indication that OSWALD IS DELIBERATELY DRAWING ATTENTION TO HIMSELF. It is, for example, still only two months since he went out of his way to get TV and radio coverage in New Orleans as a pro-Castro Marxist [see the entry for Bill Stuckey for the details].
He has now added an auditorium-full of eye witnesses and a letter on file to the CPUSA!  [THREAD = THE SCOURGE OF ANTISEMITISM]

1963 [30th October] **The Jewfish Creek Incident**: Shortly after midnight U.S. Customs Service officials bust two carloads of gun-runners at Jewfish Creek FL [map] preparing to load a consignment of arms onto a boat for transhipment to Cuba. One of the cars is driven by life-long scoundrel Loran Eugene Hall [check him out]. The weapons are confiscated but no charges are brought (Kaiser, 2008).

1963 [Saturday 23rd November] **Assassination Hardware [The Johnson 30.06 Semi-Automatic Rifle (V - The FBI Already on the Trail)]:** [Continued from 1st November 1963] Acting upon MOST URGENT instructions from FBI Washington, FBI Los Angeles send SA Jerome K. Crowe to the offices of slightly murky private investigator Richard Hathcock. Crowe arrives mid-morning and asks to speak to Hathcock's associate Roy B. Payne ...

... the usual - but never officially confirmed - presumption at this point is that a weapon somehow traceable back to Payne had been recovered the previous day from the JFK murder scene ...

Hathcock telephones Payne to get his butt into the office pronto, and when he arrives Crowe quizzes him about Gerry Hemming’s Johnson M1941 and Bushnell Hunting Scope [check them out], the focal topic of this sub-thread. Payne explains that he had merely stripped and test fired the weapon while it had been in Hathcock’s possession as security against a loan to Hemming, and Crowe is satisfied with that explanation. Hathcock is subsequently one of those who will explicitly presume the link to Dealey Plaza, thus ...
"It's my opinion that the reason [Crowe] wanted to see Mr. Payne was because Payne's fingerprints undoubtedly were all over that rifle from his having handled it many times. It's also my opinion that unless that particular rifle had been found or in some way involved in the whole thing, that the FBI would have no interest in it" (Richard Hathcock, HSCA affidavit, 9th March 1977).

1964 [13th February] The Winnipeg Airport Incident: [STUB - for the fuller narrative, see the entry for Winnipeg Airport Incident in the Companion Encyclopaedia.] Delayed for a while in the passenger lounge of Winnipeg International Airport, Canadian salesman Richard Giesbrecht [YouTube him now] self-reportedly accidentally overhears an incriminating two-man conversation concerning the JFK assassination. A third man - who has held back unseen for a long time - then signals the first two that they are being eavesdropped upon and tries to prevent Giesbrecht from leaving the scene. Giesbrecht duly reports the incident to both the FBI and the RCMP, but nothing comes directly of it. When his story first breaks in 1967, Giesbrecht himself tentatively identifies one of the men as David Ferrie, then presently in the news following his "suicide". Other authors have since challenged this identification, and recently released FBI documents indicate that they were distinctly unimpressed at the time with Giesbrecht as a reliable source - see the linked entry.

1964 [17th May] The National Enquirer Piece: Reporter John Henshaw [no convenient biography] publishes a piece in the National Enquirer front-paged as "Link Ruby & Oswald" [full text online]. Here is how pioneering Conspiracy Theorist Joachim Joesten explains the piece's impact ...

"The story inside, by reporter John Henshaw, stated that Ruby and Oswald had been working together for the Central Intelligence Agency. The fact that Oswald and Ruby knew each other is, of course, extremely important, and there had been rumours that a man named Bill De Mar [no convenient biography] had said that he had seen the two together at Ruby's nightclub. An Enquirer reporter traced Bill De Mar to an Evansville nightclub on April 11 and he confirmed the story. He added, 'I gave the FBI a statement about seeing Oswald in the club and that was it [...]. Bill De Mar is a man who was in a position to know what he's talking about: under the stage name of Bill Crowe he was master of ceremonies at Ruby's club, the Carousel. The Enquirer story goes on to say that the Dallas police suspected Oswald and Ruby of being involved in an attack on General [Edwin] Walker, and was going to arrest the two when the FBI intervened and asked the police not to do so for 'reasons of state'. [... The] recipient of that FBI letter was, of course, Chief of Police Curry, who leaked it to reporter Henshaw [...]. The story also asserts that it was the CIS which got the FBI to intervene" (Joesten, 1964, p198).

The battle against the insurgencies continues under the administration of President[1970-1974] Carlos Arana [Wikipedia biography], who is credited with some 20,000 insurgents systematically "disappeared". Arana's successor President[1974-1978] Kjell Laugerd [Wikipedia biography] continues the crackdown in like vein (1974 also marks Israel taking over as Guatemala's arms supplier), to the extent that in 1977 even the Carter administration thought fit to criticise his human rights abuses. In 1978, the murderous counterinsurgency is continued by President[1978-1982] Fernando Lucas Garcia [Wikipedia biography], until he himself is couped 23rd March 1982 by President[1982-1983] Efraín Montt [Wikipedia biography], who was then himself couped 8th August 1983 by President[1983-1986] Óscar Mejía Víctores [Wikipedia biography]. Between 1954 and 1984, the successive Guatemalan administrations, with CIA help and (after 1974) Israeli arms, have reportedly executed some 100,000 Guatemalan insurgents (Rubenberg, 1986).
A STRANGE THOUGHT: The Guatemalan population at the time was some four million people, so there is actually a valuable psychological datum here - if you kill one fortieth of a hostile population it shuts the rest up. The population of the American colonies in 1776 was some two and a half million people. So to put things in proportion the British would have had to hunt down and execute 62,500 Continental “insurgents” to have reliably kept control of the Americas (it would not be politically correct to call them “farmers” any more, although this, factually, just like the Guatemalans, is what they would have been).

For further details we recommend Rubenberg’s (1986 [full text online]) article entitled “Israel and Guatemala: Arms, Advice, and Counterinsurgency” [sub-thread continues at 14th January 1986]. [THREAD = THE SHAPING OF THE MODERN WORLD]

1967 [15th May] The Garrison Inquiry [Attempts to Discredit (Aynesworth’s Newsweek Piece): (All highlighted entries have their own entries) In his (2010) book "Legacy of Doubt" [Amazon] Peter Noyes reminds us that [after his near-telepathic performance keeping up with events on the day of the assassination - Ed.], cub reporter Hugh Aynesworth had by 1967 progressed to Newsweek magazine, from where he forcefully promoted the Establishment line. Here he is - interfering in due legal process, surely - with an Op. Ed. belittling the ongoing Garrison Investigation ...

"Perhaps the most perceptive observer of the circus in New Orleans was Hugh Aynesworth, of Newsweek magazine. Writing in the May 15, 1967, edition of Newsweek, Aynesworth had this to say about the Garrison investigation: Jim Garrison is right. There has been a conspiracy in New Orleans - but it is a plot of Garrison's own making. It is a scheme to concoct a fantastic "solution" to the death of John F. Kennedy, and to make it stick; in this cause the district attorney and his staff have been parties to the death of one man [the recently murdered David Ferrie - Ed.] and have humiliated, harassed, and financially gutted several others” (Noyes, 2010, K1220).

1975 [14th July] The Russian Civil War [TBA - Food, High Finance, and Espionage Fronts (Late Life Recollections of 1922-1923)]: [Continued from TBA] On 14th July 1975 the long-retired Arthur Ringland [check him out], one-time senior administrator with the American Relief Commission in Constantinople [upthread] tells his story to oral historians at the highly respected Harry S. Truman Memorial Library. Here is an indicative clip from what he has to say ...

Readers unfamiliar with Admiral Mark Bristol’s South Russian Intervention in direct military support of the White Russians in the Ukraine MUST see the entry for <28th January 1919> before proceeding.

"When that was over I was sent to Constantinople because of the situation there that developed due to the defeat of Wrangel's Army, by the Bolsheviki. This was in 1922, and our task was to help the Russian refugees that came into Constantinople after the defeat with no means of support. They were a source of embarrassment to the Turkish Government. The British and the French had been helping out as well as they could, but there was a hard core left who were in real distress. An appeal was made to Mr. Hoover, who obtained a substantial fund from the Laura Spellman Rockefeller Memorial. This fund was made available for me to carry on relief. This was done by bringing in a shipload of basic supplies. Before we actually launched the program, I had made an inspection with the help of Rear Admiral [Mark Lambert] Bristol, who was our United States High Commissioner. (We had no diplomatic relations at that time with Turkey.) He and I felt that there would be no end to relief unless provision was made for the evacuation of the people to countries where they could obtain employment. I reported that to the head offices in London and said I felt we should obtain support from the Allies for this evacuation, if we carried out the relief. I went to Geneva, and with the help of Fridtjof Nansen, the famed Arctic explorer, who was High Commissioner for Refugees for the League of Nations, I was invited to appear before a special meeting of the Council of the League. Our proposal was presented that we were prepared to finance relief, if during that period provision was made for evacuation. I always remember the pungent remarks of Lord Balfour, who was the British delegate to the League. He said it would be to the indelible shame of the League if it did not cooperate. He offered, on the spot, ten thousand pounds sterling on behalf of the British. The other delegates were sympathetic and Belgium, Brazil, China, Czechoslovakia, Japan and Switzerland supplemented the British contribution. Evacuation was provided for, with aid from the American Red Cross, and provision for social services in the host countries by the American YM and YW Christian Association. We carried out our part in Constantinople. At the conclusion there were left several thousand refugees who wanted to come to the United States. Admiral Bristol asked me to chair a committee to consult with these men and women, to see if they could take care of themselves when they got to this country. We finally obtained about 2,000 visas. The initial costs of transportation was made possible by the American Red Cross. It's interesting to remark that the money was returned by all of them. There was eventually no loss at all. These homeless Russians had the courage and the fortitude to meet extraordinary and trying conditions."

1981 [5th June] The History of Infectious Diseases [Classics of Epidemiology (A Strange New Syndrome)]: Today's Morbidity and Mortality Weekly Report carries a report of 5 men, aged 29-36 years, who in the preceding 9 months had been treated for Pneumocystis carinii pneumonia (PCP), a rare parasitic lung infection. Because such minor disease clusters as these can sometimes augur worse to come, they are regularly scanned by a monitoring committee of the U.S. Centers for Disease Control and Prevention (CDC) [Wikipedia briefing] in Atlanta GA. When this particular Weekly Report is discussed it raises eyebrows because PCP is a disease "almost exclusively limited to severely immuno-suppressed patients". But it has happened five times, and so it therefore jangles some epidemiological bells to see the phrase "all active homosexuals" in the first sentence of the report. A similar alert relates to a cluster of cases of Kaposi's Sarcoma (KS), a disfiguring viral growth rarely seen in healthy subjects; again all active homosexuals. The PCP cases were clustered in Los Angeles, and the KS cases in NYC. The compelling but as-yet-unconfirmed suspicion is therefore that something has been creating an immunodeficiency in these men, which has, in turn, been allowing the secondary diseases named above [known in the jargon as "opportunistic infections - Ed.] to take hold. One of those on the CDC panel at the time is a young epidemiologist named Mike Osterholm [check him out], and the CDC's Jim Curran [Wikipedia biography] is appointed to head the resulting task force. They begin by calling on front-line clinics to be on the alert for similar cases, and by the end of the year, they will have identified 270 cases, mostly gay men or intravenous drug users, of whom 212 had already died. By September the following year, the pattern of infection was clear enough to justify the official nomen "acquired immune deficiency syndrome (AIDS)", and, because there was a clear sub-stream of cases from outside the gay or injecting communities resulting from receiving blood from infected donors, Task Force Curran concludes that a hitherto unknown blood-borne virus must be
involved. Finally, on 23rd April 1984, Dr. Robert Gallo [Wikipedia biography] of the National Cancer Institute identified the pathogen as retrovirus HTLV-III [Wikipedia briefing]. As to where the disease came from originally ...

"HIV most likely began in the jungles of Africa as an infection in primates such as monkeys or chimps, and it lingered there for many decades before crossing over into the human population. [...] The virus probably jumped species as people killed, butchered, and had extensive blood contact with infected primates. From there, human-to-human sexual transmission was probably the main means of spread" (Osterholm and Olshaker, 2017, p15)

Other explanations are less charitable, however, as explained recently in the scientific literature in a paper by Ross, Essien, and Torres (2006) [full text online at PubMed], which see. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = MAN AGAINST MICROBES]

1982 The British historian Colin Hughes [no convenient biography] publishes "Mametz", a long-overdue history of the 38th (Welsh) Division's part in the taking of Mametz Wood, 5th-14th July 1916. However his inclusion of testimony of a certain Corporal Hetschold of the Lehr Regiment gives a detailed first-hand account of what it was like to be buried alive in a collapsing dugout [sufferers from claustrophobia, feel free to skip this bit] ...  

"In the dug-out in which I was, 100 comrades soon gathered. It was a strong dug-out but after a short barrage it also gave way. First an entrance collapsed and many suffocated. Then a shell landed in the middle and we were thrown hither and thither. As we came to our senses again, there was a dud shell sticking out from under the framework of the dug-out. We all took fright but it did not explode. We breathed again. But then the next followed immediately. A fearful rending, all the candles were out, shouts and groans. I can still breathe, I hear my comrades calling 'The long gallery is smashed in right up to us; we must get out!' I see two boots, pull hard and manage to free a comrade, who was already dead. But we can do nothing for the others: four metres of earth lie on them. I shudder. There is no escape here. As we make for the second entrance, the next shell smashes in. We are buried alive" (pp149-150).

Readers unfamiliar with the behaviour of buildings in free-fall explosive demolitions, in Vérinage double-crush demolitions, or in spontaneous "pile-driver" collapses, should check out the video links in the entry at 3rd/4th December 2010 before proceeding

Specifically, the authors argue that the work of Northwestern University's Zdenek P. Bazant [Wikipedia biography] - typically Bezant, et al. (2008) [see 1st October 2008 above] - commits the fundamental scientific error of selecting data to support a pre-determined conclusion, and that as such it is unwittingly part of a broader U.S. government conspiracy to mis-state its part in the 9/11 Attacks. 2010 [3rd October] Versailles, Collecting Germany's Reparations [XIV (LAST) - Phase Four, 1946-2010 (Final Reparations Payment Made)]: [Continued from 27th February 1953] On 3rd October 2010, after nearly 90 years, Germany pays over the final 70 million Euros on bonds attributable ultimately to the reparations imposed upon them by the 1919 Versailles Peace Treaty - see the BBC news report.

ELEPHANT IN THE ROOM: The Germans had, of course, rejected both "war guilt" and the very idea of compensatory reparations all along. Somewhat ironically, therefore, it is only three more years before two 21st century English-speaking historians publish a work arguing that the Germans were substantially justified in those protests. Here, copied across in the companion encyclopaedia, is how we have summarised this work elsewhere ...

Docherty, Gerry: Scottish schoolteacher turned forensic historian Gerry Docherty [no convenient biography] is noteworthy in the present context as co-author (with Jim Macgregor [see own entry]) of two alternative histories of WW1. The first, published 2013, is entitled "Hidden Histories" [Amazon], and notes the part played by a select and highly secretive coterie of American, British, French, and Russian bankers, industrialists, aristocrats, and royalty in railroad ing the world into WW1 during the famous 1914 July Crisis [see 28th June 1914]. The second, published 2017, is entitled "Prolonging the Agony" [Amazon] and describes the part played by bankers and industrialists [those whom we know today as "the military industrial complex" - Ed.] in deliberately prolonging that war once started.

COMPLEMENTARY NARRATIVE releases a videotaped webinar entitled "The 9/11 Experiments: Collapse vs. Demolition", looking in detail at what the various physical laws of gravity and dynamics can tell us about the three 9/11 skyscraper collapses ...

YouTube it here ESSENTIAL VIEWING

The webinar's perlocutionary value derives from the fact that Cole relies upon demonstration and re-staging - often with twenty-foot-high towers of bricks, etc., set up in his back yard - rather than upon the use of carefully choreographed software animations designed to promote a pre-asserted point. This makes great YouTube circus, and even better science. Real science. Real structures behaving for all to see. Science that wants to inform rather than conceal. And the conclusion drawn is that the tops of all three building cores began their descent in free fall under gravity, without any of the hesitations, lurchings, joltings, or lateral tiltings which typify unplanned collapses or botched demolitions. The official story thus does not follow the fundamental laws of nature, and therefore simply cannot be the truth. Cole goes further ...

CAMEO - THE FIVE IF-THENs OF 9/11 TRUTH: Toward the end of the 3rd December webinar, Cole sets out a very worrying five-stage example of inductive scientific reasoning. The argument rests on the absence of "jolts" as noted above, and runs as follows ...

"IF there are no jolts, THEN it's not a natural gravity collapse
IF it's not a natural gravity collapse, THEN it's a man-made demolition
IF it's a man-made demolition, THEN it was planned before 9/11
IF it was planned before 9/11, THEN something is very very wrong"

[No Jolts, of course, means that 3000 people were "intentionally murdered" that day and many millions more killed in the wars wrongly initiated in the name of 9/11 justice ever since.]

"IF I am wrong, THEN prove it - by experiment"

A follow-up webinar is released the following day, this one entitled "The 9/11 Experiments: The Great Thermate Debate". This second webinar complements the first by looking at the techniques out there in the demolition world capable of disappearing structural steelwork to order, quickly and silently, and specifically (as suggested five years previously [see 22nd September 2005 above]), at the capabilities of thermitic shaped-charges ...

QUICKIE - ON THERMITIC PYROTECHNICS: In the days before readily-available oxy-acetylene kit, railway engineers in the backwoods used to weld railway lines together using a patented mix of common rust and powdered aluminium. It makes a quick sunflash and a shower of sparks, and puts out enough heat to melt steel at the welding face ...

YouTube crude welding thermite here

The practice was then extended to bring down awkward high steel buildings, as here, in 1945 ...

YouTube thermite in building demolition

The practice was then turned into state-of-the-art nano-chemistry by the world's major arms laboratories, with many patents being taken out on additives (e.g. Thermate), shaped charges (for more precise cutting), micro-milling (for more bang per buck), and - finally - nano-compounding as Nano-Thermite.

2016 YouTube tutorial here

Here is the webinar itself ...

YouTube it here ESSENTIAL VIEWING

[Note the progressively increasing cutting power as Thermite is enhanced to become Thermate, and Thermate is enhanced to become Nano-Thermite. Note also the gradual improvements in Cole's technique, culminating in his successfully melting through a decently sized girder with a 1 kilogram charge of Thermate and a carefully focused burn!]
The science, in other words, is as plain as a pikestaff - thermitic pyrotechnics are demonstrably easily capable of "de-coring" a skyscraper, and of doing so, moreover, in near silence. More than ten years later [\textsc{\texttt{\textsc{= May 2021}}}], Cole's two series of demonstrations will remain unchallenged by further experiment. \textbf{EDITORIAL NOTE:} This was not the first racially aggravated murder and/or travesty of justice, nor the first to be greeted by howls of protest. However, it is the one which most obviously created a counter-movement, and so we shall be counting from here. This time, an 18-year-old Ferguson, Missouri, man named Michael ["Big Mike"] Brown [Wikipedia briefing] is shot to death by police officer Darren Wilson [dateto]. Witnesses will subsequently claim that Brown had his hands up at the moment of the shooting, but nevertheless the officer will not be indicted. Unsurprisingly, the #BlackLives Matter social media protest group judges this to be another instance of deliberate racist judicial killing.

The Klan [Wikipedia briefing ESSENTIAL GENERAL KNOWLEDGE], America's blacks conclude, has joined the police force, and is going around administering summary justice on "uppity niggers" [see Staples (2008 [full text online]), for an explanation of this term in the sense in which it is here used] confident in the knowledge that both local and federal magistrates will move heaven and earth to pervert justice in their direction.

QUICKIE - KELLY'S PERSONAL CONSTRUCT THEORY: In 1955, the American psychologist George Kelly [Wikipedia biography] published "The Psychology of Personal Constructs" [Amazon], in which he described how an individual's belief system was built out of a web of bipolar adjectival dimensions. He called these advance organisers of any given perception "Personal Constructs" [Wikipedia briefing], and here (from a Companion Resource) is how he saw them working ...

"Man looks at his world through transparent patterns or [templates] which he creates and then attempts to fit over the realities of which the world is composed, [.....] Let us give the name constructs to these patterns that are tentatively tried on for size. They are ways of construing the world, [.....]. In general man seeks to improve his constructs by increasing his repertory, by altering them to provide better fits, and by subsuming them with superordinate constructs or systems. [.....] Unfortunately,] his personal investment in the larger system, or his personal dependence upon it, is so great that he will forego the adoption of a more precise construct in the substructure. It may take a major act of psychotherapy or experience to get him to adjust his construction system to the point where the new and more precise construct can be incorporated" (Kelly, 1955/1963, pp8-9).

Readers interested in mapping the most salient - "the core" - of their personal Personal Construct system will find many sources online. For example, Reskin (2017) includes a link to enable you to construct your own "Rep Grid".

A number of lines of research therefore suggest themselves ...

(Q1) Is there a common personality type? IN SHORT, THERE CERTAINLY IS. Work here goes back a long way and readers interested in the psychology of the hard and unrepentant right may find some value in the entries for Political Spectrum and Personality, Authoritarian and Ethnocentric. We also strongly recommend readers to take the online California F-Scale assessment - check it out - and the Hare Psychopathy Checklist [Wikipedia briefing] (in addition to the Personal Construct self-assessment mentioned above).

(Q2) Does police training somehow make it worse? IN SHORT, IT PROBABLY DOES: See, for example, the separate entry for the 29th April 2021 Rutgers University Report GENUINELY SCARY.

(Q3) Is there retaliatory violence? IN SHORT, THIS IS NOT UNCOMMON: See, for example, Bejan, et al. (2018 [full text online REVELATORY]) on this, noting especially that the retaliation is more likely to be from law enforcers, not against them.

(Q4) Does the prevailing right-wing media Zeitgeist make things worse? IN SHORT, IT CERTAINLY DOES, (AND DESIGNEDLY SO): This is a massive research area in its own right, and we suggest that interested readers start their inquiries with right-wing propaganda in a peculiarly modern form, namely that which Peck (2017) calls "Fox Populism" [Amazon].

... and sadder still, of course, is the fact that Michael Brown will not be the last to die in contested circumstances [sub-thread continues at 20th October 2014]. [THREAD = FASCISTS IN UNIFORM] [THREAD = THE DEEP PSYCHOLOGY OF HUMAN HATRED]

2014 [3rd December] The 1833 Slavery Compensation Loan [VI - Chancellor Osborne's Plan]: [Continued from 31st October 2014] On 3rd December 2014 the Chancellor of the Exchequer George Osborne announces that he intends repaying Britain's outstanding WW1 debt as part of his mission to modernise the government's gilt portfolio. Eight legacy gilts are involved, amongst which is the 1927 4% Consol, subsequently identified by H.M. Treasury as including the final element of the £20 million Slavery Compensation Loan taken out in 1833 [sub-thread continues at 1st February 2015]. [THREAD = SOVEREIGN DEBT, HOW IT REALLY WORKS] [THREAD = STOCK MARKET AND FINANCIAL SHARP PRACTICE]

2015 [1st February-5th July] The 1833 Slavery Compensation Loan [VII - The 4% Consol Redeemed]: [Continued from 3rd December 2014] On 1st February 2015 H.M. Treasury duly makes good on Chancellor Osborne's 2014 promise [upthread] to simplify Britain's sovereign debt portfolio by redeeming the 1927 4% Consol, 1957-. This redemption is then followed on 27th March 2015 by a policy statement entitled "Repayment of £2.6 billion historical debt to be completed by government" [full text online], in which plans to redeem a further four gilts - "the last four undated bonds in the government’s portfolio" - are announced. The redemption date for this last block of undated debt is set at 5th July 2015, whereupon the Treasury website issues what is destined to become a much-discussed press release ...

***** H.M. TREASURY REDEEMS SLAVERY LOAN *****

CAMEO - NOW YOU SEE IT, NOW YOU STILL SEE IT: For reasons which are about to become apparent, the Treasury no longer has this announcement (pictured left) on its website. So here is a safe copy taken instead from the website of the Tax Justice Network [homepage] - click here. As can be seen, the press release makes the entirely reasonable intellectual proposition that British taxpayers in 2015 have only just finished paying off the bankers' loans used to buy off the slave owners two hundred years previously.

The reason for the Treasury's sudden change of heart is that it had underestimated how sensitive slavery had become of late, but we are covering these sensitivities in the parallel sub-thread on <The Black Lives Matter (BLM) Movement> and therefore restrict ourselves here to the financial side of the problem, which is that neither Hansard nor subsequent inquiry has been able to establish how much of these redeemed gilts fairly represents slavery money. We accordingly need to do some guesstimating ...

Readers unfamiliar with the mathematics of <Time Value of Money (TVM)> as a way of adjusting disparate past or future sums to a common date for comparison purposes should see this Investopedia Tutorial before proceeding.
SHORTHAND USED: Money typically loses value - purchasing power - over time, thanks to inflation. We therefore show pounds borrowed in 1835 as £1835 and pounds repaid in 2015 as £2015, and so on by extension for any other year. Where many years are involved - as with the repeating annual interest payments - we shall, since we are talking simple interest and since inflation in this period did not markedly fluctuate, calculate a period average, and show it as avg.1835-1927£. Face value figures - those printed on the bonds themselves - are shown face £, and - since bonds are just fancy IOUs - actually have no purchasing power whatsoever until sold on or redeemed.

PROFILING THE TWO LOANS: H.M. Treasury’s 5th July press release raised questions from journalists and academics concerning the total cost of the original scheme, once 180 years’ worth of interest payments had been taken into account. Unfortunately the Treasury replied that no precise records had survived to allow them to audit trail the original slavery loan back through the 1927 consolidation. For our present purposes, therefore, we shall presume that only an insignificant number of holders of the 1835 security took advantage of the cash redemption option in 1927. The totality of the slavery compensation scheme therefore breaks down into a £20 million loan at 3.4% for 92 years (1835-1927), followed by a £20 million roll-over loan at 4% for 88 years (1927-2015).

Fortunately, we can avoid most of the arithmetic by using the Bank of England’s online Inflation Calculator - check it out here ...

QUICKIE TUTORIAL: Access the Bank of England calculator, substitute 20,000,000, 1835, and 1927 into the data boxes, and then click the <Show Amount>. The app should show £40,449,438.20 and inform you that inflation during the period of the loan averaged 0.8%. In plain words, this means that IF YOU LENT OUT £20 million in 1835 you would need to get back over £40 million in 1927 just to break even!

Now switch the two years around, and re-click <Show Amount>. This time the answer should be £9,888,888.89. In plain words, this means that IF YOU BORROWED £20 million in 1835 and paid it back in full in 1927 you would have made over £10 million profit at your lender’s expense!

WHY THEN DO LENDERS LEND??

Because - as we are about to see - they charge interest ...

INTEREST ON THE 1835 ORIGINAL LOAN: The annual interest paid on the 1835 loan was repeatedly trumpeted in Hansard at the time as £1835,000,000. However, since these payments went on for a full 92 years, each year’s pay-out was worth fractionally less than the one the year before. We therefore calculated an 1835-1927 period average (as explained above) by averaging the 1835 and 1927 values of £1835,000,000, to give an 1881 value, and by then multiplying the result by 92. Here is the numberwork (we round off only on the right-hand side of the equation) ...

\[
\frac{(700,000 + 346,111)}{2} = 523k \times 92 = 1881\text{£148.1 million}
\]

... and this, at time of writing, would be worth \text{£202214619.7 million, THIS, NOTE, IS FAR AND AWAY THE MAIN PROFIT ON THE DEAL.}

INTEREST ON THE 1927 ROLL-OVER LOAN: The annual interest paid on the slavery element of the 1927 roll-over loan was \text{£800,000, the interest rate having now gone up to 4%}. Again we may calculate an 1927-2022 period average to give a 1971 value, and then multiply the result by 88 ...

\[
\frac{(800,000 + 20,345)}{2} = 410k \times 88 = 1971\text{£36.1 million}
\]

... and this, at time of writing, would be worth \text{£20223416.8 million}.

TOTAL INTEREST 1835-2015: Adding the above two figures together gives us a present value for the total interest paid out during the 180 years of the slavery debt of \text{£5036.5 million}.

CAPITAL REPAYMENTS 1927 AND 2015: The situation with the capital repayments is more straightforward because only two dates matter, namely when the loan was taken out and the date of its eventual redemption, ignoring the 1927 consolidation. Here is the numberwork ...

When redeemed at par in 2015, the £20 million 1835 loan would have been worth \text{£251,492} ... and this, at time of writing, would be worth \text{£317,380}.

GRAND TOTAL INTEREST AND CAPITAL 1835-2015: Adding interest to capital, and talking now ONLY IN 2022 POUNDS, the total cost of paying off the slavers therefore comes to \text{£5036.8 million, of which by far the greatest single component (specifically, £4619.7 million) was the interest accrued in the 92 years of the original loan.}

CONCLUSION: Subject to the various assumptions stated above, we suggest that the total cost of buying out the slavers was - in today's money - of the order of \text{£5.0 billion, give or take a few}
bottles of Champagne. What we have been unable to estimate is how many of those who received compensation cheques were also politicians who voted for it, nor indeed how many of the slavers promptly invested their gains for a guaranteed income in the very gilts which had funded that compensation [sub-thread continues at 9th February 2018; note that mentions of slavery are now increasingly threaded as <The BLM Movement>, which see]. 2016 [6th August] Weaponised Antisemitism in British Politics [Social Media (A Personal Note)]: Having started his battle diary only 24 hours previously [see preceding entry], the present author's scribble-notes record that this morning's BBC Breakfast Show gives journalistically unchallenged secondary publicity to a Mail Online piece by Chief Rabbi Ephraim Mirvis [check him out], criticising the Chakrabarti Inquiry into antisemitism in the Labour Party for not going far enough. 2016 [11th August] Weaponised Antisemitism in British Politics [Get Corbyn! (Marcus Dysch)]: A piece in The Jewish Chronicle by Marcus Dysch entitled "No more holding back" [full text online] notes ...

"British Jewry's leading institutions provided an uncharacteristic display of their disgust with Mr Corbyn, and blasting to smithereens any lingering chances of a future working relationship with him. There should be no illusions now; this is the end - of both the Jewish community's cordial, almost century-long relationship with the Labour Party, and quite probably of the Labour Party in its current form."

The Dysch piece is the 12th item in the scribble notes we opened six days earlier [<= 5th August], and - though we have no recollection of it whatsoever - we can safely say that it did not write itself. We therefore presume (a) that Dysch's entirely partisan views made it through without inspection or balance to one of the BBC's news programmes, and (b) that, as an anti-Corbyn propagandist, Dysch had been writing for the BBC's audience all along. 2016 [14th August] Weaponised Antisemitism in British Politics [The Chakrabarti Inquiry and Report (Michael Foster)]: Labour Party donor until 2015 Michael Foster [Wikipedia biography] publishes a piece in Mail Online banded ""Why I despise Jeremy Corbyn and his Nazi stormtroopers' by Jewish Labour Donor Michael Foster" [full text online]. The nub of Foster's argument (apart from the fact - in case you hadn't noticed - that he is no fan of Jeremy Corbyn) is that the Chakrabarti Report "was anything but independent" [we are to take this as read, apparently, for not a word of actual evidence is offered - Ed.]. It would have been much better, Foster goes on, had Corbyn started his own "party of the Left" instead of stealing "the respectable cloak of the Labour Party brand".

The victory is a trouncing of the party's centrists - the heavily externally funded Neoliberal [Wikipedia briefing] "Blairites" [Wikipedia briefing] - who had spent the previous 12 months plotting his ousting. The piece presents three interlocking theses, namely (1) that the checks and balances which had been carefully built into the U.S. Constitution over the centuries have been systematically dismantled by those whom President Eisenhower (with no little foresight) dubbed the "Military-Industrial Complex" [National Archives Quickie COMPULSORY VIEWING], (2) that what General Wesley K. Clark [check him out] has called "Paul Wolfowitz's 1991 playbook" - by which he means the Defense Planning Guidance Report, 1992 [check it out], which proposed a totally world-pre-eminence America "eager to keep its allies weak" (Mann, 2004, §4393), even if it meant disregarding due international process - has resulted in a succession of similar tightly pre-planned atrocities, and (3) that the United States now lives in what Tom Engelhart (2011) here and David Ray Griffin [check him out] in this documentary term a "post-legal society". It is the notion that there has been a wholesale betrayal of everything the Constitution once stood for which causes a sizeable proportion of the population to go into denial. "The fact is that the damage has already been done. The default mode of almost all the mainstream media is to take as given that the party is institutionally antisemitic. And that its leader is either incapable or unwilling to do anything about it, except make pious statements that are ignored."

14 months later, MSM headlines are still mercilessly exploiting this line of attack in the 2019 British General Election, not for any benefit to Israel, but for the British political right wing, who - for obvious reasons - cannot get enough of it. The [CAUTION - pro-Palestinian/Pro-Corbyn] Jewish Voice for Labour [check them out] issues a statement "regretting" the suspension, which, they claim, was nothing but the deliberate picking off of a hostile activist "for daring to publicly reject the assertion that Labour is rife with antisemitism".

Note very carefully what is happening here!

In other words, the Labour Party contains both pro-Israel Jews and other Jews, squabbling amongst themselves over agendas with little to do with Labour Party objectives. Two major clusters of unknowns therefore scream out for answers ...

RESEARCH ISSUE (1): Students of conspiracy theory are routinely interested in such unknowns as group sponsorship, the identity of its contacts, the identity of its funders, and the legality of the funds themselves vis-à-vis money laundering and electoral laws. It is also not known what sociographic mechanisms facilitate communication between group members, be they family, school, boardroom, educational or military fraternity, lodge co-membership, golf club, etc., etc.

RESEARCH ISSUE (2): Students of political ethics and constitutional studies also need to know, frankly, how fucking dare they, for regardless of the rights and wrongs this is not one-man-one-vote democracy at work!

2019 [29th August]  **Policing, Big Brother Style [IV - Race Relations in General (The Zoe Thomas Piece)]:** [Continued from 16th September 2018] On 29th August 2019 the BBC puts out a piece by Zoe Thomas entitled "The Hidden Links Between Slavery and Wall Street" [full text online REVELATORY], in which she reports on a fourth centenary tour of NYC's financial district, stopping to reflect at key locations in the financial history of the slave trade (not least the slave market at the eastern end of Wall Street - check it out). Here is an indicative passage ...

"Slavery thrived under colonial rule. British and Dutch settlers relied on enslaved people to help establish farms and build the new towns and cities that would eventually become the United States. Enslaved people were brought to work on the cotton, sugar and tobacco plantations. The crops they grew were sent to Europe or to the northern colonies, to be turned into finished products. Those finished goods were used to fund trips to Africa to obtain more slaves who were then trafficked back to America. This triangular trading route was profitable for investors. To raise the money to start many future plantation owners turned to capital markets in London - selling debt that was used to purchase boats, goods and eventually people."

It is always worth noting the cui bono line of inquiry, for - as we shall shortly be seeing - it is about to bring violence to the streets of both Britain and America [sub-thread continues at 25th May 2020]. We are that herd, and whenever we are individually uncertain what to do or think, we like to look around to see what everybody else is doing or thinking. Opinion polls work mercilessly on this weakness of ours, telling us what they want us to believe instead of asking us what we do believe; and they will continue to do so until cognitive science develops a better understanding of the relationship between our rational will (such as it is) and our wholly primaeval and irrational instincts.

The assault is led by a Sunday Telegraph headline reading "Jews will leave if Corbyn wins", and is supported by a flurry of Tweets as though from Gove personally, but actually from paid staff. The Tweet flurry puts forward the proposition that "I know you're a decent and moral person - but you and others must do far more to root out the antisemitism in your party - our Jewish friends and neighbours fear a Corbyn Government - time for you to stand with them and Israel". ever an elite consensus" [full text online] in which he accuses the BBC's news reporting of being "shaped by corporate interests, state officials, and the political elite - the government of the day in particular". He continues ...

"At the top, there is a board made up of a mix of senior BBC managers, government appointees and other establishment figures. Beneath them is a highly paid group of executives, disproportionately drawn from private schools and Oxbridge, who know that the BBC depends on governments for its funding and its long-term survival. Then there are the BBC’s senior political journalists, whose work defines the tone of its output. Fiona Bruce, Evan Davis, Mishal Husain, Laura Kuenssberg, Emily Maitlis and Nick Robinson are all paid upwards of £250,000 a year and, with the exception of Kuenssberg, all attended Oxbridge colleges. All this shapes the BBC’s collective sense of how political stories should be reported, how 'due impartiality' should be construed, and how competing claims of bias should be negotiated."

This may go some way toward explaining the BBC's merciless lack of journalistic balance during the 2019 General Election. [THREAD = THE DEATH OF DEMOCRACY] [THREAD = THE BATTLE FOR HEARTS AND MINDS] [THREAD = THE COGNITIVE SCIENCE OF POLITICAL PROPAGANDA]

2019 [Sunday 24th November] The Death of British Democracy [VIII - Dearlovegate]: On this, the 25th day of the 2019 British General Election Campaign (GE2019), >>ex<<-head of MI6 Sir Richard Dearlove [check him out] publishes a piece in The Mail on Sunday under the self-explanatory title "Jeremy Corbyn is a danger to national security who is unfit to become Prime Minister" [full text online]. His qualifications for making that judgement do not, upon critical inspection, warrant the media coverage received. OUR VERDICT: The article was unadulterated right-wing propaganda, in that the newspaper in question took - perhaps even commissioned - a personal rant by a Colonel Blimp [Wikipedia briefing] and turned it into a free party political broadcast for the Conservative Party. 2019 [Wednesday 27th November] Weaponised Antisemitism in British Politics [GE2019 (Three Fundamental Truths)]: Social media commentator Simon Maginn [check him out - ESSENTIAL] concludes from analysing media reporting and Twitter traffic during the first month of the 2019 British General Election campaign that a broad spectrum media onslaught had been targeting Britain's Labour Party, using a tripartite meme structure of three "foundational truths", and reports his conclusions to the Twittersphere, thus ...

"The antisemitism campaign has three foundational truths: 1. 'The left' = inherently antisemitic 2. Accusation = evidence, and 3. Denial = demonstration of guilt. We'll look back on this time and we'll be horrified, and we'll say 'How did it happen?' This is how it happens."

And in the 1930s, of course, when the antisemitism was real, and not conveniently fanciful, that was, of course, precisely what happened! [THREAD = THE DEATH OF DEMOCRACY] [THREAD = THE BATTLE FOR HEARTS AND MINDS] [THREAD = THE COGNITIVE SCIENCE OF POLITICAL PROPAGANDA]

2019 [Friday 29th November] The Corruption of the BBC [Bias and Favouritism (The Latest Sniggerfest)]: This evening's "Have I Got News For You" comedy show engaged in a prolonged "sniggerfest" at the expense of the nation's Corbynistas. How they laughed, who had full bellies and warm beds to go home to! 2019 [Friday 29th November] Corbynism: On this, the 30th day of the 2019 British General Election Campaign (GE2019), one Shaun Lawson Tweets: "If you ever wanted to know when Corbynism was born, it was on 20 July 2015 when the vast bulk of Labour MPs, to their everlasting shame, abstained on the Welfare Reform Bill" [a bill to cap many social security benefits for those most in need - Ed.]. Lawson's Tweet even points his readers toward the decisive moment within the debate, namely John McDonnell's (ultimately unsuccessful) speech opposing the Bill - YouTube it here. 2019 [Saturday 30th November] London Bridge, The Conspiracy Theory: On this, the 31st day of the 2019 British General Election Campaign (GE2019), with the blood from yesterday's 1400hr London Bridge Terrorist Attack (no core briefing but headline news anyway) Still on the sidewalk, the Twittersphere starts to hint at dirty deeds, to wit a black op by agencies unknown to interfere with the election. Thus ...

"Isn't coincidence a funny thing? On London Bridge today we had a convicted child murderer (out for the day), an undercover cop, and a known terrorist WITH A TAG [apparently one Usman Khan, now deceased - Ed.] all involved in the same incident. No-one would believe it in a film script. Strange" (Twitter, 30th November 2019, as from Scarlet Wilde).

And sure enough the right-wingers are indeed already milking the attack for all it is worth, thus ...

"A man was murdered by British Police in broad daylight" (Twitter, 1445hr 29th November 2019, as from Jeremy Corbyn [falsely attributed]).

For the moment we note only that this very convincing and politically highly inflammatory FAKE was on the airwaves within an hour of the killing. The topic is trending even as we write; even the traditional the-press-releases-had-been-written-beforehand trope is under discussion ...

2019 [Saturday 30th November] Weaponised Antisemitism in British Politics [GE2019]: On this, the 31st day of the 2019 British General Election Campaign (GE2019), investigative journalist Jonathan Cook publishes a piece on the AntiWar.Com website entitled "Britain's Chief Rabbi Is Helping to Stoke Antisemitism" [full text online]. In it he concludes that the factional preacher in question, Ephraim Mirvis, “has no lessons to teach [Jeremy Corbyn] or the Labour Party about racism”. On a lighter note, but within the same general narrative, the Conservative Party's constant pre-scripted harking on about antisemitism succeeds in making Health Secretary Matt Hancock quite literally a laughing stock - check out the video [A JOY TO BEHOLD] for the science behind the inversion of propaganda offensives, email the author.

2019 [Tuesday 3rd December] The Corruption of the BBC [Biased Scrutiny (Oborne's J'accuse)]: On this, the 34th day of the 2019 British General Election Campaign (GE2019), the highly respected commentator Peter Oborne publishes a piece in The Guardian entitled "In Its Election Coverage, the BBC Has Let Down the People Who Believe In It" [full text online]. In this article he revisits many of the atrocities of BBC one-sidedness already noted under this sub-thread, not least that at the Cenotaph on Remembrance Sunday [see 10th November]. He also reserves especial criticism for one presenter in particular, for routinely flouting the checks and balances required for journalistic integrity, thus ...

"In October Jill Rutter, a senior research fellow at The UK in a Changing Europe, highlighted the way in which many senior journalists, including the BBC's political editor, Laura Kuenssberg, had become overly dependent on private briefings from Johnson's strategy chief, Dominic Cummings. 'This way of operating does the public a big disservice,' Rutter said. 'It allows Downing Street to get its message out without having to take responsibility for it.'"

What we are left with, in short, is a lack of proper scrutiny of what is in fact a "stunningly dishonest campaign" on the part of the Conservatives. [THREAD = THE DEATH OF DEMOCRACY] [THREAD = THE BATTLE FOR HEARTS AND MINDS] [THREAD = THE COGNITIVE SCIENCE OF POLITICAL PROPAGANDA]

2019 [Thursday 5th December] Weaponised Antisemitism in British Politics [GE2019]: On this, the 36th day of the 2019 British General Election Campaign (GE2019), following one particularly nauseating television insult to Jeremy Corbyn the day before, Corbynites on Twitter try to set the record straight by circulating the following list of the good things the man has done over the years to FIGHT antisemitism both in Britain and worldwide [the EDM numbers mark Parliamentary Early Day Motions - Ed.] …

2019 [Saturday 7th December] The Death of British Democracy [X - Media Impartiality (Selectively Applied1)]: At today's needle match between Manchester United and Manchester City a fan is arrested for making racially abusive gestures and sounds. There are 115 clubs in Britain's five main (professional) leagues, and many thousands more at amateur level. If any of each week's several million players or spectators breaks the laws on racial hatred they are acted upon just as happened in Manchester. And of course many get away with it. But at least the clubs do not have the anti-Racist attack dogs on their case 24/7, whingeing incessantly on the negative and not recognising any positive. That sort of politically directed ire-on-demand is reserved for Corbynites and antisemitism. We point this out, because for as long as commoditised political outrage can be bought and selectively applied, Britain does not have a one-man-one-vote electoral system. Or, as one commentator puts it, "Even now, our most prized rights, such as free speech, are being eroded and subverted to protect Israel from criticism" (Cook, op. cit). [THREAD = THE DEATH OF DEMOCRACY] [THREAD = THE BATTLE FOR HEARTS AND MINDS] [THREAD = THE COGNITIVE SCIENCE OF POLITICAL PROPAGANDA]

1 Selectively applied impartiality may also be termed "bias".

2019 [Tuesday 10th December] The Death of British Democracy [XI - GE2019 (The Mitchinson Piece)]: On this, the 41st day of the 2019 British General Election Campaign (GE2019), the Editor of The Yorkshire Post James Mitchinson [no convenient biography] publishes an open letter entitled "Do not believe a stranger on social media who disappears into the night" [full text online - COMPULSORY READING], in which he presents meticulously supported proof that a major anti-Conservative NHS scandal had been deliberately falsified and republished as anti-Labour Party material, but supported now by pre-alerted repeater stations across social media and the MSM. (This sort of thing cannot happen, of course, other than in a right-wing PR control centre somewhere.) A Tweeter using the name Sheree Jenner-Hepburn led the disinformation postings, but said person could not be traced by Mitchinson's team. We highlight this article as yet another instance of a media regulation system which at no little expense to someone serves primarily to deny Britons a one-man-one-vote democracy. Only The Yorkshire Post comes out of the incident with any moral or journalistic
integrity. [THREAD = THE DEATH OF DEMOCRACY] [THREAD = THE BATTLE FOR HEARTS AND MINDS] [THREAD = THE COGNITIVE SCIENCE OF POLITICAL PROPAGANDA]

2019 [Tuesday 10th December] The Death of British Democracy [XII - GE2019 (The Monbiot Piece)]: On this, the 41st day of the 2019 British General Election Campaign (GE2019), respected campaigning journalist (usually on the environment) and author George Monbiot [Wikipedia biography] publishes a piece in The Guardian entitled "Why do I have to break an embargo in order to expose press lies about Labour" [full text online - COMPULSORY READING], in which he bemoans the deliberate foot-dragging in publishing an IPSO [= the U.K. Press Regulator] judgement that a (months-old) piece in The Mail on Sunday had contained falsehoods subsequently recycled as campaign material by the Conservative Party. With 48 hours of good propaganda time still to go, the delayed judgement allows the lies to continue. We therefore highlight this article as yet another instance of a press regulation system which at no little expense to someone serves primarily to deny Britons a one-man-one-vote democracy. 2019 [19th December] The Death of British Democracy [XIII - GE2019 (The Postal Voting Conspiracy)]: One week after the Conservative landslide in GE2019, word circulates on Twitter noting firstly that 37% of the British electorate voted by post, and secondly that these votes were processed under contract by the private company IDOX Software Limited [see own entry]. 2020 [Tuesday 7th January] "Poverty is the Draft": A Tweet does the rounds today from U.S. Congressional hopeful Anthony Clark [no convenient biography but much to browse on social media], pointing out that in 2020 the U.S. government no longer needs "the draft" - its former system of conscription for national service - "because generational poverty has taken its place - the military offers housing, healthcare, and education". 2020 [Tuesday 4th February] U.S. Presidentsials 2020 [Social Media Chatter]: [New sub-thread] A Tweet today asks whether or not it is right to describe candidate Mike Bloomberg [check him out] as an American "oligarch". 2020 [Tuesday 4th February] The Weaponisation of Diseases [Coronavirus (A Strange Death)]: Canadian virologist Frank Plummer [check him out], world-renowned expert on such diseases as SARS, H1N1, Ebola, and - until today - Coronavirus, drops dead at a scientific conference at the University of Nairobi, Kenya. 2020 [Sunday 23rd February] Weaponised Antisemitism in British Politics [GE2019 (The Wilmer Report)]: [Read firstly the entry for Evangelism and Evangelistic Preaching - ESSENTIAL FOR TUTORIAL SUPPORT.] On this, the 73rd day since the 2019 British General Election Campaign (GE2019), Jewish Voice for Labour (JVL) [Homepage], the anti-Zionist faction within the fatally-split-over-Zionism Labour Party, publishes its diarised account of the Party's formal investigation of ordinary member George Wilmer [no online presence]. The diary is entitled "The Labour Party Inquisition - A Case Study" [full text online], and it is noteworthy in the present context not just for documenting the mechanisms of the remotely choreographed political slur, but also for reminding us, en passant, of the iniquities of the literal witch-hunts of the 17th century …

¹CAMEO - "THE CRUCIBLE": The header text is from Arthur Miller's (1953) play "The Crucible" [Wikipedia briefing; full text online]. Set in late 17th Century Massachusetts, the play was written at the height of the McCarthy witch-hunts, and is a powerful allegory against the evils of weaponised rightist orthodoxy. 2020 [Sunday 23rd February] The Weaponisation of Diseases [COVID-19 (The Asahi Piece)]: [To understand why the Chinese are so jumpy about CBW, read firstly the entry for Unit 731.] On this the 99th day of the COVID-19 Pandemic, the Japanese Asahi Media puts out a piece suggesting in detail how the Wuhan outbreak was secondary to an earlier outbreak in the United States …

CAMEO - U.S. SEASONAL FLU, 2019: The U.S. Centers for Disease Control and Prevention (CDC) dates their seasonal flu epidemic from 29th September 2019 - see the data curves. The Asahi piece quite reasonably points out that said infection could well have been lurking amongst the 172-strong U.S. contingent at the Military World Games in Wuhan the following month [Wikipedia briefing; see also 18th October 2019].

The Asahi coverage draws no conclusions as to (1) whether the virus was laboratory-developed or a spontaneously emerging natural mutation, or (2) whether the U.S. troops in question [if, indeed, it was they - Ed.] transmitted it deliberately or accidentally. 2020 [Wednesday 26th February] Weaponised Antisemitism in British Politics [GE2019 (The "Zippy" Rebuke)]: On this, the 76th day since the 2019 British General Election Campaign (GE2019), Twitter correspondent "Zippy" reminds his/her readers that two days previously correspondent "Margaret Hodge" [check him/her/out] - perhaps the real Margaret Hodge [check her out], daughter of the Zionist munitions billionaire Hans Oppenheimer - had argued online that "accusing a Jew who calls out antisemitism of working on behalf of Israel is both conspiratorial and antisemitic". Zippy duly offers the following counterargument: "Anyone who conflates Zionism/Israel with the Jewish people in order to shout Antisemitism! at those criticising Zionism/Israel is an antisemite themselves".

RESEARCH ISSUE: This is not mere social media tit-for-tatting, but rather an historically pivotal clash over the very principles of freedom in the modern world. It is not yet finally established whether Britons have lost the privilege of level-headed free speech if it involves criticism of the State of Israel, but this could very well be the case. Updates will be posted as (and if) the debate makes progress.

This same day, a different Twitter correspondent points out that Britain's Crown Prosecution Service (CPS) report into antisemitism within the Labour Party had found that only one of the membership
had transgressed Britain's laws on hate crime, and calls upon a dozen named complainants, including the said Ms. Hodge, Ephraim Mirvis (one of Britain's senior rabbis), The Jewish Chronicle, Joan Ryan, and Ruth Smeeth to apologise. 2020 [Monday 27th February] The COVID-19 Pandemic [Day by Day (The Taiwan TV Piece)]: On this the 103rd day of the COVID-19 Pandemic, a Taiwanese TV piece [online here, unable personally to verify narrative because don't speak Chinese - Ed.] presents epidemiological evidence suggesting that the Wuhan virus had originated in the United States, thus...

"The man in the video is a top virologist and pharmacologist who performed a long and detailed search for the source of the virus. [...] One of his main points is that the type infecting Taiwan exists only in Australia and the US and, since Taiwan was not infected by Australians, the infection in Taiwan could have come only from the US. The basic logic is that the geographical location with the greatest diversity of virus strains must be the original source because a single strain cannot emerge from nothing. He demonstrated that only the US has all the five known strains of the virus (while Wuhan and most of China have only one, as do Taiwan and South Korea, Thailand and Vietnam, Singapore, and England, Belgium and Germany), constituting a thesis that the haplotypes in other nations may have originated in the US. [...] Neither Iran nor Italy were included in the above tests, but both countries have now deciphered the locally prevalent genome and have declared them of different varieties from those in China, which means they did not originate in China but were of necessity introduced from another source. It is worth noting that the variety in Italy has approximately the same fatality rate as that of China, three times as great as other nations, while the haplotype in Iran appears to be the deadliest with a fatality rate of between 10% and 25%. [...] Due to the enormous amount of Western media coverage focused on China, much of the world believes the coronavirus spread to all other nations from China, but this now appears to have been proven wrong" (Romanoff, 4th March 2020 [full text online]).

Unfortunately, modern scientists are government funded, and so the truth may be a long time emerging, if, indeed, it ever will. [THREAD = THE ANATOMY OF A CRISIS]

2020 [Sunday 1st March] The COVID-19 Pandemic [Day by Day (Newspaper Warnings)]: On this the 106th day of the COVID-19 Pandemic, journalist Peter Foster has a piece in The Telegraph entitled "No. 10 and Department of Health Clash Over Access to EU Pandemic Warning System" [full text online], in which he asserts that Health Secretary Matt Hancock was prevented from benefitting under the EU Pandemic Warning System by Prime Minister Boris Johnson, because politically speaking it would have been against the spirit of Brexit. For its part, Newsweek carries a piece by Jenni Fink and Naveed Jamali entitled "Defense Department Expects Coronavirus Will 'Likely' Become Global Pandemic in 30 Days" [full text online INCLUDES SOME INTERESTING ANECDOTES], in which the authors review the present extent and likely trajectory of the separate geographical outbreaks, and pass on the views of a 27th February 2020 Joint Chiefs of Staff presser to the effect that "sustained community spread" within the United States "was inevitable". They name the National Council for Medical Intelligence (NMCI) [see own entry] as being the ones who will declare pandemic once the criteria are eventually met [on the day in question the alert stood at WATCHCON-1, imminent crisis - Ed.], [THREAD = THE ANATOMY OF A CRISIS]

2020 [Wednesday 4th March] The Weaponisation of Diseases [COVID-19 (Early Accusations)]: On this the 109th day of the COVID-19 Pandemic, The Times of Israel publishes a report entitled "Virus is biological attack on China and Iran" [full text online], in which Brigadier-General Gholam Reza Jalali [no convenient biography but much to reward the determined browser], head of Iran's Civil Defence Organisation, is quoted as claiming that "a biological attack has been launched against China and Iran". Also this day, prolific investigative journalist Larry Romanoff puts out a piece on the Global Research website entitled "China's Coronavirus: A shocking update" [full text online], in which he makes an at-first-glance tightly argued technical case that the Wuhan COVID-19 "originated in the United States"...

CAUTION: The problem with "at-first-glance tightly argued technical cases" in any area of human endeavour is that they are a concatenation of carefully selected small truths which does not - upon forensic analysis - necessarily prove the actual or implied headline assertion. Religious and political pamphleteers are past masters at such deliberate deceptions, and people fall for them because they lack the specialist knowledge necessary to
Romanoff cites reports in the Chinese, Japanese, and Taiwanese media, which, taken together indicate that the virus originated "from multiple locations, but began to spread widely only after being introduced to [Wuhan] a wet market in Wuhan". Thus it was that Wuhan's "Patient Zero" was subsequently traced to said market on or about 17th November 2019 [see entry that date]. A subsequent Japanese TV Asahi report [see entry 22nd February 2020] then proposed not only that the disease had originated in the United States, but also that it had been prevalent there for some time, only misdiagnosed as seasonal flu.

"Data on infection rates," he warns, "needs to be accurate [...] or the system is overwhelmed". Check the post out here.

UPDATE (27th March 2020): Sadly, COVID-19 turned out to be so infectious that most of Donald's academically precise arguments were simply swept aside by the tsunami of subsequent events.

Later in the day, Nick Phin [no convenient biography but much to reward the determined browser], Deputy Director of the National Infection Service (NIS) [no convenient briefing but much to reward the determined browser] is interviewed on
BBC *Newsnight*. During the interview he explains very slowly and carefully that if one is experiencing no symptoms one may safely carry on social contacting ...

**POINT OF INFORMATION**: The assertion is demonstrably unsafe because any person can carry infectious material on their clothing or possessions, many days before developing symptoms. It is also highly probably that people can be infectious up to 48 hours before developing symptoms. Somewhere between highly probably and downright certainly, therefore, people will have been infected by government advice of this sort, and a proportion thereof will have died. This is, of course, a consequence of requiring academic scientists to condense millions of words of carefully nuanced knowledge into ministry-approved soundbites going out on the hoof to 66 million people at risk.

2020 [Saturday 21st March] **The COVID-19 Pandemic [Day by Day (Johns Hopkins Data)]:** On this the 126th day of the COVID-19 Pandemic, the *FT*'s vertically logarithmic-scaled graph of the Johns Hopkins University global COVID data shows the outbreaks in South Korea, Japan, and China already well under control, Italy just beginning to respond to its lockdown, and Iran more markedly so. However, Spain, France, the U.K., and the U.S. are more or less in freefall, with the number of cases doubling every three days. [THREAD = THE ANATOMY OF A CRISIS]

2020 [Tuesday 24th March] **The COVID-19 Pandemic [Day by Day (More from the WHO)]:** On this the 129th day of the COVID-19 Pandemic, the Director-General of the World Health Organisation (WHO), Tedros Adhanom Ghebreyesus [Wikipedia biography] recommends using "aggressive and targeted tactics" against the virus, because social distancing and lockdown are not sufficient protection. He also bemoaned widespread shortages of protective equipment for health service personnel - *YouTube the full statement here*. This same day, Twitter user @ewangai engaged the present author with what presented as a coordinated counterintelligence post curtly (and factually unfairly) belittling the Chinese response to the pandemic. 2020 [Wednesday 25th March] **The COVID-19 Pandemic [Day by Day (Pennies Start to Drop)]:** On this the 130th day of the COVID-19 Pandemic, we learn early on that President Trump has ceased for diplomatic reasons to refer to the germ as the "Chinese" virus, that 18,700 final year student doctors and nurses are to be deployed into front-line care in the U.K., that infection rates in Liverpool are causing many there to regret that the Liverpool-Atlético Madrid football match on 11th March 2020, attended by 3000 Spanish fans, had been allowed to go ahead, and to cap it all that Britain's Prince Charles had tested positive for the virus. The Johns Hopkins data later in the day shows the Italy and Iran curves beginning to respond to their respective preventative measures, whilst France, Spain, and Germany might just be indicating a slowdown. The U.K., however, is still in free fall, with cases doubling every three days, and the United States likewise but faster, doubling every two days. Australia is following the U.K. pattern, but about five days behind. In London, meanwhile, the giant Excel Exhibition Centre in Docklands has been requisitioned and is being turned into a 21st Century equivalent of a WW1 triage pit. [THREAD = THE ANATOMY OF A CRISIS]

2020 [Thursday 26th March] **The COVID-19 Pandemic [Day by Day (A Busy Day)]:** On this the 131st day of the COVID-19 Pandemic, there is an early surge of social media posts from U.K. doctors and nurses complaining that government statistics on mortality are being systematically understated. Later in the morning, Sky News' Kate Burley takes Health Minister Edward Argar to task for allowing flights into Britain from Madrid, an infection focus, without any form of screening. Argar trots out the earlier advice that there is nothing to worry about unless persons are showing symptoms -
YouTube it here (6 minutes in). Factually, this is life-threatening claptrap from the politician, unchallenged by the reporter ...

POINT OF INFORMATION: The assertion is demonstrably unsafe because any person can carry infectious material on their clothing or luggage, many days before developing symptoms. It is also highly probably that people can be infectious up to 48 hours before developing symptoms. Somewhere between highly probably and downright certainly, therefore, people will have been infected by these flights, and a proportion thereof will have died. This is, of course, a consequence of permitting two non-medics to waffle on about matters of pandemic advice to 66 million people at risk.

This mention of Spain is followed less than a hour later by reports that the Spanish health service is coming apart at the seams due to attrition of front-line staff resulting from inadequate protective equipment. The topic then comes up again in a different way during the afternoon, when the Twittersphere notices Katherine Hignett’s 24th March 2020 piece in the HSJ entitled "System Failure' on Personal Protective Equipment" [full text online] ...

CAMEO - INTO BATTLE UNARMED: Older readers will remember the press fury at the time of the Iraq War about the standard of equipment issued to British front-line troops - YouTube a reminder here ESSENTIAL VIEWING. Comment is less forthcoming in the present emergency, given that the media have actually been complicit in systematic NHS underfunding throughout the age of austerity.

Further afield, the Chinese are asking the U.S. to release details of the military personnel who had attended the Military World Games in Wuhan last Autumn [Wikipedia briefing; see also 18th October 2019] because they believe they have traced back beyond their own Patient Zero [see 14th March 2020 and 17th November 2019] ...

"George Webb, an investigative journalist in Washington, DC claimed in recent videos and tweets that he believes Maatje Benassi [no convenient biography but much to reward the determined browser], an armed diplomatic driver and cyclist who was in Wuhan in October for the cycling competition in the Military World Games, could be patient zero of COVID-19 in Wuhan. In a report by the US Department of Defense official website on October 25, Maatje Benassi has participated 50-mile cycling road race in Wuhan. Webb also quoted a military lab, the Fort Detrick laboratory that handles high-level disease-causing organisms such as Ebola, in Fredrick, Maryland, which was shut down and moved in July due to unqualified facilities and management system. His conclusions, although without strong evidence, triggered questions on Chinese social media as it came only days after a petition was submitted to the White House website on March 10 listing some coincidences in time between the Fort Detrick lab's closure and the COVID-19 outbreak" (Global Times, 25th March 1920 [full text online]).

And finally, the FT/JHU data later in the day looks like this ...
Note how the Italy and Iran curves are continuing to respond to their respective preventative measures. The U.K. looks as if it is improving, but in view of the debate earlier in the day concerning incomplete reporting we shall regard this as unproven for a day or two. The U.S., however, is clearly still in free fall, with cases doubling every three days.
In much the same vein, people are beginning to accuse those who have so generously been funding Propagandameisterin Kate Andrews of deciding that silence is presently the order of the day: "The BBC has stopped giving [her] a weekly slot to trash the NHS", one sharp-eyed observer remarks. As for the hard-right MSM (roughly the Zombie Nazis seen in recent cinema - Ed.), The Mail leads a preposterous chorusing that it was all China's fault. With statistics for March now nearly complete (courtesy of John Hopkins University), here is a graphic for the month to date, showing the U.S. and U.K. in exponential free-fall, but South Korea under tight but not yet perfect control (the U.K. and South Korean lines are scaled up as though their populations were the same as that of the U.S. - Ed.). We hope to see the U.K. line easing off imminently as we work through the second week of moderate lockdown.

As Bloomberg put it at 0644BST, the U.K. has until now been "a slow-motion train crash". No surprise, therefore, that late in the day people were again questioning the wisdom of allowing the Cheltenham Race Festival to have gone ahead 10th-13th March 2020 in the face of the whirlwind. [THREAD = THE ANATOMY OF A CRISIS]

2020 [Monday 30th March] The COVID-19 Pandemic [Day by Day (Politicians Accused)]: On this the 135th day of the COVID-19 Pandemic, the Twittersphere kicks off with an impassioned appeal from NHS front-line staff that they would be able to save a lot more lives if Britain's politicians were appointed based upon their ability, rather than "just their vacuous and unconditional loyalty to a party". The nation was then cheered by the news late morning that unconditionally loyal political advisor Dominic Cummings has gone down with the virus, as has at least one attendee at the should-have-been-cancelled Cheltenham Race Festival 10th-13th March 2020. The final flurry of discussion concerns warnings from The Telegraph that there is considerable understatement in the mortality figures, which are perhaps only a third of what they should be! The Johns Hopkins data continue the trend-lines described in yesterday's entry. [THREAD = THE ANATOMY OF A CRISIS]

2020 [25th May] Policing, Big Brother Style [V - Police as Imperial Stormtroopers (A Street Execution Too Far)]: [Continued from 29th August 2019] On 25th May 2020 a black American named George Floyd was killed by Minneapolis police officer Derek Chauvin without intervention from three fellow officers at the scene. Here are the Wikifacts of the matter ...

"On May 25, 2020, police were called by a [chain] grocery store employee who suspected that Floyd had used a counterfeit $20 bill. Floyd was sitting in a car with two other passengers. Police officers forcibly removed Floyd from the car and handcuffed him. Floyd was murdered by Derek Chauvin, a white Minneapolis police officer, who pressed his knee to Floyd's neck for 9 minutes and 29 seconds while Floyd was handcuffed face down in the street. As seen in a witness's cell-phone video, two other officers further restrained Floyd and a fourth prevented onlookers from intervening as Floyd repeatedly pleaded that he could not breathe. During the final two minutes Floyd was motionless and had no pulse, but Chauvin kept his knee on Floyd's neck and back even as emergency medical technicians arrived to treat Floyd." 2020 [16th September] **Policing, Big Brother Style [VII - On Closet Racism (The National Trust Slavery Report)]:** [Continued from 7th June 2020] On 16th September 2020 Britain's National Trust - a charity which is concerned *sensu stricto* with upkeeping the fabric of many of the nation's stately homes - publishes
a report into the sometimes darker side of that stewardship. Specifically, the Trust is proposing to feature - both on-site and in their literature - how the families who built those homes got the money. For it was not always success on the battlefield or relatedness to royalty which earned you your stately pile - sometimes it was profits from the slave trade. The title of the report - "The Connections between Colonialism and Properties now in the Care of the National Trust, Including Links with Historic Slavery" [full text online] - makes the RESEARCH ISSUE very explicit. Indeed, the whole piece is a brave attempt by the Trust's Head Curator, Sally Huxtable [academic homepage], along with three fellow editors and seven contributing authors, to take a grown-up position on the "curatorial narratives" [a.k.a. "the truths" - Ed.] beyond the bricks and mortar, thus ... "The National Trust has an outstanding track record in the stewardship of our nation’s most beautiful spaces and is unrivalled in the care that it takes of our loved houses and treasured collections. It must deliver a similar kind of delicate stewardship to the curatorial narratives that animate them. Occasionally, it should thoughtfully prune, pollard, train and graft to remain healthy, sensitive and relevant. And, as with the rest of the heritage sector, it should be proud to do so" (op. cit., p4).

It turns out that the Trust administers 93 properties built with slave money, including Chartwell [Trust briefing], the ancestral home of the Churchills. Predictably enough in hindsight, the report's publication is met with an immediate chorus of criticism from Britain's closet fascists, carefully whipped up by rightist media and secretly funded - like the Brexit Campaign before it - by offshore think tanks and pressure groups. In it he expresses deep pessimism concerning the state of the U.S. economy, and sees strange things going on in the equities and bonds markets. This leads him to conclude that the U.S. financial system is on the verge of a major crash to rival that of 1929, if not surpass it for depth and savagery. The problem, in his view, is mainly that the system has been played as "a rigged game", with continual stimulus printings and blatant market manipulation in the form of "artificial support". This has been largely unhindered because the reserve banking system is no longer bound by the checks and balances which politicians forced upon it back in 1913 when it was introduced [see 23rd December 1913]. Moreover, the problem is not simply one of economic theft on a solar scale, but also the attendant risk of setting the social agenda for the foreseeable future. Specifically, Celente predicts a "youth rebellion" by the planet's under-30s, who see little prospect of a happy and fulfilling life, and who therefore have nothing to lose and much to gain by casting off the model of "Slavelandia" offered to them by the bankers [sub-thread continues at 4th March 2021]. ***** NOW YOU SEE THEM, NOW YOU DON'T *****
(YOUR SAVINGS, THAT IS)
"A 20 billion dollar story"
The Fiat Currency Megatheft [VI - The Dollar Reset of 2021 (The Archegos Meltdown)]: [Continued from 17th March 2021] On 26th March 2021 Archegos Capital Management [Wikipedia briefing] announces that it cannot meet Margin Calls from a number of creditor institutions for what looks to be over-leveraged securities trading in the sum of probably several billion dollars. By mid-session 30th March, two of the creditor banks are being particularly adversely affected by doubts as to precisely how much the Archegos default is likely to cost them. These are Credit Suisse [Wikipedia briefing] and Nomura Holdings [Wikipedia briefing], both down about 15% on the day. The particular problem appears to be that a dealing arrangement known as "swaps" falls outside the existing regulatory framework (such as it is) - and is well-loved for that precise reason ...

ASIDE - "SWAPS" AS SYSTEMATISED DECEPTION: A Swap [Wikipedia briefing] is an exchange of collateralised debt instruments between large institutions. It carries with it permission for one at least of the parties to take a liability "off the books". This makes it impossible for the market to assess grossed-up liability in any one security (or type, or market sector), and at the same time places future dealings outwith the (already toothless) remit of market conduct auditors.

ASIDE - MARGIN CALLS AS "CHANCE CARDS"® IN THE GAME OF LIFE: A Margin Call [Wikipedia briefing] is a dealer's ad hoc request for additional funds from an investor following a reappraisal of the risk. This can cause acute financial embarrassment to the investor, especially if s/he/it is highly leveraged. In the Archegos case, the margin call followed the dealer's chance discovery of the previously undeclared swaps. Markets keep their ears to the ground for news of emerging margin calls, in case they are themselves exposed to the same risk. Indeed it is not uncommon for margin calls to trigger a domino rally within a particular security or class of securities.

ASIDE - LEVERAGING: Leveraging [Wikipedia briefing] is a form of betting with someone else's money, keeping the winnings, and facing instant financial disaster if you lose. The essence of the deal is that you do not invest in a given security for its long-term merit. Instead you trade in expectation of a short term movement in the share price (which will have been arranged in advance if you know the right people). If you do the initial deal on your credit card, say, then you can max it out in the hope that you will have sold the security on at a profit before you get the credit card bill. You will often hear the term "highly geared" as a synonym for "highly leveraged". Here are some specimen numbers (we have ignored dealing costs, which will always be a few percent in the wrong direction) ...

SCENARIO: Research or hearsay convinces you that a given investment will shortly be rising by 20%. You have £1000 available to invest, promising an "unleveraged" profit of £200, therefore. But you choose to invest £10,000 against your credit card. LUCKY OUTCOME: The price does, indeed, go up, and you sell for £12,000, giving a leveraged profit of £2000. Drinks all round. NULL OUTCOME: The price stays where it is, and you sell at £10,000, leaving you back where you started. Bin the holiday brochures. UNLUCKY OUTCOME: The price drops and you sell at £8000, thus leaving you with a NULL OUTCOME. The price drops and you sell at £8000, thus leaving you with a NULL OUTCOME. The price drops and you sell at £8000, thus leaving you with a NULL OUTCOME. The price drops and you sell at £8000, thus leaving you with a NULL OUTCOME. The price drops and you sell at £8000, thus leaving you with a NULL OUTCOME. The price drops and you sell at £8000, thus leaving you with a NULL OUTCOME. The price drops and you sell at £8000, thus leaving you with a NULL OUTCOME.

So leveraging puts you in a casino, where you will in all likelihood be fleeced. Check out this Wall Street Journal piece for a sadly typical horror story. Banks do leveraging all the time, however, and simply charge their losses to their depositors when it all goes wrong. Indeed, it is as close to highway robbery as you can get without needing a mask.

As usual it turns out to be too late for financial commentators to discuss the matter constructively, and it will now be many months before investigations are complete. Indeed, by 31st March, the markets are already proclaiming "a scandal of enormous proportion" and demanding greater "transparency in reporting economic interest". Here is typical coverage from the online community as it stands at open business in London 31st March (note the developing Japanese exposure) ...

**The Death of British Democracy [XV - The Right to Protest (Fifth Column Caught Red-Handed?)]:** [Continued from 13th March 2021] After a day of almost totally peaceful protest in London against the proposed new Policing Bill [Wikipedia briefing] (which itself could potentially remove the right to protest in this fashion), it turns out that the "Kill the Bill" protest has been given a far more sinister "Kill Cops" flavour by the person and banner shown below [screenshot from Twitter, 0802hr 4th April - Ed.]

Problem is, the "protester" in question is - it seems - a police special operative of some description.

If suspicions are confirmed [this is only a STOP PRESS entry - Ed.], then this incident could well end up alongside the Reichstag Fire and the Gulf of Tonkin Incident in the black museum of False Flag Attacks [check out our list]! The U.K., in short, has openly and unashamedly "gone full Nazi" in its "Tufton Street" Rebranding [Wikipedia briefing ESSENTIAL CONTEXT] of itself [sub-thread continues at 7th April 2021], [THREAD = THE DEATH OF DEMOCRACY] [THREAD = THE BATTLE FOR HEARTS AND MINDS] [THREAD = THE COGNITIVE SCIENCE OF POLITICAL PROPAGANDA] [THREAD = BRITISH NAZISM] [THREAD = FALSE FLAG SPECIAL OPS]

**Mind Control, Big Brother Style [I - The War On Woke (The National Trust Campaign)]:** [New sub-thread] On 4th April 2021 a secretly funded and exceptionally well-connected pressure group of rightist National Trust members launches a campaign against the "wokes" in their number, who had recently embarrassed that most middle-class of organisations by daring to point out which of the Trust's many stately homes had been built originally with profits from slavery ...

**RESEARCH ISSUE - "WOKES" AND "WOKEISM":** In fact, the epithet "woke" had been doing the rounds since the 1930s, but had never really caught on [Wikipedia etymology]. It then became more popular in the early months of the #BlackLivesMatter movement [separately threaded from 13th July 2013], when supporters thereof were encouraged to "get woke", that is to say, to become more aware of racial prejudice, especially when socially subtle [as in entry V downthread]. Then something very strange happened, and the word was flipped - turned deliberately against itself - by master-propagandists in the Western MSM. It became instead the racist media's preferred term of disrespect for non-racists: if you thought oppressing blacks was wrong, then you were just too wishy-washy to take seriously. The psychology has yet to be precisely explained, but it is safe to say for the moment that the flipping could not have happened without the direct involvement of military grade surveillance and opinion control resources. Research will be closely monitored.

The pressure group in question cleverly dubs itself the Restore Trust [homepage], and its backers had clearly pre-arranged access to their friends in the media. Among the headlines thus guaranteed we have this piece of sophistry from The Daily Telegraph on 14th April 2021 [INTELLECTUALLY SHAMEFUL] [sub-thread continues at 27th May 2021], [THREAD = CLOSED FASCISTS] [THREAD = THE DEEP PSYCHOLOGY OF HUMAN HATRED] [THREAD = CLIENT JOURNALISM AS THE DEATH OF CIVILISATION]

**The Fiat Currency Megatheft [VII - The Dollar Reset of 2021 (New Money Supply Rules)]:** [Continued from 26th March 2021] Johns Hopkins University's economics professor Steve Hanke [Wikipedia biography] is interviewed today on the topic of M2 Money Supply [Wikipedia briefing] by the Kitco News Channel's David Lin. The interview comes after the U.S. Treasury has decided to publish money supply figures only monthly from now on, and it is Hanke's judgement that this move is to stop investors - institutional and private - from constantly second-guessing "M2 spikes". As he quite cleverly puts it, the authorities are "taking the M2 chart off the wall", the better to control
inflation expectations. **YouTube the full interview here** [sub-thread continues at 13th May 2021]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = STOCK MARKET AND FINANCIAL SHARP PRACTICE]

2021 [Wednesday 7th April, late] The Death of British Democracy [XVI - A Broken Nation (The Problem Perfectly Stated)]: (Continued from 3rd April 2021] A Tweeter who shall remain anonymous sums up the national morale in a late evening posting as follows ...

"This country is the unhappiest I've ever known it. It's won nothing. It's lost. And it knows it but it can’t admit it. So it rages. It lies. It waves its flag. It demands loyalty. It craves respect. It gets neither. It turns on itself. It breaks itself apart in its anger."

The eloquence clearly resonates with the overnight audience for these words will have been retweeted more than a thousand times by dawn [sub-thread continues at 15th July 2021]. 2021 [Friday 9th April] The COVID-19 Pandemic [Day by Day (More On The Gupta Model)]: [Read firstly the entry for 24th March 2020 above.] Investigative journalists James Cusack and Peter Geoghegan put out a piece in OpenDemocracy entitled "Tory billionaire bankrolled 'herd immunity' scientist who advised PM against lockdown" [full text online ESSENTIAL READING]. The billionaire in question is the German/Swiss/British Georg von Opel [Wikipedia biography; see also Blanchard (2015 [full text online WELL WORTH A LOOK]), via his Georg and Emily von Opel Foundation [Open Charities briefing]. The von Opel family fortune was made in Germany in the late 19th Century in bicycles and sewing machines, their company expanding in the early 20th Century into the Opel automobile marque and becoming part of General Motors in 1927. The scientist in question is "theoretical epidemiologist" Sunetra Gupta, whom we have previously introduced (and criticised technically) in the context of Herd Immunity in Spring 2020 [see the Read Firstly above]. The new accusation is that the Billionaire funded the Scientist's work in order to influence Prime Minister Boris Johnson against a strong precautionary lockdown that Spring, thereby rather predictably (and totally unnecessarily) killing a hundred thousand Britons during the ensuing Wave #2 and Wave #3 infections. The implication of the piece is that the Billionaire's motivation remains unknown. For our own part, we doubt whether any Charity Commission rules have been broken.

**The Great Reset - YouTube April 2021 update**

Having now isolated "Net-Zero" [Wikipedia briefing] as the objective, it turns out that one of the barriers to progress toward that objective turns out to be a shortage of "data", specifically, where it prevents "private markets" producing new products for maximum impact. More on this in due course [sub-thread continues at 9th September 2022]. ***** Rutgers puts its finger on the problem *****

2021 [29th April] Policing, Big Brother Style [X - Police as Imperial Stormtroopers (The Rutgers Report)]: [Continued from 13th March 2021] On 29th April 2021 Rutgers University's CLiME Center [Homepage] publishes a report by researchers David Troutt and Gatien Laurol entitled "Brutality by Design: Understanding Police Misconduct as Structural Inequality" [full text online THOUGHT PROVOKING], in which they argue that modern police brutality - "primarily the exercise of lethal force against unarmed persons" (p1) - indicates that policing works to "systemic goals" in which the public is "subordinated" to "some other" goal. They hesitate - we suspect wisely - to specify the true culprits other than generically, happily quoting Lepore (2020 [full text online]) to the effect that the police "are the king’s men" (p2). They then explore such structurally causal factors as the practical barriers to prosecuting police misconduct and the difficulty getting liberal legislation through lawmakers sworn to maintain
the status quo [sub-thread continues at 5th December 2022]. [THREAD = FASCISTS IN UNIFORM] [THREAD = CLOSET FASCISTS] [THREAD = THE DEEP PSYCHOLOGY OF HUMAN HATRED]

Blinken is then taken to task a few hours later in a surgically precise response by the highly respected (but admittedly not entirely unaligned) political commentator Alexander Mercouris [Homepage], whose points are best understood in their full 35-minute form ...

So the questions at hand, as we shall leave them for the time being, are (1) whether China actually understands what these American-dictated "rules" actually are, (2) whether they are consistent with the more established rules of International Law and Diplomacy, and (3), to the extent that they are instead merely an attempt at bullhorn intimidation, where they should be telling the United States to stick them [sub-thread continues at 9th September 2021]. ***** KAKISTOCRACY, HOW AND WHY *****
The Death of British Democracy [XVII - Propaganda Technique (Snyder on "Sadopopulism")]: [Continued from 7th April 2021] In a piece for The New European entitled "Boris Johnson: The Sado-Populist Prime Minister", political columnist Alistair Campbell introduces Britain to Yale scholar Timothy Snyder's [Wikipedia biography] concept of "Sadopopulism" [no convenient briefing but much to reward the determined browser]. Sadopopulism, in Snyder's analysis, is a deliberate combination of a "kakistocrat" [definition] (typically a populist buffoon), compliant media, and an extraordinarily well-funded hidden agenda ...

We note this for the moment merely as an indicator of how vulnerable the United States' economy is to volatility internationally: the presenter even mentions the possibility of "weaponised interest rates". ***** THE FRANKENSTEIN BUG FROM NORTH CAROLINA *****

***** GUEST ITEM (COPYED IN FROM COVID, DAY BY DAY) *****

***** CAUTION *****

YOU ARE ABOUT TO ENTER A WAR ZONE

2021 [Wednesday 18th August] The Weaponisation of Diseases [COVID-19 (The Military Olympics Again)]: On 18th August 2021 China's Difference Frames the World (DFtW) online news magazine uploads a piece to YouTube entitled "Ralph Baric: The Coronavirus Hunter That Is Under the Spotlight" in which they review the latest evidence pertaining to China's now 18-month-old [August 2021] argument that it was American labs which developed the pandemic strain of COVID, and potentially Americans who vectored it to Wuhan around the time of the 2019 Wuhan Military Games [Wikipedia briefing]. Or to put it bluntly ...

Although COVID-19 was first identified in Wuhan it did not originate there

It probably came from the United States

Possibly deliberately

Before we watch the piece for ourselves, here is some hopefully helpful background to the issues raised and the people and places discussed ...

QUICKIE - RALPH BARIC AND RECOMBINANT VIRUSES: The eponymous "Coronavirus Hunter" is Ralph S. Baric [Wikipedia biography]; University Homepage ESSENTIAL PRIOR CONTEXT, of the Gillings School of Global Public Health [map] at the University of North Carolina (UNC) at Chapel Hill. His
Wiki states [23rd August 2021] that his work “involves coronaviruses, including Gain of Function Research (GoFR) [Wikipedia briefing ESSENTIAL UNDERSTANDING] aimed at devising effective vaccines against coronaviruses”; also that he holds patents in a lab process designed to mutate “recombinant viruses” to order [Wikipedia briefing: further explanation in the third minute of the video].

**ASIDE:** The present author takes it as axiomatic that the deliberate manufacturing of self-reproducing pathogens of unknown infectivity is Frankenstein science - unpredictable and exciting in about equal measure - and, if it is to be done at all, that it should only be done under total, transparent, competent, and benevolent supervision, and in conditions of pinnacle biosecurity.

**Readers unfamiliar with <Fort Detrick’s> place in the history of chemical and biological warfare (CBW) should study the Companion entries for**

- <Camp/Fort Detrick>
- <Ira Baldwin>
- <Theodore Rosebury>
- <Joseph Needham>

before proceeding. (This may take some time!!)

**WHOLE HERD OF ELEPHANTS IN THE ROOM - "FORT DETRICK":** In the video you will hear mention of two organisations working out of FrederickMD's Fort Detrick. These are (1) the military’s U.S. Army Medical Research Institute of Infectious Diseases (USAMRIID) [Wikipedia briefing ESSENTIAL PRIOR AND ONWARD CONTEXT], and (2) NIAID’s [Wikipedia briefing] largely civilian Integrated Research Facility at Fort Detrick (IRF-Frederick) [NIAID briefing; take YouTube tour SETS THE SCENE].

We shall be looking in greater detail at the three-way relationship between these two organisations and UNC at various points in the table below. The pachydermic problem is that military microbiology's search for countermeasures to a particular bug-of-concern presumes that an enemy will have GoFRd weapons grade versions of it, and so it makes sense to stay ahead of them in that respect by making some for yourself; thus creating a GoFR weapons race. The companion readings above will already have introduced some of the grisly implications of this macabre dance with death.

When viewing the *DFtW* piece, note the pivotal role of the UNC as research contractor in government funded coronavirus research, the repeated biohazard containment failures at the various research sites, and the intrinsically Doomsday nature of all GoFR. The piece also makes much of the petition to have the U.S. government invite the World Health Organisation (W.H.O.) to investigate Fort Detrick’s role in the present pandemic. Watch out also for mention of Wuhan's very own Batwoman, Shi Zhengli ...

**QUICKIE - SHI ZHENGLI:** Shi Zhengli [Wikipedia biography VERY HELPFUL] became a senior researcher at Wuhan Institute of Virology (WIV) [Wikipedia briefing] in the mid-2000s, specialising in the coronavirus strains to be found in wild animals (we have already noted the nature of her work at 28th October 2005 above). She is better known nowadays (a) for having been part of the team which isolated Strain SHC014-CoV [Wikipedia briefing] from (to be precise) Chinese rufous horseshoe bats in the early 2010s, (b) for passing specimens thereof to the aforementioned Baric, who then applied his patented recombinant process to them, (c) for working on contracted U.S.-funded UNC-WIV collaborative projects 2014-2019, and (d) for advising China's to date highly successful civilian defence response to the pandemic as it took hold in early 2020.

**YouTube the DFtW piece here**

<td><strong>ASSERTION #1:</strong> That a Global Times petition has been calling upon the U.S. government to invite the W.H.O. to look into Fort Detrick's part in causing the pandemic.</td>
<td>The narration quotes <em>Global Times</em> statistics but gives no precise citation. However the numbers are confirmed by a separate 7th August 2021 piece entitled &quot;Fort Detrick probe petition&quot; [full text online]. This is a Chinese government news agency piece in an ongoing war of words with U.S. government news agency pieces, hence the admonitory tone. As a matter of record, the evidence is therefore admissible.</td>
</tr>
<tr>
<td>00:55</td>
<td><strong>ASSERTION #2:</strong> That &quot;the evidence produced by the Chinese media and personnel was fabricated&quot;.</td>
<td>Again no specific citation is given, but again confirmation is easy to obtain. For example, we ourselves diarised the original accusations over a year ago [see Timeline 25th March 2020], to the effect that the Patient Zero for the Wuhan outbreak looked like being Sergeant Maatje Benassi, one of the cyclists in the U.S. squad at the October 2019 Wuhan Military Games. We noted also that it took only 48 hours for the American magazine <em>Cycling Tips</em> to dismiss the suggestion out of hand [see the denial]. And it was not just <em>Cycling Tips</em> which responded, for the denial was quickly and professionally syndicated, thus ... <strong>STUDENT EXERCISE:</strong> Readers may confirm this for themselves by browsing and sampling hits for the keywords &quot;maatje benassi&quot; &quot;denial&quot; [these keywords returned 4990 hits on Google, 25th August 2021, rising to 5010 the following day - Ed.]. In fact, the syndicated denials are models of deliberate deception, complete with gratuitous adverbs and adjectives - check it out here. Study the devices used, and then rewrite the <em>Cycling Tips</em> piece without the gratuitous qualifiers or any <em>ad hominem</em> attacks. So yes, there was a veritable tidal wave of counter accusations that the Chinese had fabricated evidence.</td>
</tr>
<tr>
<td>01:00</td>
<td><strong>ASSERTION #3:</strong> That the petition website had been maliciously hacked.</td>
<td>Again no specific citations are given, but the cyberhack is confirmed by a 25th July <em>Global Times</em> piece entitled &quot;U.S. cyberattack on petition&quot; [full text online]. Again this is a Chinese government news agency piece in an ongoing war of words with U.S. government news agency pieces, hence the admonitory tone. And again, as a matter of record, the evidence is therefore admissible.</td>
</tr>
<tr>
<td>01:05</td>
<td><strong>ASSERTION #4:</strong> That &quot;to date the W.H.O. still keeps silent on whether Fort Detrick should be investigated or not&quot;.</td>
<td>The W.H.O. is just an NGO and has little or no jurisdiction in the United States, unless invited in - check out the W.H.O.'s terms of reference here. However, the call for such an invited investigation was indeed made by the Chinese Foreign Ministry, and reported in a 27th July 2021 piece entitled &quot;China urges U.S. to invite W.H.O.&quot; [full text online]. The aforementioned <em>Global Times</em> petition was in support of this call. Moreover, at time of writing, the W.H.O. website does indeed remain &quot;silent&quot; on the matter, and so we judge Assertion #4 to be admissible.</td>

NEW SECTION INTRO: "Here is a summary of public reports and academic papers from the U.S. media that put the U.S., especially Fort Detrick, under the spotlight." That spotlight shines firstly upon the University of North Carolina (items #5 through #14), before moving on to the two Fort Detrick establishments previously mentioned.

01:40 ASSERTION #5: That UNC is not up to the biocontainment tasks involved with high-risk pathogens.

PRECISE CITATION:
Young and Blake (2020). "Here are six accidents UNC researchers had with lab-created Coronaviruses" (17th August 2020)

CONCLUSION SUGGESTED: "If there is really a lab leak it should be in North Carolina, not Wuhan."

Read the cited evidence here.

This article appeared in ProPublica, an American investigative journalism site, but may be independently confirmed by the Centers for Disease Control (CDC) response to leaks back in 2014 - see, for example, Lin (2020). The fact that everyone thought GoFR research had been discontinued as unsafe was also noted in The New York Times 5th August 2019 (check it out). The suggestion that UNC should have been the first place to look for a leak therefore seems perfectly fair comment.

02:00 and 02:55 ASSERTION #6: That UNC's Ralph Baric "is notable for his coronavirus research [...] and] has a skill that can transform, and even enhance, the coronavirus through reverse genetic technology".

PRECISE CITATION:
Jacobsen, R. (2021). "Inside the risky bat-virus engineering that links America to Wuhan" (29th June 2021)

Read the cited evidence here.

This paper appeared in MIT Technology Review. This is not a primary journal, as such, but rather a digest summarising the MIT family of primary journals. It is therefore an absolutely top-flight reputable source of informed and objective technical commentary.

FURTHER READING: This paper is a concise and readable introduction to a difficult subject. SO IF YOU ONLY READ ONE OF THE CITED ARTICLES MAKE IT THIS ONE!!

02:30 ASSERTION #7: That in 2003 Baric published a paper "showing the power of this technology, and that he successfully resurrected a SARS virus".

PRECISE CITATION:
Yount, B. et al. (2003) "Reverse genetics with a full-length infectious cDNA of severe acute respiratory syndrome coronavirus"

Read the cited evidence here (Baric, as research supervisor, is 9th and last author, but it is common academic practice to list authors by hours spent rather than by seniority, and so seniors go last).

This paper appeared in Proceedings of the National Academy of Science, another absolutely impeccable source.

02:40 ASSERTION #8: That in 2007 Baric obtained patents for his genetic modification technique.

PRECISE CITATION:

Read the cited evidence here.

This description of Baric's technique is detailed and precise in the extreme, as patents, by their very nature, have to be.

02:45 ASSERTION #9: That "this unique virus technology quickly made Baric the top coronavirus expert in the United States".

Read the cited evidence here.

The narration offers no precise support for this assertion. However we find it admissible given that at time of writing [= 29th August 2021] PubMed lists 357 publications to this author from 2002, of which 38 are dated 2002-2007, inclusive.

2 In the event, it would be Baric’s patented techniques which eventually made this possible.
### 04:25 Assertion #15

**Assertion:** As follows (verbatim): "More shocking is the relationship between Baric and the questionable Fort Detrick biolab in Maryland. Many scientific research papers show that Baric has conducted many studies investigating coronaviruses with the U.S. military laboratory in Fort Detrick. For example a 2006 paper showed that they had scientific research cooperations on SARS."

**Precise Citation:** None.

The narration offers no precise citation on this point. Baric’s Wiki mentions no institutional affiliation other than UNC, and neither do any of his 357 PubMed publications since 2002. However, the nature of such publications is that each has many authors, matrix managed by a senior researcher, with teams drawn from different universities both in the U.S. and - frequently - worldwide, including, in the later papers, China's WIV. Moreover, where the number of authors is high [the Menachery paper has 15!] not all journals insist that all authors list an affiliation. Worse, where a university student is grant-funded to a particular government programme, that student will list to his/her university, not the programme. So, taking the Menachery paper as our example, we find fifteen authors claiming nine affiliations, none of which is "Fort Detrick". However, if you study the Acknowledgements section at the end of the paper (page 5) you can start to piece together the overall thrust of the background research, and the funding arrangements in place. Here is a snip from that section: "Research in this manuscript was supported by grants from the National Institute of Allergy & Infectious Disease [etc.]." And that is NIAID, and NIAID's centre of excellence is IRF-Frederick, *quod erat demonstrandum.* Detailed cross-examination will likely be necessary if the case gets to court, but in the meantime ...

### 04:45 Assertion #16

**Assertion:** As follows (verbatim): "There are two institutions in Fort Detrick involved in the research and development of coronaviruses. One is the USAMRIID under the U.S. Army, and another is IRF-Frederick under the National Institutes of Health. Baric has relations with both of them."

The narration merely states this as a matter of record, which it is - see header links.

As to Baric having conducted research with both of these establishments, the next two assertions present the evidence.

### 05:00 Assertion #17

**Assertion:** That the article below confirms Baric’s work at/with USAMRIID.

**Precise Citation:** Khalili, R. A. (2021). "Birx, Baric headline annual festival" (7th May 2021).

Read the cited evidence here.

This short piece appeared in USAMRIID's house newsletter, put out by the Public Affairs Office of the U.S. Army Medical Research and Development Command (USAMRDC) [Wikipedia briefing].

Incidentally, the piece includes a statement by "former White House Coronavirus Response Coordinator" Deborah Birx [Wikipedia biography] to the effect that "this is the time when I think the military can uniquely contribute to [effective pandemic response]", not least by its ability to conduct large-scale testing and fast-response "global manufacturing".

### 05:20 Assertion #18

**Assertion:** That Baric worked with IRF-Frederick, that their director, Lisa Hensley [Wikipedia biography; NIAID academic management structure], had been a student of his, and that she had

The narration jumps at this point to the paper identified in #19 immediately below. However, it is possible to confirm the #18 assertions independently by checking out (1) Henley's Wikis, which do indeed show her as Deputy Director of IRF-Frederick, and (2) her PubMed profile. At time of writing (= 1st September 2021) Pubmed lists 158 publications to this author, in the period 2002 to
worked also with USAMRIID projects; also that Baric's trademark technology has been widely used "in these connections".

**PRECISE CITATION:** None.

---

**05:45**

**ASSERTION #19:** That the article below not only confirms Baric's work at/with IRF-Frederick, but also confirms the ability of a Frankenstein bug produced using his technique to infect a living mammal. The highlighted author on this occasion is one Lisa Torzewski [no convenient biography].

**PRECISE CITATION:** A. S. Cockrell, et al. (2018). "A spike-modified Middle East Respiratory Syndrome Coronavirus (MERS-CoV) infectious clone elicits mild respiratory disease in infected rhesus monkeys".

Read the cited evidence here. (Readers in a hurry will be relieved to note that the facts of a genetically modified MERS coronavirus being able to infect a living primate require reading no further than the full stop at the end of the Title!)

This paper appeared in the journal *Nature Scientific Reports*, again a totally reputable source. Torzewski was listed 9th of the 13 authors, and does indeed declare NIAID/IRF-Frederick as her affiliation. Baric went 12th author. At time of writing [= 1st September 2021] Pubmed listed 5 publications to this author, in the period 2017-2019. Four of those papers showed as co-authored with Hensley, and one with Baric.

---

**06:00**

**ASSERTION #20:** As follows (verbatim): "Both IRF-Frederick and USAMRIID study dangerous coronaviruses, including SARS and MERS [...] with poor laboratory safety records".

**PRECISE CITATION:** Assertion #20 is presented verbally over a visual of an RH-4 Laboratory Incident Report concerning a gloving failure while handling a hazardous specimen. The narration refers to, but does not show, a 2014 report on laboratory safety by the *Frederick News-Post*. The substantive adverse incident is easier to confirm, since it is one of the six already documented in #6 above.

---

**06:40**

**ASSERTION #21:** As follows (verbatim): "IRF-Frederick's laboratory also had a security incident involving the Ebola virus in 2015 according to a report in July 2016 by WKYC, a local media affiliated to the NBC news network".

**PRECISE CITATION:** The WKYC report.

The narration offers no library citation for the WKYC report, but it is available - sort of - at the following URL, although again we failed to access it. Fortunately, the title alone is enough to make the Chinese assertion answerable in court ... "http://www.wkyc.com/article/news/nation-now/hundreds-of-safety-incidents-with-bioterror-germs-reported-by-secretive-labs/95-260948697"

Alternatively, just see the independent confirmation in *USA Today* 28th May 2015 [full text online].

---

**07:12**

**ASSERTION #22:** As follows (verbatim): "The U.S. Army's USAMRIID is also horrifying. On the eve of the COVID outbreak in the fall of 2019, Fort Detrick had a severe security incident and even the research was suspended. Comments as above as regards the *Frederick News-Post*. Fortunately, the more authoritative *New York Times* confirmed the facts independently on 5th August 2019 in a piece entitled "Deadly germ research is shut down at Army lab over safety" [full text online].
Among them, according to a report by the *Frederick News-Post* on November 23rd, 2019, besides the issues found in the laboratory waste water treatment system [garbled] laboratories engaged in high-risk research were also found to have serious safety risks and failed to comply with regulations.

See our remarks below.

To summarise, this 12-minute piece brings together an appropriate mix of primary scientific papers and secondary scientific or magazine pieces. The end result is a coherent and in many respects compelling overall argument from the Chinese plaintiff before the Court of World Opinion. We looked for, and have been unable to detect, any mis-representations of the literature, either accidental or suspicious. As for the concluding paragraph, we are not a fan of rhetorical questions in rational argument, and would have preferred a more indicative exit line, such as, say: "DFtW therefore supports the Chinese Foreign Ministry's calls for the United States to invite a W.H.O. inquiry into these accusations, and appeals to the unaligned peoples of the world to add their names to the Global Times petition" [sub-thread continues at 30th August 2021.] [THREAD = THE ANATOMY OF A CRISIS] [THREAD = 21ST CENTURY BLACK OPS/FALSE FLAGS] [THREAD = BIOLOGICAL WARFARE]

Mercouris points out that the three countries involved are already allies in the "Indo-Pacific", and that there is no formal need for another layer of treaty obligations under what in effect would be a "sort of Pacific NATO". RECOMMENDED - INCLUDES MUCH USEFUL BACKGROUND

The problem hinges, it seems, on the precise interpretation of the "One China Principle", that is to say, the notion that the Communist mainland and the Nationalist Taiwan are existentially two feuding cousins in a single country. Here is a clip we have found to explain some of the diplomatic history (note the U.N. Resolution of 1971 and the China-US Joint Communiqué of 1978) ...

"The Chinese government's solemn and reasonable stand for the One-China Principle has gained the understanding and support of more and more countries and international organizations, and the One-China Principle has been gradually accepted by the international community at large. In October 1971, the United Nations General Assembly adopted at its 26th session Resolution 2758, which expelled the representatives of the Taiwan authorities and restored the seat and all the lawful rights of the government of the PRC in the United Nations. In September 1972, China and Japan signed a Joint Statement, announcing establishment of diplomatic relations between the two countries, and that Japan recognizes the government of the PRC as the only legitimate government of China, fully understands and respects the Chinese government's position that Taiwan is an inalienable part of the territory of the PRC, and promises to adhere to the position as prescribed in Article 8 of the Potsdam Proclamation. In December 1978, China and the U.S. issued the Joint Communiqué on the establishment of diplomatic relations, in which the U.S. "recognizes the government of the People's Republic of China as the sole legal government of China" and "acknowledges the Chinese position that there is but one China and Taiwan is a part of China" (source).

It now seems, in Mercouris's judgement at least, that the U.S. only signed the 1978 Joint Communiqué in order to put the Soviet Union's nose out of joint, and that the latest noises out of Washington are from Neocon hawks pushing their hand to the limit. For their part, the Chinese (1) pointedly sent a 56-aircraft incursion into Taiwan's outer Air Defence Zone - the ADIZ - while at the same time (2) calmly advised Washington to "handle the situation prudently". Again, watch for developments below [sub-thread continues at 21st July 2022].

Neither that figure, nor the circumstances of its loss, has been recently independently reported in the mainstream financial press. THOUGHT-PROVOKING VIEWING

It may or may not be relevant that one of the statistics to have emerged of late from the ongoing NATO-Ukraine War is that following the US-contrived 2013-2014 Ukraine Coup [Wikipedia briefing] some 70% of Ukrainian farmland [pre-invasion borders - Ed.] had been acquired in only eight years by ten trillionaire internationals, including Monsanto, Cargill, Blackstone, and Vanguard (Celada, 2022 [full text online EXPLAINS SO VERY MUCH]). YouTube the piece here

While Golka's headline point - that banks are not turning distressed mortgagees out onto the streets - is superficially reassuring, the undercurrent to his piece is that lenders are preferring to hike interest rates and extend repayment periods instead, thus making things worse for everybody concerned in the long run. **STRONGLY RECOMMENDED AS A DETAILED AND OBJECTIVE BRIEFING**

The piece closes by wondering what is going to happen once the U.S. can no longer "conceal the reality" of NATO's disastrous adventurism in Ukraine from the Western public. Mercouris does not mention, but we suspect that there are valuable historical lessons to be learned from, the 1942-1943 Stalingrad Campaign. The thrust of this piece is that there have been complaints from his followers that banks are refusing (or are perhaps unable) to hand over the title deeds in respect of mortgages now paid off. 2022 [Saturday 1st October] The Fiat Currency Megatheft [XXVI - Robbery at the Bank of England (Bloody Expensive Wednesday Explained)]: [Continued from 28th September 2022] On 1st October 2022 YouTube financial pundit Adam Taggart puts out an interview on his Wealthion channel with fellow commentator Lance Roberts entitled "Systemic Instability NOT Inflation is the Threat the Fed Should Fear" ...
Our present interest with this piece begins at 1000 when Taggart turns to the Bank of England's costly bailout of the London pension funds three days earlier. He works his way through what is known so far about the incident, beginning with a very clear explanation of why bond inventory values drop whenever market interest rates go up. This, however, is just high school math, and should have caught nobody out - i certainly would not affect a pension fund's ability to pay out in the short term (because there has been no change to the "coupon" to be received from the investments), nor would it require particularly urgent re-funding once the balance sheet revealed the drop in the value of the holdings at the end of the accounting year. HOWEVER, at 1320 Taggart explains that when holdings are not actually in the vaults but out on trade, the fund is actually highly vulnerable to what are called MARGIN CALLS...

QUICKIE - MARGIN CALLS: We have already met with Margin Calls in the entry for last year's Archegos Meltdown [see 26th March 2021]. To save scrolling back 18 months, this is what we said about them then (for the full backstory see the original)...

ASIDE - MARGIN CALLS AS "CHANCE CARDS"® IN THE GAME OF LIFE: A Margin Call [Wikipedia briefing] is a dealer's ad hoc request for additional funds from an investor following a reappraisal of the risk. This can cause acute financial embarrassment to the investor, especially if s/he/it is highly leveraged. In the Archegos case, the margin call followed the dealer's chance discovery of the previously undeclared swaps. Markets keep their ears to the ground for news of emerging margin calls, in case they are themselves exposed to the same risk. Indeed it is not uncommon for margin calls to trigger a domino rally within a particular security or class of securities.

The preliminary judgement, therefore, is that the pension funds concerned had been unwisely overextended [= gambling with] their portfolios, suffered a multi-billion loss, and were bailed out by the British taxpayer. Again. Just like in 2008. When they told us they would not do it again [sub-thread continues at 2nd October 2022]. HIGHLY TECHNICAL, BUT STICK WITH IT - IT'S IMPORTANT

The thrust of this piece is that mainstream economic theory has been deliberately twisted to allow money to be printed by U.S. and British central banks other than for the benefit of those two nations' economic health. *YouTube the piece here* (21 mins) INTERESTING THROUGHOUT

Moss takes the position that the ongoing Bank of England debacle - which see - was simply a case of the UK "blinking first", thereby of being the first central bank to "pivot" [Investopedia briefing] and paying a hefty price for that privilege. All central banks, Moss argues, have kept interest rates too low for too long, encouraging unwary [or just plain greedy - Ed.] investment houses to "over-leverage" their portfolios [Investopedia briefing]. The European Central Bank (ECB), in his judgement, looks to be the next central bank to be forced to pivot in this way.

2022 [Thursday 13th October] The Fiat Currency Megatheft [XXXII - Credit Suisse Under the Cosh Microscope (The FT Dishes the Dirt)]: [Continued from preceding entry (same day)] On the same day, the heavyweight The Financial Times puts out a piece on its channel entitled "Credit Suisse: What Next for the Crisis-Hit Bank" ...  

*YouTube the piece here* (26 mins) IMPECCABLE SOURCES, SPINE-CHILLING CONCLUSIONS

The FT's explanation nicely complements our recent entries for Adam Taggart and George Gammon concerning the ongoing Bank of England debacle - which see - but with greater focus on the banking practices many are already suggesting were responsible for it. The weak point in these practices [which exist, needless to say, to protect all customers, not just a select few - Ed.] is that risk management procedures are wholly inadequate to cope with the moral hazard of handling what might - upon proper investigation - turn out to be dirty money. Different contributors come at these issues from various directions, and brave senior executives do their best to limit the damage. Nevertheless enough specific examples of money laundering are given to cast deep and genuine doubt on the adequacy of the bank's corporate governance: as one contributor cogently remarked at 0402, "it's as if they didn't get the memo back in 2008". The Greensill Scandal [see 13th May 2021] and the Archegos Meltdown [see 26th March 2021] are discussed in detail at 0900-1030, whereafter "stunning deficiencies" in risk management are
identified and a slew of "dubious dealings" noted. Moreover, despite repeated suspicions of money laundering on behalf of shady international criminals, no regulatory action was ever taken. Coming right up to date, the piece concludes that even if it acts immediately it will likely be several years before the bank retrieves its reputation. In the meantime, "every month, every quarter, every year seems to bring more scandal".

2022 [Friday 14th October] The Fiat Currency Megatheft [XXXIII - Robbery at the Bank of England (More Explanations)]: [Continued from 13th October 2022] On 14th October 2022 respected economics commentator Alfonso Peccatiello [commercial homepage] puts out a piece on his Blockworks Macro YouTube channel entitled "The Pension Funds Drama Explained", in which he explains the problems with underfunded pension funds and how they can so easily be looted [our word, not his - Ed.] by Margin Calls and other in-hindsight-unsafe practices ...

YouTube the piece here (14 mins) TECHNICAL BUT ESSENTIAL VIEWING

Aside from the technicalities, two general points are worth bearing in mind, namely (1) that globally there are some $40 trillion under management, and (2) that fundamentally the solvency of any given pension fund CANNOT be guaranteed (now he tells us!) 2022 [Thursday 20th October] Progress With Joint Vision 2020 [XI - NATO's Ukrainian Proxy War [The Eastory Animation]]: [Continued from 14th October 2022] On 20th October the Eastory YouTube channel puts out a computer animation entitled "Military Operations in East Ukraine, 1919-1942", showing the major movements of the front lines in and around the Ukraine in the period indicated. This therefore includes the hottest period of the Russian Civil War 1919-1920, the cooler period of the interwar years, and the advance of Nazi Germany in the first two years of Hitler’s invasion of Russia, 1941-1942.

YouTube the piece here (13 mins, incl. sponsor’s message) ESSENTIAL VIEWING

Not only does the piece make vivid the dozens of entries in the timeline to date pertaining to the Russian Civil War (not least General Vrangel’s failed U.S.-funded drive on Moscow in summer/fall 1919 [see own entry at 3rd July 1919 (and video at *foo*)]), but it also shows very clearly the part played by The Donbas in these operations. It will therefore help understand why that region became (1) the target for covert NATO expansion 1990-2014 and overt indiscriminate Ukrainian shelling 2014-2022, and (2) the scene of bitter frontline fighting for most of the 2022 NATO-Russian War [sub-thread continues at 23rd October 2022]. 2022 [Sunday 23rd October] Progress With Joint Vision 2020 [XII - NATO's Ukrainian Proxy War ["THE DAY OF FOUR CALLS")] [Continued from 20th October 2022] At around 2000hr BST the authoritative Military Summary Channel's analysis for this day's events accuses the United States of preparing a False Flag nuclear explosion - a low [all things are relative - Ed.] blast, high fallout "dirty bomb" [Wikipedia briefing] - in the Ukraine and blaming it on the Russian Federation ...

**YouTube the Piece Here** CANONICAL REPORT

The Russian Federation, it seems, spent the day on the diplomatic hotlines to Paris, Ankara, London, and Washington (in that sequence). It is not yet known what was said, but at least the spotlight of world attention may well hold Washington back. The Military Summary Channel piece quite neatly summarises these world historic events as a "DAY OF FOUR CALLS", and points out that if a dirty bomb is used - whether it be as a U.S. False Flag or a Russian Federation False False Flag or who cares what - it will not just be a new page in the book of history, it will be a whole new book!

**FACT CHECKING:** There are confirmatory pieces by the morning of 24th October from (in the order we saw them) Emil Cosman [YouTube it here FROM REUTERS], The Sirius Report [Twitterfeed late evening], and Alexander Mercouris [YouTube it here MASTERLY ANALYSIS] [sub-thread continues at TBA].

2022 [Tuesday 1st November] Germ Warfare [Candidate Biological Attacks, Post-WW2 (COVID-19, the Burr Report)]: [Continued from TBA] On 1st November 2022 trusted medical broadcaster Dr. John Campbell mounts a piece on his YouTube channel entitled "Covid Could Have Started Earlier Than Thought", in which he takes a physician's eye to the U.S. Senate Committee on Health, Education, Labor, and Pensions (HELP)'s [U.S. Senate briefing] 27th October 2022 interim report (more concisely, "The Burr Report") into the origins and spread of the COVID-19 Pandemic ...

**YouTube Campbell's piece here** (21 mins.) ESSENTIAL VIEWING

Comparing the public record with both the now substantial medical literature and the material contained in this new report, Campbell's opening remark is that the document raises "really quite severe question-marks" about the sequence of events set out in most official versions of the early weeks of the outbreak. For example, he notes at 1400-1640 that Moderna had taken out a patent as long ago as 2017 on viral material later isolated from 2020 pandemic patients. Within hours, the piece will attract more than 8000 comments [including one from the present author reporting himself and five close family members - Ed.] suffering covid-like illnesses in late-2019, well before the January 2020 alert.

**ELEPHANT IN THE ROOM:** Readers unfamiliar with the Chinese position on the origin of the pandemic should see the entry for 18th August 2022 before proceeding to the final paragraph THIS MAY TAKE SOME TIME, BUT IS VERY VERY IMPORTANT.

Holding that elephant firmly in mind, note that Campbell's viewers' comments include the claim at 1720-1850 that lab-confirmed infection was "all over" the San Diego Naval Base, California, in November 2019, before Wuhan [sub-thread continues at 4th November 2022].

2022 [Friday 4th November] Germ Warfare [Candidate Biological Attacks, Post-WW2 (COVID-19, the Milan Data)]: [Continued from 1st November 2022] On 4th November 2022 YouTube medic Dr. John Campbell mounts a piece on his channel entitled "Italy, September 2019", in which he draws attention back to 1st October 2021, specifically to a now 13-month-old paper by Apolone, et al. into the origins and spread of the COVID-19 Pandemic ...

See 1st October 2021 and 1st November 2022 for details of said paper and then (and only then) ...

**YouTube Campbell's piece here** (20 mins.) ESSENTIAL VIEWING
Campbell raises a number of interesting points ...

(1) the paper came out in September 2021 but was more or less ignored by the world's press.

(2) how come only Italy did this study, when Britain and the U.S. had similar research sample repositories [not least the San Diego Naval Station referred to in Campbell's 1st November entry, which see - Ed.].

(3) the earliest positive test was from a sample taken 3rd September 2019, indicating a disease perhaps a week earlier.

(4) there was undetected community spread for the rest of 2019, blithely attributed to regular flu.

(5) Figure 2 in the 2021 paper shows early cases in every part of Italy, not just the northern ski resorts.

As a medic himself, Campbell reserves his greatest criticism for the fact that the world's public health authorities so totally missed this data stream, thereby "grossly underestimating" the new disease's prevalence as it transitioned from outbreak to pandemic and started killing in earnest. This was, he says, nothing less than a "Herculean failure" [sub-thread continues at TBA].

Readers unfamiliar with the pivotal but rarely discussed part played by the **<Bank for International Settlements (BIS)>** in the rise of Hitler’s Nazis in the 1930s, the support of Hitler’s Nazis during WW2, and the keeping of their traditions alive in post-PAPERCLIP America ever since, should click here to see the entry in the companion encyclopaedia.

Readers unfamiliar with the pivotal but rarely discussed part played by **<Derivatives>** in the present thread should VERY CAREFULLY note what economist **<Richard Werner>** has to say about the **<Great Reset>** in the entry for <9th September 2022>.

On 5th December 2022 the **Bank for International Settlements (BIS)** [links above ESSENTIAL PRIOR CONTEXT] publishes its "**BIS Quarterly Review, December 2022**" [full text online NOT FOR THE FAINTHEARTED]. The review consists of a number of separate contributing papers but these are helpfully covered by an overarching press release [full text online], which summarises the conclusions as follows ...

- New BIS analysis of the 2022 Triennial Central Bank Survey shows shifts in trading patterns and market structure in foreign exchange and over-the-counter interest rate derivatives markets, identifying **risks deserving attention**.
- Foreign exchange swap positions point to over **$80 trillion of hidden US dollar debt, reported off-balance sheet**.
- The volume of daily foreign exchange turnover subject to settlement risk remains stubbornly high despite mechanisms to mitigate such risks.
The report quickly comes to the attention of online pundits, and on 7th December 2022 one of the most animated of these - George Gammon - puts out a piece on his channel vividly entitled "BIS Warns of 2023 Black Swan - A Derivatives Time Bomb" ...

INFORMATIVE THROUGHOUT AND INCLUDES USEFUL WORKED EXAMPLES

Gammon's forceful (but entirely reasonable) take on the BIS review is that the missing [we use the word "missing" cautiously, because it is in the nature of derivatives that nothing of value ever exists in the first place, so it cannot really go missing - Ed.] $85 trillion is likely to become "a big problem" during 2023. You betcha [sub-thread continues at 30th December 2022]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = STOCK MARKET AND FINANCIAL SHARP PRACTICE]

2022 [Thursday 29th December] The Corruption of the BBC [As Town Cryer for GCHQ (Minitrue Speaks Newspeak)]: [Continued from 30th January 2020] On 29th December 2022 GCHQ chief Sir Jeremy Fleming [Wikipedia biography] does a guest editor session for the BBC's R4 Today programme, in which he puts forward the core official message that NATO's Ukrainian Proxy War represents some sort "sea change" in "openness" in the use of military intelligence [this premise is in fact nothing short of laughable, but it is not the purpose of this entry to challenge the argument, merely to study the methods of its delivery - Ed.] ...

As was common practice amongst those performing comparable state propaganda duties during WW1 [see, for example, 7th September 1914], provincial news outlets are subsequently used to re-post the core message ad nauseam, thus (a selection from the very many available) ...

Note how the provincial pieces are simply echoing a central press briefing. Mindless repetition of this sort has, of course, long been acclaimed as one of the keys to the success of Hitlerian propaganda [Imperial War Museum briefing], and readers are reminded that slavishly copying intelligence service press releases into column inches does not make it news - far from it, rather [sub-thread continues at TBA]. 2022 [Friday 30th December] The Fiat Currency Megatheft [XXXVII - How Private Investors Are Milked (Saluzzi On The Dangers Of HFTs)]: [Continued from 5th December 2022] On 30th December 2022 YouTube financial pundit Adam Taggart puts out a piece on his Wealthion channel entitled "How HFTs Rob Us Blind", in which guest contributor Joe Saluzzi [no convenient biography but much to reward the determined browser] explains not just what High Frequency Trading Algorithms (HFTs) [Investopedia briefing RECOMMENDED] are, but also how they are routinely used to fleece [this is the present author's interpretation - the piece prefers to use the word "exploitative" - Ed.] gullible and/or unsavvy online traders ...

Readers will find what Taggart and Saluzzi have to say about the Securities and Exchange Commission (SEC)'s proposed tightening of regulations most informative. We await the promised update some time in January [sub-thread continues at TBA]. [THREAD = THE SHAPING OF THE MODERN WORLD] [THREAD = STOCK MARKET AND FINANCIAL SHARP PRACTICE]
